RE: **Questions & Answers**
Contract ID: DN00377
County: Graham
Letting Date: August 25, 2015

The following questions have been posed by a bidder:

1. The plan for Site 1 only shows directions to install a NCDOT furnished sign. Is there more work than this required?
2. Is treatment with ACQ, for ground contact, an acceptable alternative to the specifications for the chemical treatment that have been provided?

The following corresponding answers were provided by the engineer of record:

1. At site one the only work to be done is install the NCDOT Furnished sign on the contractor provided wooden post. Work is to be completed by per standard drawings and specifications.
2. Treatment with ACQ would be an acceptable alternative.

This Q&A resulted in no change to the bid items or their associated quantities, therefore there is no updated ebs file associated with this addendum.

Please insert this letter into the addendum section of the proposal and sign the verification. Thank you for your attention to this matter.
