Attachments: WILSON TOISNOT SWAMP DETAIL US PRELIM.zip_RENAMED

Pam,

This is the Preliminary model for Wilson 55. It should become effective model in April 2013. At any rate, NCFMP will allow us to use this model in lieu of the original Hec-2 model (that we can't find).

JLL

Here is the prelim model for Wilson 55. (File name needs to be renamed to make it a ZIP extension, then extract the RAS files.)
