NCDOT Strategic Prioritization Results (Highway)

February 19, 2010

The Strategic Prioritization rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

As part of the NCDOT's new Transportation Reform process, a more data-driven approach is being used to score projects across the state. In order to score projects against similar projects within NCDOT's new prioritization process, each project is classified under one of the Department's three primary goals (Safety, Mobility, Infrastructure Health) and three tiers (Statewide, Regional, and Subregional). Projects classified as Infrastructure Health were further classified by Submode (Interstate Pavement, Modernization, and Highway Miscellaneous). The following pages contain a listing of highway projects statewide and by NCDOT Division.

Please refer to Project Classification section below to see how these projects were classified within each NCDOT Goal, Tier, and Submode.

Please navigate this document in the following manner:

For Highway Projects:

1. To view project rankings on a statewide basis start by clicking on the “plus” sign next to “All Inclusive Report”. This will bring up NCDOT’s three Goals of Health, Mobility, and Safety.
2. Click on the “plus” sign again to view the NCDOT’s Tiers in the following order, Regional, Statewide, and Subregional.
3. Click on the “plus” sign again to view the Submode.
4. Click on the Submode name to view the specific projects. *Please note that for Mobility projects, the Submode is Highway.*
5. Use the same approach to navigate through the projects by the 14 NCDOT Divisions.

Project Classifications for Prioritization

Goal

Safety
Projects where the *primary* purpose is to improve safety. A safety project may also improve the condition of the facility or mobility along the corridor. Examples include:

- Guardrail projects
- Rail crossing and safety projects
- Upgrade roadway projects to improve safety, where no additional capacity or lanes are included
- Traffic signals
- Rumble strips
- Runway lighting

Mobility
Projects where the *primary* purpose is to improve mobility or improve access. This includes the majority of projects which add capacity or improve travel time, even if the safety or condition of the facility is also improved. Examples include:

- Widening projects (including projects with incorporate a bridge replacement project)
- New location projects (unless a project is to relocate a facility to improve safety)
- Convert grade-separation to interchange projects
- Signal system coordination projects
- Variable message signs and traffic cameras
- New multi-use trail projects
- New buses for a new bus route
- New passenger/commuter/light rail service
- Adding double track to a rail line
- New ferry vessel for expanded ferry service
- Runway extension to accommodate larger planes

Infrastructure Health
Projects where the *primary* purpose is to improve the condition of the infrastructure. Projects that improve the health of the infrastructure and safety of the facility are typically classified as infrastructure health, unless the primary purpose is to improve safety. Examples include:

- Reconstruction, rehabilitation, resurfacing, repair, replacement, or preservation projects
- Rest area projects
- Replacing an aging ferry vessel (as opposed to a new ferry for new service)
- Replacing an aging bus (as opposed to a new bus for new service)
- Repaving an airport runway

Tier

Mode	Statewide Tier	Regional Tier	Subregional Tier
Highways	The Strategic Highway Corridors (SHC) as approved by the Board of Transportation	All primary routes (US and NC) not on the Statewide Tier	All secondary routes (SR) not on the Statewide Tier
Rail (Passenger & Commuter)	All intercity (including out-of-state) passenger rail service and station facilities associated with intercity services	Commuter rail service and associated station facilities which serve commuters *between* two or more counties	Commuter and light rail service and associated station facilities which serve commuters *within* a county
Rail (Freight)	Rail lines of strategic importance as determined by the Rail Division	All remaining rail lines not included on the Statewide Tier	N/A
Ferry	Ferry routes connecting Statewide Tier Highway facilities	Ferry routes connecting Regional Tier Highway facilities	Ferry routes connecting Subregional Tier Highway facilities
Aviation	Commercial service airports with at least 100,000 annual enplanements	Commercial service airports (Part 139 Certificated) with less than 100,000 annual enplanements *or* General aviation airports with at least 25 based aircraft	General Aviation airports with fewer than 25 based aircraft
Public Transportation	Bus service and associated station facilities which serve out-of-state travel	Bus and vanpool service and associated stations facilities and passenger amenities which serve commuters *between* two or more counties	Bus and vanpool service and associated stations facilities and passenger amenities which serve commuters *within* a county
Bicycle and Pedestrian	NC bicycling highways (on-road)	NCDOT designated multi-county regional routes (on-road) *or* Off-road facilities spanning multiple jurisdictions with a length of at least 20 miles	Off-road facilities with a length shorter than 20 miles *or* Town, city, or county on-road bicycle networks *or* All sidewalks

If a project is located at the intersection of more than one tier, the project is classified by the higher tier. An exception is at an intersection, interchange, or grade separation where the project only improves only improves one of the facilities. In this case, the project is classified according to the facility in which the improvement is located. For example, a project that converts a grade separation to an interchange (on a freeway) is classified by the tier of facility which currently does not have access to the freeway.

Mode

Highway
Projects where the *primary* purpose is to improve the highway system.

Bicycle and Pedestrian
Projects where the *primary* purpose is to enhance the Bicycle and Pedestrian system. Projects which include improving a roadway facility and enhancing bicycle access (such as a resurfacing project which includes adding wide outside shoulders) are classified as highway projects. Standalone projects which add wide outside shoulders are classified as bicycle and pedestrian projects.

Rail
Projects where the *primary* purpose is to improve passenger and freight rail service. Rail safety projects may be classified as a rail project or a highway project, depending how they are classified in the STIP.

Ferry
Projects where the *primary* purpose is to improve the ferry system.

Aviation
Projects where the *primary* purpose is to improve the publicly-owned airports.

Public Transportation
Projects where the *primary* purpose is to improve the public transportation system and regional/urban/rural transit systems.

Submode

The submode classification applies primarily to highway projects classified as safety or infrastructure health.

Safety

Safety (I, R, U)

Safety projects which are typically classified as an interstate, rural, or urban project in the State Transportation Improvement Program (STIP). Generally, these are larger and more costly safety projects than Hazard Elimination or Spot Safety Projects (see below). These projects are not scored by the Mobility and Safety Division.

Infrastructure Health

Interstate Pavement

Projects which resurface, rehabilitate, repair, or reconstruct pavement on interstates.

Modernization

Projects which upgrade the roadway to meet the latest design standards. These projects generally include resurfacing the roadway, but also may include adding shoulders, straightening curves, adding turn lanes, widening the existing travel lanes, raising the elevation of the roadway, etc.

Miscellaneous

Projects which are not classified as Interstate Pavement, Modernization, or Rest Areas, such as lighting and weigh stations.

32	5.94	44028		08	CHATHAM	SR 1516 (OLD GRAHAM ROAD), SR 1520 (OLD GRAHAM ROAD)			AND CHATHAM-13: ADD 2' SHOULDERS FROM NC 87 TO CHICKEN BRIDGE ROAD. THIS ROUTE IS SHOWN AS A MAJOR THOROUGHFARE IN THE 1972 PITTSBORO THOROUGHFARE PLAN. (LENGTH 8.0 MILES)

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

THIS ROUTE IS SHOWN AS A RURAL MINOR ARTERIAL IN THEMARCH 1987 MOORE COUNTY THOROUGHFARE PLAN AND IS ALSO SHOWNAS A LEVEL 2 IMPROVEMENT NEED IN THE 2008 FORT BRAGG BRAC REGIONAL GROWTH PLAN. THIS ROUTE ALSO PROVIDES ACCESS TO TWO LOCAL POINTS OF DESTINATION THE WEYMOUTH WOODS SANDHILLS NATURE PRESERVE AND THE HISTORIC MALCOLM BLUE FARM.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

WIDEN TO FOUR LANES DIVIDED WITH A BYPASS OF PINK HILL ON NEW LOCATION - PINK HILL BYPASS, SOUTH OF PINK HILL IN DUPLIN COUNTY TO NC 11 NORTH OF PINK HILL IN LENOIR COUNTY.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.

2	39.18	45436		14	JACKSON	US 74 (SMOKY MTNS. EXPRESSWAY)	EXIT 74	SR 1391 (PINEY MTN. RD.)	US 74/441 - DIRECTIONAL MEDIANS, U-TURN BUILB OUTS,REPLACE MONOLITHIC MEDIAN ISLANDS WITH CONCRETE MEDIAN BARRIER. PROJECT CAN BE CONSTRUCTED WITHIN EXISTING ROW.

These rankings represent initial results based on data and need, which have not been subject to funding, legal, and scheduling constraints. This list includes proposed projects that may end up being funded through other programs besides the State Transportation Improvement Plan. Therefore, while they appear in this initial listing, some of these projects will ultimately NOT be included in the Draft State Transportation Improvement Plan. This is only the first of many steps to creating the Draft State Transportation Improvement Plan.
