

Project Delivery tools: Preconstruction collaboration

Preconstruction collaboration is now the space to share files with project participants **and** is also a common workspace to actively contribute to files stored there.

What is it?

- A SharePoint® web site/application created and managed by NCDOT.
- A collection of project web sites containing library “folders” for each design project discipline.

Where is it?

- <https://connect.ncdot.gov/site/preconstruction>

Who is it for?

- Members of prequalified design firms, DOT staff and members of agencies or planning organizations that are designing and reviewing roadway projects.

When is it available?

- Now. Bentley’s ProjectWise is “in the works” for better sharing of CADD resources.

How do I get on?

- See below

The Preconstruction Collaboration Sites:

How do I get on?

You must be part of an NCDOT prequalified Professional Engineering Firm that has been awarded a designer or reviewer role for a specific project.

- Your firm must provide dot.cmsupport@ncdot.gov with the names of a primary and secondary contact who is authorized by the firm to manage the list of employees at the firm that have access to project data.
 - You must have an NCID. (NCIDs are assigned by the state and are not managed by NCDOT.)
 - Apply for an **individual** NCID at <https://ncidp.nc.gov/ncidsspr/> using your professional email address.
 - Respond to the NCID email you receive to set your password and security questions. Do not share your NCID/password. This is not a group or corporate ID.
 - Your firm's primary or secondary contact must forward the following to dot.cmsupport@ncdot.gov
 - Your name
 - Your email
 - Your NCID

It may take up to a day to process this information and grant access.

- Use your web browser to go to <https://connect.ncdot.gov/site/preconstruction>
 - Login with your NCID and password (your login ID format is "ncid\yourlogin")
 - Projects are listed by division. You will only see projects assigned to your firm.
- Click on **Preconstruction Help** or → **Preconstruction Help** on the left side of the screen to see Frequently Asked Questions, Quick Reference materials and training presentations.

Preconstruction
Libraries for
experienced
SharePoint users.
