ADDENDA #1

MEMO TO: PLAN HOLDERS

FROM: Jennifer A. Sour
Division Contract Engineer

DocuSigned by:

Jennifer A. Sour

B213233052CA46B...

CONTRACT ID: DG00684
WBS ELEMENT NO.: 49317.3.5
TIP No.: HS-2007D
FEDERAL AID NO.: 0074249
COUNTY: GUILFORD COUNTY
LOCATION: I-74 AT THE US 29 AND I-74 INTERCHANGES
TYPE OF WORK: TRAFFIC SIGNALS, SIGNING AND PAVEMENT MARKINGS

To Whom It May Concern:

Several questions have been asked. The questions and responses are listed below:

- Q: Can mobilization be added to the contract?
 - A: Mobilization will not be added to the contract. Work takes place within an interchange; minimal movement is taking place.
- Q: Will Signal and Pavement Marking plans be issued by addendum?
 - A: The signal plans have been uploaded. They are now visible to all contractors. Pavement marking changes are shown on each of the signal plan geometric design sheets
- Q Could you confirm the locations for the 180 Type E signs, and whether this quantity is correct since line 0001 Sign Erection, Type E (4102000000-N) shows a quantity of 180 EA and the signing plans do not show Type E signs?
 - A: Type E signs are shown on each of the signal plan geometric design sheets. Most of the Type E signs are Signal Ahead signs on U-channel and signage on advance warning beacons.
- Q Will the Department de-energize the existing overhead sign lighting circuits prior to removal, or is the Contractor responsible for coordinating the disconnect with the power provider?
 - A: The Department is responsible for power service disconnection. We believe most (if not all) have already been disconnected.
