

## **EB-4993 Project Synopsis**

### **Project Description**

- TIP Project EB-4993 is the Neuse River Greenway Project from the Wake / Johnston County Line to Sam's Branch Creek in Johnston County. The project is approximately 3.7 miles long.

### **Planning**

- The Programmatic Categorical Exclusion was signed on September 28, 2009.
- Due to its status as an inland primary nursery area, there is an in-water work moratorium between February 15th and September 30th in the Neuse River.

### **Public Involvement Scope of Work**

- During the project's construction, the Design-Build Team shall coordinate with the Division 4 Office and the Construction Unit to inform the public of construction progress, etc.

### **Greenway Scope of Work**

- The Design-Build Team shall design and construct a ten-foot wide multi-use greenway from the Wake / Johnston County Line to Sam's Branch Creek.
- The asphalt pavement design for the greenway will be provided in the RFP.

### **Structure Scope of Work**

- The Design-Build Team shall be responsible for the design and construction of all structures necessary to complete the project, including but not limited to a pedestrian bridge over the Neuse River, south of Covered Bridge Road.

### **Hydraulic Scope of Work**

- The Design-Build Team shall be responsible for all storm drainage design and construction, bridge survey and culvert survey reports, and FEMA compliance.

### **Location and Surveys Scope of Work**

- Electronic surveys will be provided to the short-listed teams. The Design-Build Team shall be responsible for all supplemental surveys.

### **Geotechnical Scope of Work**

- Structure subsurface investigations will be provided to the short-listed teams. The Design-Build Team shall be responsible for all recommendations, as well as all supplemental investigations.

### **Environmental Scope of Work**

- The Design-Build Team shall be responsible for preparation of all documents required to obtain the environmental permits necessary to complete the project. It is anticipated that a US Army Corps of Engineers Nationwide Section 404 Permit and a NC Department of Natural Resources, Division of Water Quality Section 401 Water Quality Certification will be required. It is also anticipated that a Neuse River Buffer Certification will be required.

### **Erosion Control Scope of Work**

- The Design-Build Team shall be responsible for all erosion control designs and implementation. The Design-Build Team shall have a certified erosion control inspector on the project at all times during construction.

### **Right of Way Scope of Work**

- It is anticipated that the Town of Clayton will acquire all right of way and easements necessary to construct this project.

### **CEI Scope of Work**

- The Division Office will be responsible for CEI work.
