U.S. Department of Transportation
Federal Highway Administration

STATE OF NORTH CAROLINA
DEPARTMENT OF TRANSPORTATION

MICHAEL F. EASLEY
GOVERNOR

LYNDO TIPPETT
SECRETARY

August 2, 2004

Dear GIS Data User:

This is a copy of the *2003 Highway and Road Mileage Book*. The Geographic Information Systems (GIS) Unit of the North Carolina Department of Transportation maintains this data along with other items about the State road system.

The North Carolina Highway System is a dynamic system. There are typically 7,500 changes made every year. This report is a snapshot of the system as of January 1, 2004. The GIS Unit continuously strives to update this data in a timely and accurate manner, and we include the changes during that calendar year where we received notification. Please contact us if you have any questions about the history of this data or how it is acquired.

As part of our effort to increase efficiency and reduce costs, an online version of this report was first posted in 2001. By providing this report via the Internet, approximately 9,400 sheets of paper are saved per year, resulting in lower publishing costs. This effort not only saves state taxpayer money, but is also environmentally friendly. In order to view this report, please visit our website at:

http://www.ncdot.org//planning/statewide/gis/Sld2003/2003Index.html

The GIS Unit is continually trying to improve our products and services. If you have any questions or comments, please contact Hardee Cox, Road Inventory Manager, at (919) 212-6060.

Sincerely,
Forrest Robson, P.E.
GIS Director

EXPLANATION OF SURFACE TYPES

NON-PAVED SURFACES:

Type Code	Description
00	PRIMITIVE: An unimproved and non-maintained official state system road on the natural earth of the region traversed, that is barely passable but usable by 4-wheel vehicles, and publicly traveled by small numbers of vehicles.
10	UNIMPROVED: A road composed (with minor local exceptions) on the natural earth of the region traversed that may or may not have been bladed. Does not conform to the definition of a "GRADED & DRAINED" road in respect to alignment, grade, and drainage. The only work requirement by a public authority is to maintain a condition of bare passability for horse-drawn or motor vehicles.
20	GRADED & DRAINED: A road of natural earth (with minor exceptions) aligned and graded to permit reasonably convenient use by motor vehicles. Sufficiently drained by longitudinal and transverse drainage systems to prevent serious impairment of the road by surface water.
30	SOIL SURFACED-UNTREATED: Natural or artificial earth composed of topsoil, sand, or a sand-clay mixture that is stabilized with sand, tar, Portland cement, chemicals or other admixtures. Not bituminous surface treated.
41	GRAVEL OR STONE-UNTREATED: Crushed, screened or natural gravel; crushed stone; slag; shale; shell; chert; marl; crushed brick; shist; iron ore; disintegrated granite; chats; and other similar fragmental material. Not bituminous surface treated.

PAVED SURFACES:

51	BITUMINOUS SURFACE TREATED SOIL: Same as type 30 except Bituminous Surface treated with a mat of about one inch or less in thickness.
52	BITUMINOUS SURFACE TREATED GRAVEL OR STONE: Same as type 41 except Bituminous Surface treated with a mat of about one inch or less in thickness.
54	BITUMINOUS SURFACE TREATMENT OVER EXISTING BITUMINOUS CONCRETE: Bituminous Surface treatment over existing types 63, 65, or 66.
60	MIXED BITUMINOUS NON-RIGID BASE: A mixed bituminous road where the base course is of type other than 70, 80, or 90; and the combined compacted thickness of surface and base is less than 7 inches; or the design is such as to produce a road characteristic of having a low or non-uniform load-bearing capacity.
61	MIXED BITUMINOUS RIGID BASE: A mixed bituminous road on a base of types 70, 80, 90. Also on any other type of base where the combined compacted thickness of surface and base is 7 inches or more, or where by reason of the presence of natural foundation materials which meet base requirements, the road has a characteristically high uniform load-bearing capacity.

Type Code	Description
62	BITUMINOUS PENETRATION RIGID BASE: A bituminous penetration road on any base of types 70, 80, or 90. Also on any other type of base where the combined compacted thickness of surface and base is 7 inches or more, or where by reason of the presence of natural foundation materials which meet base requirements, the road has a characteristically high uniform load-bearing capacity.
63	BITUMINOUS CONCRETE e.g. I1, I2, HDS: Bituminous concrete on a Non-rigid base. Bituminous concrete includes sheet asphalt, topeka, rock asphalt, and similar bituminous mixes with precise control as to grading, proportions, and temperature, etc.
64	BITUMINOUS PENETRATION NON-RIGID BASE: A bituminous penetration road where the base course is of type other than 70, 80, or 90; and the combined compacted thickness of surface and base is less than 7 inches; or the design is such as to produce a road characteristic of having a low or non-uniform load-bearing capacity.
65	SAND ASPHALT hot premixed on sand asphalt base, or on any other base or type, except on types 66 or 67.
66	SAND ASPHALT hot premixed on existing bituminous concrete pavement.
67	BITUMINOUS CONCRETE OR SAND ASPHALT: hot premixed over existing Portland cement concrete pavement.
70-76	PORTLAND CEMENT CONCRETE
80	BRICK
90	BLOCK

GLOSSARY OF TERMS

The following list of terms and words has been compiled to aid the reader in interpreting the tables in this book. Definitions are limited to informing and clarifying the various summaries.

Average Daily Traffic (ADT) - The average daily traffic volume for a section of road.

Bituminous Surface Treatment (BST) - One or more applications of sprayed-on liquid asphalt followed by a layer of suitable aggregate to protect and preserve the surface, maintain the structural integrity, or restore the surface texture and skid resistance of the roadway. Generally, BSTs are performed on low volume roadways.

Bituminous Penetration - Gravel or stone road consisting of a base and wearing course of 1 inch or more in compacted thickness, bound with bituminous material introduced by downward or upward penetration.

Divisions - North Carolina's 100 counties are divided into fourteen divisions for highway management purposes. (See Highway Division Outline Map located on page 4 in this booklet.

Full Control of Access - Preference has been given to through traffic movements by providing interchanges with selected public roads and by prohibiting crossing at grades or by prohibiting direct driveway connections.

I-Bus Loop - Interstate Business Loop. These roads are not part of the national 42,000 miles system of Interstate Highways. They are merely associated with an interstate route and will guide the motorist back to the mainline.

Lanes - For through traffic - Does not include climbing lanes, passing lanes, turning lanes, speed change lanes, etc.

Mixed Bituminous - A road where the wearing surface is composed of 1 inch or more of gravel, stone, sand, or similar material; mixed with bituminous material under partial control as to grinding and porportions. (Ex. Mixed in place sand asphalt or bituminous sand road mix.)

Municipal - Within the city limits of an incorporated city or town.

Partial Control of Access - Preference has been given to through traffic movement. In addition to interchanges, there may be some crossings at grade with public roads, but direct private driveway connections have been minimized.

Paved - Surface Types 51-90.

Rural - Generally, all areas beyond the corporate limits of municipalities; however, for federal statistical purposes, all municipalities with population under 5,000 are also considered to be rural. The dividing line between rural and urban for federal purposes is defined by an urban boundary established by the Bureau of Census; with extensions as approved by the Federal Highway Administration and local transportation officials.

State Primary System - All Interstate, NC, and US numbered highways.

State Secondary System - All state-maintained roads other than the State Primary System. Unnumbered roads, such as school driveways, state university campus roads, or rural fire department drives, etc., are not included.

Unpaved - Surface Types 00-41.

Urban - Areas that have populations greater than 5,000; includes suburban areas adjacent to corporate limits. Also includes non-incorporated areas with population greater than 5,000.
