An Illustrated Analysis of North Carolina Traffic Crash Statistics

A MESSAGE FROM THE COMMISSIONER OF THE NORTH CAROLINA DIVISION OF MOTOR VEHICLES

The mission of the North Carolina Division of Motor Vehicles is to deliver quality driver and motor vehicle services, promote highway safety and furnish timely and accurate information. We accomplish these goals by providing stellar customer service, enforcing motor vehicle laws and maintaining the integrity of official DMV records.

This Division and its many partners continue to make strides in promoting safety. We encourage drivers to change their habits and assist with the goal of reducing motor vehicle crashes and the severity of injuries on our state highways. However, many drivers still create dangers by ignoring the rules of the road.

In 2015, reportable traffic crashes increased 11.1 percent. The number of fatalities also increased by 8.1 percent compared to those in 2014. There was an increase of 13.2 percent in the number of motorcyclists killed and the number of pedal-cyclists killed increased by 5.9 percent. The number of pedestrians killed in motor vehicle crashes also increased by 14.7 percent. Unfortunately, the number of motor vehicle crashes involving a teen driver increased by 2.6 percent. Crashes involving teen drivers who were speeding also increased by .5 percent.

As you use these statistics, it is the Division's sincere wish that you become an active participant in making our highways safer by educating yourself about the disastrous consequences of motor vehicle crashes. Spread the word to all you know. Thank you for your help in making North Carolina a safer place to drive, bicycle and walk.

Such activities have the potential to distract the person from the primary task of driving and increase the risk of crashing (http://www.distraction.gov/).

Driver Distraction is a self-reporting contributing circumstance. Therefore, the data collected may not reflect the severity of this issue. In 2015, 21.0% of the crashes in North Carolina involved a driver that was distracted.

This ranking of cities is based on several factors including reported crashes, crash severity, and crash rates based on population. For a complete listing of factors and data, contact Brad Robinson, PE with the Traffic Safety Systems Management Unit in the Department of Transportation.

Note: In 2013 VMT (Vehicle Miles of Travel) data for larger cities became available, therefore crash rate calculations based on this data have now become a part of the rankings process for cities with populations greater than 10,000. As a result, some city rankings were more affected by this change than others.
