RE: **Provision Revision**  
Contract ID: DN11832974  
County: Haywood, Henderson, Polk, Transylvania  
Letting Date: September 11, 2018

The above contract has experienced the following revision:

The following question was raised by a bidder, and the corresponding answer is below:

**Question:** Is the bidder/contractor required to have all of the certified erosion control staff listed on page G-8 of the proposal?

**Answer:** No. In order to be eligible to perform work under this contract, the successful low bidder is required to have a ***Level I Certified Installer*** on each job site where erosion control measures are being installed. However, NCDOT will be responsible for all EC design and project monitoring, therefore the contractor **is not** required to provide either a *Certified Supervisor*, *Certified Foreman*, or *Certified Design* to perform this work.

On page **G-8**, remove the special provision, **SP1 G180, Erosion And Sediment Control/Stormwater Certification**; this provision will not be required for this contract.

These revisions do not change bid items or the associated quantities.

Please insert this letter into the addendum section of the proposal and sign the verification. Thank you for your attention to this matter.
