

Additional Requirements:

Listed below are areas of information that shall be submitted:

- Describe the firm's experience with Independent Cost Estimator Services on CM/GC, Design-Build, Progressive Design-Build or Construction Manager at Risk (CMAR) projects.
- Briefly describe the firm's experience with NCDOT Pay Items, Standard Specification and Standard Drawings.
- Elaborate on the general information to establish the credentials and experience of the firm to undertake this type of effort.
 - Identify recent (within the past five years) roadway and bridge projects with construction costs exceeding \$20 million for which the firm has served as Independent Cost Estimator. For each project, provide a brief synopsis that demonstrates the firm's ability to perform and manage the work, including the project's completion date and contact person.
- Provide resumes and work experience for all key personnel, including estimators, the Project Manager, and other essential team members. Each individual must have a minimum of five (5) years of relevant experience and include their qualifications related to the proposed work. The Department is particularly interested in the team's experience, expertise, and overall quality as it relates to successful project delivery.
- The Firm shall provide information on its understanding of the work required and the approach they will use to accomplish the goal(s). This may include information on the Firm's approach to accomplishing the cost estimating services, its approach to means and methods for estimating activities, and any innovative ideas / approaches to complete these activities.
- Any other pertinent information concerning the Team's Experience shall also be included.
- If a project team experiences personnel changes or any other significant changes affecting the company's ICE capabilities, NCDOT must be notified immediately. The Department reserves the right to reevaluate the firm's prequalification code upon such changes.
