BEVERLY EAVES PERDUE
GOVERNOR

EUGENE A. CONTI, JR. SECRETARY

Minutes of Pre-Bid Conference

DATE: Wednesday, June 2, 2010

TIME: 1:00 p.m.

PROJECTS: WBS 4283.3.1 (B-5234) Clay County Bridge No. 100

LOCATION: Chief Engineer's Conference Room, Maintenance Building, Raleigh,

Wake County

A mandatory pre-bid conference was held for the above listed project. A list of attendees is attached to these minutes. Mr. Zaki Wafa of the Bridge Management Unit conducted the pre-bid conference. The bid opening date is at 2:00 p.m., Thursday, June 24, 2010. The following items is noted and is hereby made part of the contract:

1. Environmental Permit is attached.

GENERAL PERMIT (REGIONAL AND NATIONWIDE) VERIFICATION

Property Owner / Authorized Agent: Chris Lee, P.E., Division 14 Bridge Maintenance Engineer,

NCDOT

Address: 178 Henry Bird Road

Havesville, NC 28789

Telephone No.: 828-497-7953

Size and location of property (water body, road name/number, town, etc.): Bridge No. 100 over Trout Cove Branch on SR 1100, Old US 64, in Hayesville, North Carolina.

Description of projects area and activity: To replace the deteriorated Bridge No. 100 over Trout Cove Branch with a cored slab structure widened to 36-feet and lengthened to 60-feet. Two sandbag cofferdams will be utilized to dewater the abutment work areas (240 sq. ft. impact area).

Section 404 (Clean Water Act, 33 USC 1344) Applicable Law:

Section 10 (Rivers and Harbors Act, 33 USC 403)

Authorization: Regional General Permit Number:

Nationwide Permit Number: 3

Your work is authorized by the above referenced permit provided it is accomplished in strict accordance with the attached conditions and your submitted plans. Any violation of the attached conditions or deviation from your submitted plans may subject the permittee to a stop work order, a restoration order and/or appropriate legal action.

Special Conditions

- 1. All work must be performed in strict compliance with the plans received by this office on February 16, 2010, which are a part of this permit. Any modification to the permit plans must be approved by the USACE prior to implementation
- 2. Failure to institute and carry out the details of these special conditions will result in a directive to cease all ongoing and permitted work within waters and/or wetlands associated with the permitted project, or such other remedies and/or fines as the District Engineer or his authorized representatives may seek.
- 3. The permittee shall require its contractors and/or agents to comply with the terms and conditions of this permit in the construction and maintenance of this project, and shall provide each of its contractors and/or agents associated with the construction or maintenance of this project with a copy of this permit, and any authorized modifications. A copy of this permit, and any authorized modifications, including all conditions, shall be available at the project site during construction and maintenance of this project.
- 4. This permit does not authorize temporary placement or double handling of excavated or fill material within waters or wetlands outside the permitted area.
- 5. All conditions of the attached North Carolina Wildlife Resources Commission letter of February 18, 2010 are hereby incorporated as special conditions of this permit.
- 6. The permittee will report any violation of these conditions or violations of Section 404 of the Clean Water Act in writing to the Wilmington District, U. S Army Corps of Engineers, within 24 hours of the permittee's discovery of the violation.

This verification will remain valid until the expiration date identified below unless the nationwide authorization is modified, suspended or revoked. If, prior to the expiration date identified below, the nationwide permit authorization is reissued and/or modified, this verification will remain valid until the expiration date identified below, provided it complies with all requirements of the modified nationwide permit. If the nationwide permit authorization expires or is suspended, revoked, or is modified, such that the activity would no longer comply with the terms and conditions of the nationwide permit, activities which have commenced (i.e., are under construction) or

are under contract to commence in reliance upon the nationwide permit, will remain authorized provided the activity is completed within twelve months of the date of the nationwide permit's expiration, modification or revocation, unless discretionary authority has been exercised on a case-by-case basis to modify, suspend or revoke the authorization.

Activities subject to Section 404 (as indicated above) may also require an individual Section 401 Water Quality Certification. You should contact the NC Division of Water Quality (telephone (919) 733-1786) to determine Section 401 requirements.

For activities occurring within the twenty coastal counties subject to regulation under the Coastal Area Management Act (CAMA), prior to beginning work you must contact the N.C. Division of Coastal Management.

. This Department of the Army verification does not relieve the permittee of the responsibility to obtain any other required Federal, State or local approvals/permits.

If there are any questions regarding this verification, any of the conditions of the Permit, or the Corps of Engineers regulatory program, please contact David Baker at 828-271-7980.

Corps Regulatory Official <u>David Baker</u> Date: <u>February 25, 2010</u>

Expiration Date of Verification: February 25, 2012

The Wilmington District is committed to providing the highest level of support to the public. To help us ensure we continue to do so, please complete the attached customer Satisfaction Survey or visit http://regulatory.usacesurvey.com/ to complete the survey online.

Determination of Jurisdiction:

A. Based on preliminary information, there appear to be waters of the US including wetlands within the above described project area. This preliminary determination is not an appealable action under the Regulatory Program Administrative Appeal Process (Reference 33 CFR Part 331).
B. There are Navigable Waters of the United States within the above described project area subject to the permit requirements of Section 10 of the Rivers and Harbors Act and Section 404 of the Clean Water Act. Unless there is a change in the law or our published regulations, this determination may be relied upon for a period not to exceed five years from the date of this notification.
C. There are waters of the US and/or wetlands within the above described project area subject to the permit requirements of Section 404 of the Clean Water Act (CWA)(33 USC § 1344). Unless there is a change in the law or our published regulations, this determination may be relied upon for a period not to exceed five years from the date of this notification.
D. The jurisdictional areas within the above described project area have been identified under a previous action. Please reference jurisdictional determination issued Action ID
Basis of Jurisdictional Determination: Trout Cove Branch is a tributary to the Hiwassee River which is a Traditional Navigable Waterway (TNW).
Appeals Information: (This information does not apply to preliminary determinations as indicated by paragraph A. above).
Attached to this verification is an approved jurisdictional determination. If you are not in agreement with that approved jurisdictional determination, you can make an administrative appeal under 33 CFR 331. Enclosed you will find a Notification of Appeal Process (NAP) fact sheet and request for appeal (RFA) form. If you request to appeal this determination you must submit a completed RFA form to the following address:
District Engineer, Wilmington Regulatory Program Attn: David Baker, Project Manager 151 Patton Avenue, Room 208 Asheville, North Carolina 28801
In order for an RFA to be accepted by the Corps, the Corps must determine that it is complete, that it meets the criteria for appeal under 33 CFR part 331.5, and that it has been received by the Division Office within 60 days of the date of the NAP. Should you decide to submit an RFA form, it must be received at the above address within 60 days from the <i>Issue Date</i> below.
It is not necessary to submit an RFA form to the Division Office if you do not object to the determination in this correspondence.
Corps Regulatory Official:
Issue Date: February 25, 2010 Expiration Date: February 25, 2015
SURVEY PLATS, FIELD SKETCH, WETLAND DELINEATION FORMS, PROJECT PLANS, ETC., MUST BE ATTACHED TO THE FILE COPY OF THIS FORM, IF REQUIRED OR AVAILABLE.
Copy Furnished: Mark Davis, NCDOT, Division 14 Environmental Supervisor

SECURION IN The following identities your rights and options regarding an administrative appeal of the above of decision's Additional information may be distinguish a http://www.usace.ann.yom/vine/functions/cw/secwe/sec.or/ Corps regulations at 33 COR Part 33 Corps to the contract of t

A: INITIAL PROFFERED PERMIT: You may accept or object to the permit.

- ACCEPT: If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final
 authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature
 on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the
 permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.
- OBJECT: If you object to the permit (Standard or LOP) because of certain terms and conditions therein, you may request that the permit be modified accordingly. You must complete Section II of this form and return the form to the district engineer. Your objections must be received by the district engineer within 60 days of the date of this notice, or you will forfeit your right to appeal the permit in the future. Upon receipt of your letter, the district engineer will evaluate your objections and may: (a) modify the permit to address all of your concerns, (b) modify the permit to address some of your objections, or (c) not modify the permit having determined that the permit should be issued as previously written. After evaluating your objections, the district engineer will send you a proffered permit for your reconsideration, as indicated in Section B below.

B: PROFFERED PERMIT: You may accept or appeal the permit

- ACCEPT: If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final
 authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature
 on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the
 permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.
- APPEAL: If you choose to decline the proffered permit (Standard or LOP) because of certain terms and conditions therein, you may appeal the declined permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.
- C: PERMIT DENIAL: You may appeal the denial of a permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.
- D: APPROVED JURISDICTIONAL DETERMINATION: You may accept or appeal the approved JD or provide new information.
- ACCEPT: You do not need to notify the Corps to accept an approved JD. Failure to notify the Corps within 60 days of the date of
 this notice, means that you accept the approved JD in its entirety, and waive all rights to appeal the approved JD.
- APPEAL: If you disagree with the approved JD, you may appeal the approved JD under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

DATE:

February 18, 2010

SUBJECT:

Review of NCDOT's application for Section 404 and 401 permits to replace

Bridge No. 100 on SR 1100 over Trout Cove Creek, Clay County, North

Carolina. TIP No. B-5234

The North Carolina Department of Transportation (NCDOT) submitted an application to obtain a Section 404 Permit from the U.S. Army Corps of Engineers (USACE) and a 401 Water Quality Certification from the Division of Water Quality (NCDWQ). These comments are provided under provisions of the National Environmental Policy Act (42 U.S.C. 4332(2)(c)) and the Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661-667d).

The NCDOT proposes to replace Bridge No. 100 on SR 1100 in Clay County. This will require impacting 240 ft² of Trout Cove Creek with temporary cofferdams.

Adherence to the trout spawning moratorium is unnecessary, but Brasstown Creek a short distance downstream of the site supports sicklefin redhorse and other rare aquatic life like wavyrayed lamp and spike mussels.

NCWRC can concur with the issuance of Section 404 and 401 permits provided that the following conditions are implemented:

- 1. Removal of the existing abutments and other in-stream disturbance/construction must be avoided during the April 1 to June 15 sicklefin redhorse spawn unless the disturbed areas are isolated from high stream flows with stable diversions
- 2. Sediment and erosion control measures shall adhere to the Design Standards for Sensitive Watersheds and be strictly maintained until project completion.
- 3. Herbaceous vegetation shall be planted on all bare soil as soon as possible following the completion of permanent or temporary ground disturbing activities to provide appropriate long-term erosion control.

- 4. Tall fescue and straw mulch shall not be used in riparian areas. We encourage NCDOT to utilize onsite vegetation and materials for bank stabilization when practicable. Erosion control matting shall be used on steep slopes and for establishing permanent vegetation in riparian areas and be well anchored with staples or wooden survey stakes and, whenever possible, include live stakes of native trees.
- 5. Stormwater, including deck drainage, should be directed to buffer areas or retention basins and should not be routed directly into the waterway.
- 6. Only clean, sediment-free rock should be used as temporary fill (causeways), and should be removed without excessive disturbance of the natural channel bottom when construction is completed.
- 7. Discharge of materials into the waterway from demolition of the old bridge should be avoided as much as practicable. Any materials that inadvertently reach the water should be removed.
- 8. The natural dimension, pattern, and profile of the waterway above and below the crossing should not be modified by widening the channel or changing the depth of the waterway.
- 9. Removal of vegetation in riparian areas should be minimized. Native trees and shrubs should be planted along the banks, as appropriate to the setting, to reestablish the riparian zone and to provide long-term erosion control.
- 10. Grading and backfilling should be minimized, and tree and shrub growth should be retained if possible to ensure long term availability of shoreline cover for fish and wildlife. Backfill materials should be obtained from upland sites.
- 11. Riprap placed for bank stabilization should be limited to the banks below the high water mark, and vegetation should be used for stabilization above the high water elevation.
- 12. If concrete will be used during construction, work must be accomplished so that wet (uncured) concrete does not contact surface waters. This will lessen the chance of altering the water chemistry and causing a fish kill.
- 13. Discharging hydroseeding mixtures and washing out hydroseeders and other equipment in or adjacent to surface waters is strictly prohibited.
- 14. Heavy equipment should be operated from the bank rather than in the channel whenever possible in order to minimize sedimentation and reduce the likelihood of introducing other pollutants into the waterway. All mechanized equipment operated near surface waters should be inspected and maintained regularly to prevent contamination of surface waters from fuels, lubricants, hydraulic fluids or other toxic materials.
- 15. The existing roadway that is to be eliminated should be removed back to original ground elevations and the natural floodplain elevations and functions should be restored. Disturbed areas should be seeded or mulched to stabilize the soil and native tree species should be planted with a spacing of not more than 10'x10'.

Thank you for the opportunity to review and comment on this project. Pease contact me at (828) 452-0422 if you have any questions about these comments.
