**Subject:** Eno Webinar: Transportation and Cybersecurity  
**Date:** Wednesday, February 9, 2022 9:07:24 AM

---

Successful cyber attacks on our transportation systems have a debilitating effect on the economy and public safety. Systems including oil pipelines, transit networks, airlines, and supply chains all are susceptible to an attack, but many are under prepared for a large and growing concern. Although cybersecurity does not capture the public attention until a crisis, putting policies in place now to stay ahead of the issue is increasingly vital. In this webinar, we will discuss cybersecurity with expert Scott Belcher and gain insights into the nature, threat, and public policies that surround cybersecurity.

**February 2022**  
**2:00-3:00pm ET**

**15**

**Register**

**Speakers:**

**Scott Belcher**, *President and CEO, SFB*

*Consulting*

**Paul Lewis**, *Chief Finance Officer and Policy*

*Director, Eno Center for Transportation*
