SAFE OPERATING PROCEDURES

Wet Weather

SOP 10-20

1. Area supervisors should be aware of the safety of their area and be alert to wet floor hazards.
2. Wet floor signs or cones should be placed at entranceways during times of inclement weather.
3. Housekeeping crews shall inspect entrances and keep water accumulations removed throughout the workday.
4. Door mats should be located inside doorways and length-way with the hall
5. Door mats should be periodically examined for saturation.
6. Employees should be aware of wet steps and rails on equipment. Use 3-points of contact!
7. Employees should be mindful of standing water on roadways during travel. Best to turn around if depth of water could be hazardous.
8. Increase following distance and reduce speed while driving.
9. Ensure proper PPE during a rain event. (rainwear)
10. Ensure footing to avoid slipping.
