Division Contract Engineer

cc: Ms. Mary Beth Houston, PE
Mr. Jeremy Stroud, PE
Mr. Jeff Cabaniss, PE
Mr. Hon Yeung, PE
Ms. Debora Roberson

PAYMENT FOR TIER ITEMS:

This contract contains tier items for which the price may vary depending on the quantity utilized at each project site. Payment will be made on a per ton basis in place and accepted for Asphalt Concrete Base Course, Asphalt Concrete Intermediate Course, or Asphalt Concrete Surface Course for a Tier 1, Tier 2, Tier 3, or Tier 4 project location. Payment will be made on a square yardage basis for Milling Asphalt Pavements, 1" to 3" for a Tier 1, Tier 2, Tier 3, or Tier 4 project location. The description of the tier items are as follows:

Tier 1 A **project** location requiring:

0 to 50 tons of an individual paving item (B25.0C, I19.0C, S9.5C, S9.5B and S 4.75A)

0 to 500 square yards of Milling Asphalt Pavement, 1" to 3" Depth

Tier 2 A **project** location requiring:

51 to 500 tons of an individual paving item (B25.0C, I19.0C, S9.5C, S9.5B and S 4.75A)

501 to 1,000 square yards of Milling Asphalt Pavement, 1" to 3" Depth

Tier 3 A **project** location requiring:

501 to 1,000 tons of an individual paving item (B25.0C, I19.0C, S9.5C, S9.5B and S 4.75A)

1,001 to 2,000 square yards of Milling Asphalt Pavement, 1" to 3" Depth

Tier 4 A **project** location requiring:

More than 1,000 tons of an individual paving item (B25.0C, I19.0C, S9.5C, S9.5B and S 4.75A)

More than 2,000 square yards of Milling Asphalt Pavement, 1" to 3" Depth

The total quantity of a specific asphalt plant mix used on a project will determine the tier level for that asphalt type. Payment for these items will be made under the appropriate line item for the applicable asphalt tonnage placed and accepted. **The tier for Milling Asphalt Pavement will be determined separately from the asphalt items.** The Engineer shall make the final tier determination on each project. Payment will be made based on the bid prices for tier materials or items used at each separate site if the Contractor **remobilizes**, i.e. loads equipment on lowboys or other transporters to be carried to another separate location.

Payment for asphalt under the Subdivision pay items will be determined by the Engineer. Generally, subdivision streets are defined as those streets less than one mile or less in length, normally dead-end roads, contain a cul-de-sac, and support residential property access. The Engineer will have the final determination as to whether a route functions as a subdivision road or not.

Payments made under these items will be full compensation for all material and work listed in the tier schedule. Asphalt items include the production and placement of the mix, tack coat: trimming broken material from pavement edge (as needed to provide a neat edge); asphalt cement additives; providing and placing construction signs; equipment; and all other items incidental to the work.

Contractor shall note that the contract bid quantities are estimated quantities and are used solely for determining the lowest responsible bidders. The actual quantity of work may vary. No minimum amount of work is guaranteed under this contract.
