Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

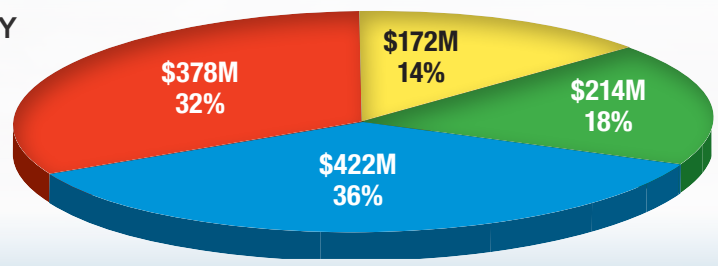
Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

As part of the NCASP, Albert J. Ellis Airport was classified as a Yellow Airport.

20-Year Costs for NCASP Recommended Projects

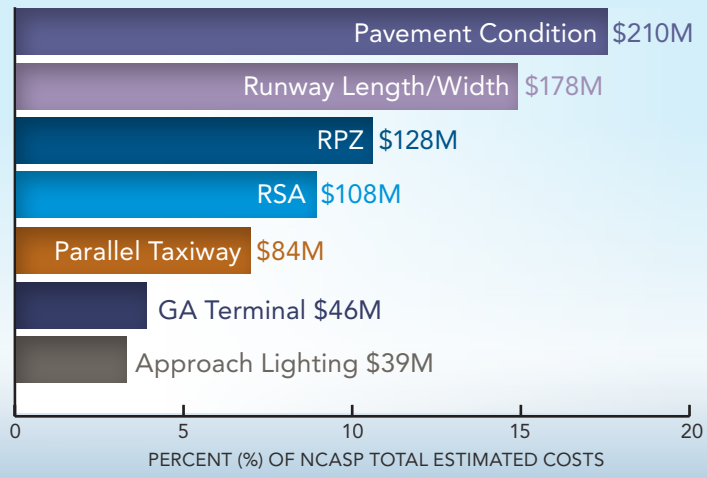
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About OAJ

Albert J. Ellis Airport (OAJ) is located in the City of Jacksonville and the County of Onslow in the southeastern portion of the state. The airport is owned by the county and provides commercial airline and general aviation services to its patrons.

Associated County / City	Onslow / Jacksonville
Annual Operations (2013)	38,804
Number of Based Aircraft (2013)	21
Enplanements (2013)	167,728
Primary Runway	05/23
Dimensions	7,100 FT X 150 FT
Approach/Approach Lighting	Precision / MALSR
Population Within 60-Min. Drive	501,248

Economic Benefit of the Albert J. Ellis Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	340 jobs
PAYROLL	$12,300,000
ECONOMIC OUTPUT	$191,890,000

ALBERT J. ELLIS AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2009	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	1,000 FT	1,000 FT	Yes
Runway Protection Zone (RPZ) Ownership	Fee Simple	Fee Simple	Yes
Pavement Condition Index (PCI) - Primary RWY	78 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	66 (as of 2012)	PCI ≥ 75	No
Pavement Condition Index (PCI) - Taxiways	71 (as of 2012)	PCI ≥ 75	No
Runway Length	7,100 FT	6,500 FT	Yes
Runway Width	150 FT	150 FT	Yes
Pavement Strength	75,000lbs SW 175,000lbs DW 300,000lbs DT	Per Part 139 Pavement Requirements	Yes
Visual Navigational Aids	RB, LWS, PAPI-4	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	Yes
Runway Edge Lighting	HIRL	High Intensity Runway Lighting (HIRL)	Yes
Weather Reporting Capability	AWOS III	AWOS IIIP	Yes
Standard Instrument Approach	PA, 200', 1/2 mile	Precision Approach (PA) <250', < 3/4m	Yes
Parallel Taxiway	Full Parallel	Full Parallel	Yes
Aircraft Apron	28 spaces	20% Based Aircraft + 20% Busy Day Transient (GA) = 8 spaces	Yes
General Aviation Terminal Building	2,400 SF	Passenger Terminal-Not Eligible, GA Terminal Bldg/Parking per ALP	Yes
Taxiway & Apron Edge Lighting	MITL	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	RHP, L, G	Runway Hold Position (RHP), Location (L), Guidance (G), Distance Remaining (DR)	Yes
Ground Communication	Remote Transmitter/Receiver (RTR)	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	MALSR	Approach Lighting System (ALS)	Yes
Aircraft Rescue and Firefighting (ARFF) Equipment	Yes	As required by Part 139	Yes

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	1,700 jobs
PAYROLL	$41,470,000
ECONOMIC OUTPUT	$473,760,000

ASHEVILLE REGIONAL AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2013	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	1,000 FT	1,000 FT	Yes
Runway Protection Zone (RPZ) Ownership	Complete	Fee Simple	Yes
Pavement Condition Index (PCI) - Primary RWY	57 (as of 2012)	PCI ≥ 75	No
Pavement Condition Index (PCI) - Apron	58 (as of 2012)	PCI ≥ 75	No
Pavement Condition Index (PCI) - Taxiways	77 (as of 2012)	PCI ≥ 75	Yes
Runway Length	8,001 FT	6,500 FT	Yes
Runway Width	150 FT	150 FT	Yes
Pavement Strength	120,000lbs SW, 160,000lbs DW, 260,000lbs DT	Per Part 139 Pavement Requirements	Yes
Visual Navigational Aids	RB, LWS, PAPI-4/VASI-4	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	Yes
Runway Edge Lighting	HIRL	High Intensity Runway Lighting (HIRL)	Yes
Weather Reporting Capability	ASOS	AWOS IIIP	Yes
Standard Instrument Approach	Precision Approach (PA), 200', 1/2 mile	PA, <250', < 3/4m	Yes
Parallel Taxiway	Full Parallel	Full Parallel	Yes
Aircraft Apron	93 spaces	20% Based Aircraft + 20% Busy Day Transient (GA) = 45 spaces	Yes
General Aviation Terminal Building	35,000 SF	Passenger Terminal-Not Eligible, GA Terminal Bldg/Parking per Master Plan	Yes
Taxiway & Apron Edge Lighting	MITL	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	RHP, L, G, DR	Runway Hold Position (RHP), Location (L), Guidance (G), Distance Remaining (DR)	Yes
Ground Communication	UNICOM, Remote Transmitter/Receiver (RTR)	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	MALSR	Approach Lighting System (ALS)	Yes
Aircraft Rescue and Firefighting (ARFF) Equipment	Yes	As required by Part 139	Yes

2015 INDIVIDUAL AIRPORT SUMMARY:

Avery County Airport/Morrison Field

NORTH CAROLINA AIRPORTS SYSTEM PLAN

NCASP

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

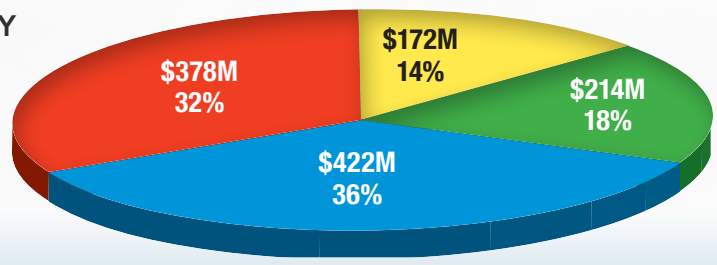
Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

As part of the NCASP, Avery County Airport/Morrison Field was classified as a **Green Airport.**

20-Year Costs for NCASP Recommended Projects

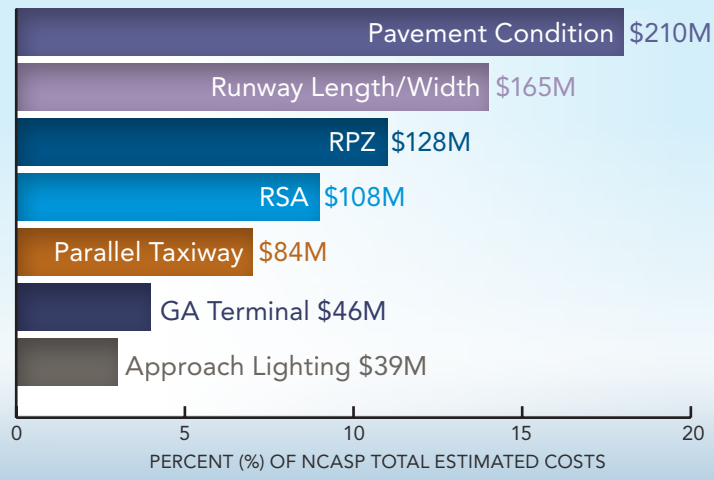
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About 7A8

Avery County Airport/Morrison Field (7A8) is located near the City of Spruce Pine and in the County of Avery in the central portion of the state. The airport is owned by the county and provides general aviation services to its patrons.

Associated County / City	Avery / Spruce Pine
Annual Operations (2013)	6,000
Number of Based Aircraft (2013)	32
Primary Runway	17/35
Dimensions	3,001 FT X 60 FT
Taxiway	Turnaround Ends
Approach/Approach Lighting	Visual / None
Population Within 30-Min. Drive	45,018

Economic Benefit of the Avery County Airport/ Morrison Field

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	50 jobs
PAYROLL	$1,560,000
ECONOMIC OUTPUT	$4,880,000

AVERY COUNTY AIRPORT/MORRISON FIELD

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About CLT

Charlotte Douglas International Airport (CLT) is located in the City of Charlotte and the County of Mecklenburg in the south-central portion of the state. The airport is owned by the city and provides commercial airline and general aviation services to its patrons.

Associated County / City	Mecklenburg / Charlotte
Annual Operations (2013)	557,948
Number of Based Aircraft (2013)	92
Enplanements (2013)	21,346,601
Primary Runway	18C/36C
Dimensions	10,000 FT X 150 FT
Approach/Approach Lighting	Precision CAT II-III / ALSF2
Population Within 60-Min. Drive	2,139,289

Economic Benefit of the Charlotte Douglas Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	60,320 jobs
PAYROLL	$2,449,390,000
ECONOMIC OUTPUT	$12,465,270,000

CHARLOTTE DOUGLAS INTERNATIONAL

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2012	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	1,000 FT	1,000 FT	Yes
Runway Protection Zone (RPZ) Ownership	Partial	Fee Simple	No
Pavement Condition Index (PCI) - Primary RWY	100 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	Unknown (as of 2012)	PCI ≥ 75	N/A
Pavement Condition Index (PCI) - Taxiways	73 (as of 2012)	PCI ≥ 75	No
Runway Length	10,000 FT	6,500 FT	Yes
Runway Width	150 FT	150 FT	Yes
Pavement Strength	140,000lbs SW, 200,000lbs DW, 350,000lbs DT, 650,000lbs DDTW	Per Part 139 Pavement Requirements	Yes
Visual Navigational Aids	RB, LWS, PAPI-4	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	Yes
Runway Edge Lighting	HIRL	High Intensity Runway Lighting (HIRL)	Yes
Weather Reporting Capability	ASOS	AWOS IIIP	Yes
Standard Instrument Approach	PA, Runway Visual Range (RVR)	Precision Approach (PA), <250', < 3/4m	Yes
Parallel Taxiway	Full Parallel	Full Parallel	Yes
Aircraft Apron	N/A	20% Based Aircraft + 20% Busy Day Transient (GA) = 26 spaces	N/A
General Aviation Terminal Building	41,000 SF	Passenger Terminal-Not Eligible, GA Terminal Bldg/Parking per ALP	Yes
Taxiway & Apron Edge Lighting	High Intensity Taxiway Lighting (HITL)	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	RH, L, G, DR	Runway Hold Position (RHP), Location (L), Guidance (G), Distance Remaining (DR)	Yes
Ground Communication	RCO	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	MALSR	Approach Lighting System (ALS)	Yes
Aircraft Rescue and Firefighting (ARFF) Equipment	Yes	As required by Part 139	Yes

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

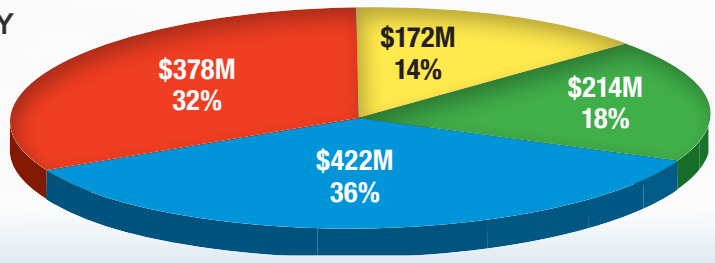
Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

As part of the NCASP, Charlotte-Monroe Executive Airport was classified as a Red Airport.

20-Year Costs for NCASP Recommended Projects

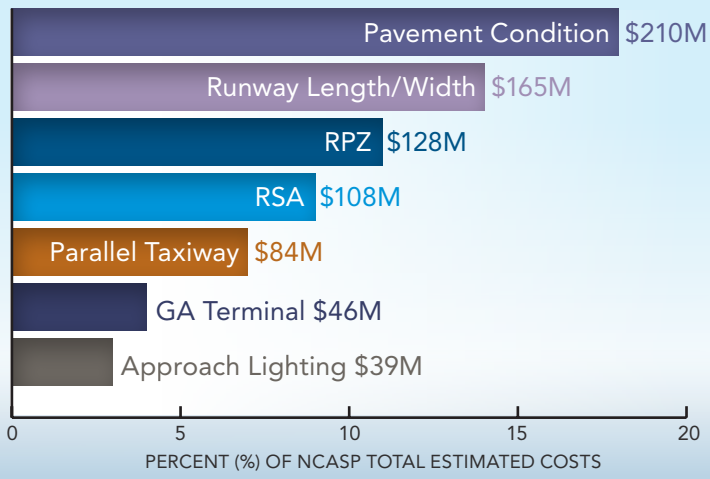
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

General Aviation Terminal Building	1,600 SF	3,200 SF	No
Taxiway & Apron Edge Lighting	Medium Intensity Taxiway Lighting (MITL)	Reflective Markers	Yes
Airfield Signage	RHP, G	Runway Hold Position (RHP), Location (L), Guidance (G)	No
Ground Communication	UNICOM	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	8 hangars	50% Based Aircraft = 14 hangars	No
Airfield Maintenance Equipment/Storage Bldg.	Equipment in storage	Approved Tractor/Building	Yes
Perimeter Fencing	Partial, 4'	8' Perimeter	No
Fuel Facilities	AvGas, Jet A, Self-Serve	Based on Demand	Yes

2015 INDIVIDUAL AIRPORT SUMMARY:

Concord Regional Airport

NORTH CAROLINA AIRPORTS SYSTEM PLAN

NCASP

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

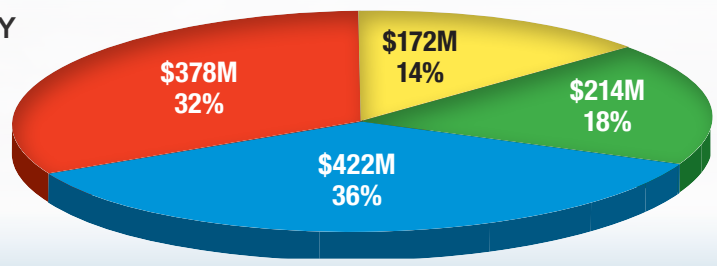
As part of the NCASP, Concord Regional Airport was classified as a **Yellow Airport.**

20-Year Costs for NCASP Recommended Projects

Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

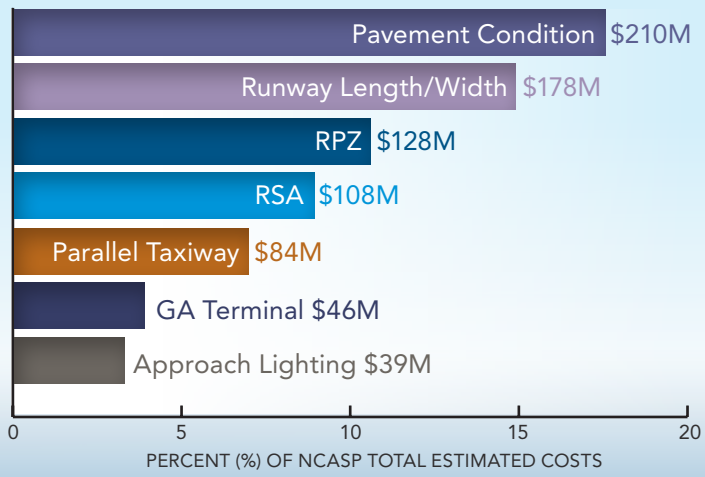
ESTIMATED COSTS BY AIRPORT GROUPING

- Yellow Airports
- Red Airports
- Blue Airports
- Green Airports



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About JQF

Concord Regional Airport (JQF) is located in the City of Concord and the County of Cabarrus in the southern portion of the state. The airport is owned by the city and provides commercial airline and general aviation services to its patrons.

Associated County / City	Cabarrus / Concord
Annual Operations (2014)	59,010
Number of Based Aircraft (2014)	158
Enplanements (2013)	12,183
Primary Runway	7,400 FT X 100 FT
Dimensions	Full Parallel
Approach/Approach Lighting	Precision / MALSR
Population Within 60-Min. Drive	2,228,473

Economic Benefit of the Concord Regional Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	1,980 jobs
PAYROLL	$73,650,000
ECONOMIC OUTPUT	$175,790,000

CONCORD REGIONAL AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2012	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	1,000 FT	1,000 FT	Yes
Runway Protection Zone (RPZ) Ownership	Complete	Fee Simple	Yes
Pavement Condition Index (PCI) - Primary RWY	86 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	82 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Taxiways	94 (as of 2012)	PCI ≥ 75	Yes
Runway Length	7,400 FT	6,500 FT	Yes
Runway Width	100 FT	150 FT	No
Pavement Strength	PCN: 37/F/C/X/T	Per Part 139 Pavement Requirements	Yes
Visual Navigational Aids	RB, LWS, PAPI-4	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	Yes
Runway Edge Lighting	HIRL	High Intensity Runway Lighting (HIRL)	Yes
Weather Reporting Capability	AWOS IIIPT	AWOS-IIIP	Yes
Standard Instrument Approach	PA, 200', 1/2 mile	Precision Approach (PA), <250', < 3/4m	Yes
Parallel Taxiway	Full Parallel	Full Parallel	Yes
Aircraft Apron	65 spaces	20% Based Aircraft + 20% Busy Day Transient (GA) = 46 spaces	Yes
General Aviation Terminal Building	12,000 SF	Passenger Terminal-Not Eligible, GA Terminal Bldg/Parking per ALP	Yes
Taxiway & Apron Edge Lighting	MITL	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	RHP, L, G, DR	Runway Hold Position (RHP), Location (L), Guidance (G), Distance Remaining (DR)	Yes
Ground Communication	RCO/Remote Transmitter/Receiver (RTR)	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	MALSR	Approach Lighting System (ALS)	Yes
Aircraft Rescue and Firefighting (ARFF) Equipment	Yes	As required by Part 139	Yes

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

Dimensions	5,004 FT X 100 FT
Taxiway	Full Parallel
Approach/Approach Lighting	Precision / None
Population Within 30-Min. Drive	647,152

Economic Benefit of the Davidson County Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	110 jobs
PAYROLL	$3,020,000
ECONOMIC OUTPUT	$10,320,000

DAVIDSON COUNTY AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2004	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	Non-Standard	1,000 FT	No
Runway Protection Zone (RPZ) Ownership	Complete	Fee Simple	No
Pavement Condition Index (PCI) - Primary RWY	77 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	86 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Taxiways	88 (as of 2012)	PCI ≥ 75	Yes
Runway Length	5,004 FT	6,000 FT	No
Runway Width	100 FT	100 FT	Yes
Pavement Strength	17,000 lbs SW 60,000lbs DW	> 60,000lbs SW or DW or Per PCN Analysis if Part 139	Yes
Visual Navigational Aids	RB, LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	No
Runway Edge Lighting	MIRL	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	AWOS IIIP	AWOS III	Yes
Standard Instrument Approach	Precision Approach (PA), 250', 7/8 mile	Instrument Approach with Vertical Guidance (APV), 250', 3/4m	No
Parallel Taxiway	Full Parallel	Full Parallel	Yes
Aircraft Apron	30 spaces	25% Based Aircraft + 20% Busy Day Transient = 20 spaces	Yes
General Aviation Terminal Building	2,856 SF	5,500 SF	No
Taxiway & Apron Edge Lighting	MITL	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	RHP, L, G	Runway Hold Position (RHP), Location (L), Guidance (G), Distance Remaining (DR)	Yes
Ground Communication	RCO	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	60 hangars	75% Based Aircraft = 57 hangars	Yes
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	Complete, 6' and 8' with barbed wire	8' Perimeter	No
Fuel Facilities	AvGas, Jet A	Based on Demand	Yes

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

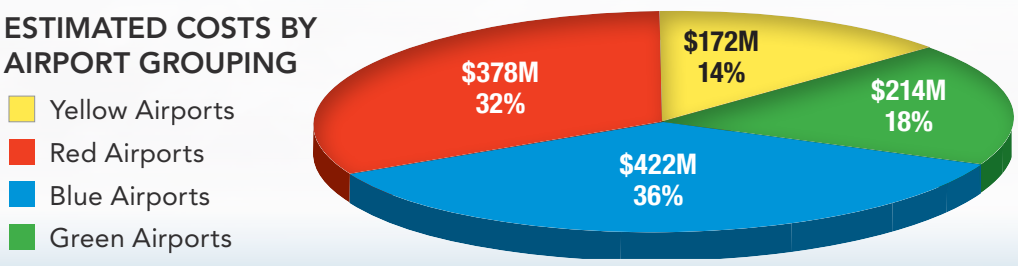
Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

As part of the NCASP, Duplin County Airport was classified as a Blue Airport.

20-Year Costs for NCASP Recommended Projects

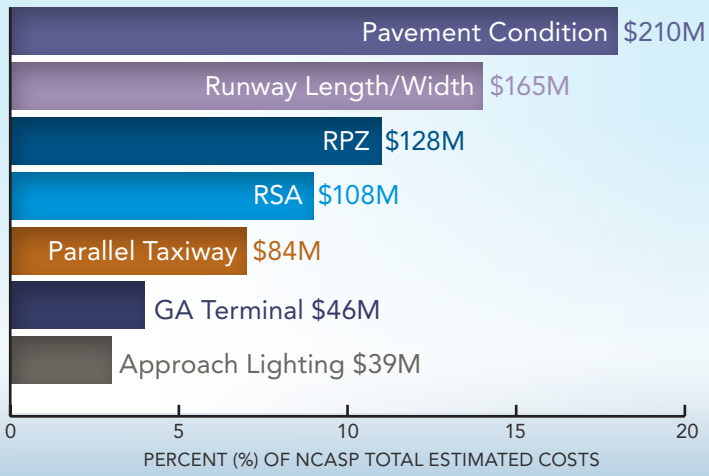
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About DPL

Duplin County Airport (DPL) is located in the City of Kenansville and the County of Duplin in the southeastern portion of the state. The airport is owned by the county and provides general aviation services to its patrons.

Associated County / City	Duplin / Kenansville
Annual Operations (2013)	17,500
Number of Based Aircraft (2013)	22
Primary Runway	05/23
Dimensions	6,002 FT X 75 FT
Taxiway	Full Parallel
Approach/Approach Lighting	RNAV LPV / None
Population Within 30-Min. Drive	49,086

NORTH CAROLINA AIRPORTS SYSTEM PLAN

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

Yellow Airport: + 6,500' RUNWAY	**Blue Airport:** + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	**Green Airport:** + 4,200' RUNWAY

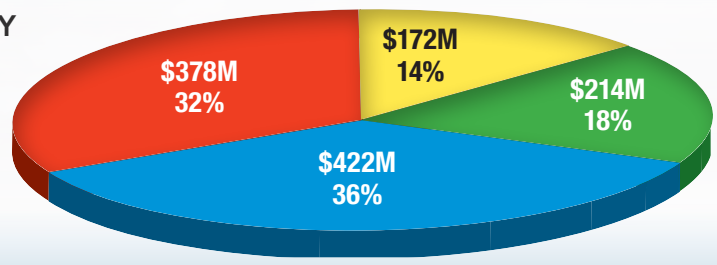
As part of the NCASP, First Flight Airport was classified as a Green Airport.

20-Year Costs for NCASP Recommended Projects

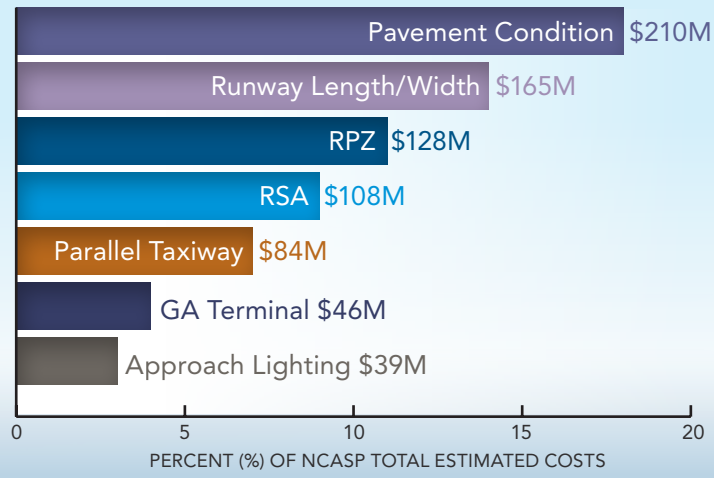
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About FFA

First Flight Airport (FFA) is located in the Town of Kill Devil Hills and the County of Dare in the central portion of the state. The airport is owned by the National Park Service and provides general aviation services to its patrons.

Associated County / City	Dare / Kill Devil Hills
Annual Operations (2013)	37,500
Number of Based Aircraft (2013)	0
Primary Runway	04/20
Dimensions	3,000 FT x 60 FT
Taxiway	Turnarounds on Both Ends
Approach/Approach Lighting	Visual / None
Population Within 30-Min. Drive	33,903

Economic Benefit of the First Flight Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	10 jobs
PAYROLL	$80,000
ECONOMIC OUTPUT	$3,780,000

FIRST FLIGHT AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2014	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	240 FT	240 FT	Yes
Runway Protection Zone (RPZ) Ownership	Partial	Fee Simple	No
Pavement Condition Index (PCI) - Primary RWY	95 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	89 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Taxiways	91 (as of 2012)	PCI ≥ 75	Yes
Runway Length	3,000 FT	4,200 FT	No
Runway Width	60 FT	75 FT	No
Pavement Strength	10,000lbs SW	< 30,000lbs SW or DW and > 12,500lbs SW or DW	No
Visual Navigational Aids	LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-2	No
Runway Edge Lighting	None	Medium Intensity Runway Lighting (MIRL)	No
Weather Reporting Capability	AWOS IIIP	AWOS III	Yes
Standard Instrument Approach	Visual	Instrument Approach with Vertical Guidance (APV), 400', 1m	No
Parallel Taxiway	Turnarounds on Both Ends	Full Parallel	No
Aircraft Apron	11 spaces	50% Based Aircraft + 20% Busy Day Transient = 5 spaces	Yes
General Aviation Terminal Building	1,500 SF	3,200 SF	No
Taxiway & Apron Edge Lighting	None	Reflective Markers	No
Airfield Signage	None	Runway Hold Position (RHP), Location (L), Guidance (G)	No
Ground Communication	UNICOM	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	0 hangars	50% Based Aircraft = 0 hangars	No
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	Partial, 4'	8' Perimeter	No
Fuel Facilities	None	Based on Demand	N/A

2015 INDIVIDUAL AIRPORT SUMMARY:

Foothills Regional Airport

NORTH CAROLINA AIRPORTS SYSTEM PLAN

NCASP

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

As part of the NCASP, Foothills Regional Airport was classified as a Blue Airport.

20-Year Costs for NCASP Recommended Projects

Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective. The NCASP recommends that, going forward, this airport be monitored for triggers that would support its transition from a Green to a Blue airport. With recent and continued projected economic growth in the area, aviation demands will also continue to grow and may eventually warrant a higher level of service from IXA. It is recommended that IXA consider development in order to meet those increased service demands.

Pavement Condition Index (PCI) - Taxiways	Greater than 75	PCI ≥ 75	Yes
Runway Length	5,000 FT	5,000 FT	Yes
Runway Width	75 FT	100 FT	No
Pavement Strength	60,000lbs DW, 45,000lbs SW	> 30,000lbs SW or DW and < 60,000lbs SW or DW or Per PCN Analysis if Part 139	Yes
Visual Navigational Aids	RB, LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	No
Runway Edge Lighting	MIRL	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	AWOS IIIP	AWOS III	Yes
Standard Instrument Approach	Area Navigation (RNAV) LPV, 279', 1 mile	Instrument Approach with Vertical Guidance (APV), 250', 3/4m	No
Parallel Taxiway	Full Parallel	Full Parallel	Yes
Aircraft Apron	30 spaces	25% Based Aircraft + 20% Busy Day Transient = 10 spaces	Yes
General Aviation Terminal Building	1,800 SF	4,500 SF	No
Taxiway & Apron Edge Lighting	MITL	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	RHP, L, G	Runway Hold Position (RHP), Location (L), Guidance (G)	Yes
Ground Communication	RCO	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	44 hangars	75% Based Aircraft = 13 hangars	Yes
Airfield Maintenance Equipment/Storage Bldg.	Equipment in storage	Approved Tractor/Building	Yes
Perimeter Fencing	Complete, 8'	8' Perimeter	Yes
Fuel Facilities	AvGas, Jet A, Self-Serve	Based on Demand	Yes

2015 INDIVIDUAL AIRPORT SUMMARY:

Henderson Field Airport

NORTH CAROLINA AIRPORTS SYSTEM PLAN

NCASP

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

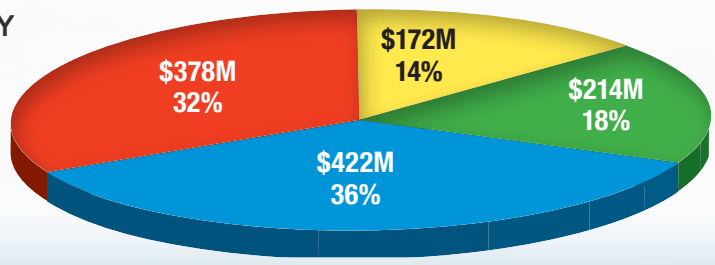
As part of the NCASP, Henderson Field Airport was classified as a Blue Airport.

20-Year Costs for NCASP Recommended Projects

Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

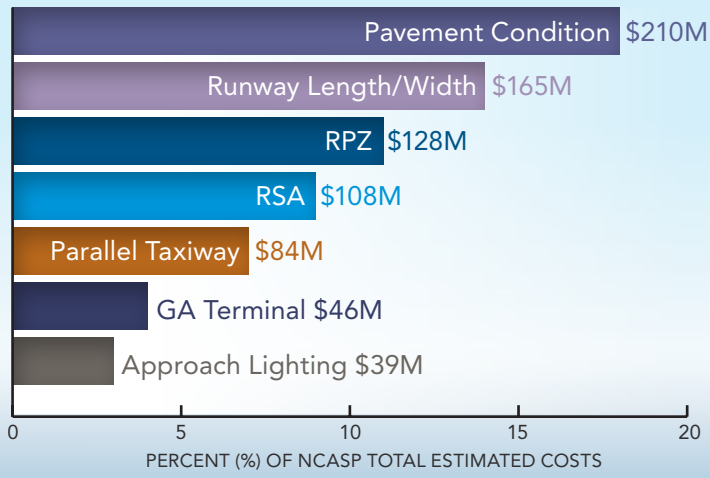
ESTIMATED COSTS BY AIRPORT GROUPING

- Yellow Airports
- Red Airports
- Blue Airports
- Green Airports



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

For more information on these studies or the NCASP, please visit: http://www.ncdot.gov/aviation/

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About ACZ

Henderson Field Airport (ACZ) is located in the Town of Wallace and the County of Pender in the eastern portion of the state. The airport is owned by the town and provides general aviation services to its patrons.

Associated County / City	Pender / Wallace
Annual Operations (2014)	15,900
Number of Based Aircraft (2014)	29
Primary Runway	09/27
Dimensions	4,153 FT X 75 FT
Taxiway	Stubs on Both Ends
Approach/Approach Lighting	RNAV (GPS) / None
Population Within 30-Min. Drive	59,147

Economic Benefit of the Henderson Field Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	20 jobs
PAYROLL	$380,000
ECONOMIC OUTPUT	$6,430,000

HENDERSON FIELD AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective. The NCASP recommends that, going forward, this airport be monitored for triggers that would support its transition from a Blue to a Red airport. With recent and continued projected economic growth in the area, aviation demands will also continue to grow and may eventually warrant a higher level of service from ACZ. It is recommended that ACZ consider development in order to meet those increased service demands.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2010	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	300 FT	300 FT	Yes

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About 24A

Jackson County Airport (24A) is located in the City of Sylva and the County of Jackson in the western portion of the state. The airport is owned by the county and provides general aviation services to its patrons.

Associated County / City	Jackson / Sylva
Annual Operations (2013)	4,650
Number of Based Aircraft (2013)	16
Primary Runway	15/33
Dimensions	3,200 FT X 60 FT
Taxiway	Stubs on Both Ends
Approach/Approach Lighting	RNAV (GPS) / None
Population Within 30-Min. Drive	61,706

Economic Benefit of the Jackson County Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	10 jobs
PAYROLL	$120,000
ECONOMIC OUTPUT	$430,000

JACKSON COUNTY AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2004	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	300 FT	300 FT	Yes
Runway Protection Zone (RPZ) Ownership	Complete	Fee Simple	Yes
Pavement Condition Index (PCI) - Primary RWY	86 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	86 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Taxiways	96 (as of 2012)	PCI ≥ 75	Yes
Runway Length	3,200 FT	4,200 FT	No
Runway Width	60 FT	75 FT	No
Pavement Strength	12,500lbs SW	< 30,000lbs SW or DW and > 12,500lbs SW or DW	Yes
Visual Navigational Aids	RB, LWS, PAPI-2, REILs	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-2	Yes
Runway Edge Lighting	MIRL	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	SUPERAWOS	AWOS III	No
Standard Instrument Approach	RNAV (GPS), 1,700', 1 1/4 mile	Instrument Approach with Vertical Guidance (APV), 400', 1m	No
Parallel Taxiway	Stubs on Both Ends	Full Parallel	No
Aircraft Apron	16 spaces	50% Based Aircraft + 20% Busy Day Transient = 9 spaces	Yes
General Aviation Terminal Building	600 SF	3,200 SF	No
Taxiway & Apron Edge Lighting	Medium Intensity Taxiway Lighting (MITL)	Reflective Markers	Yes
Airfield Signage	RHP, L	Runway Hold Position (RHP), Location (L), Guidance (G)	No
Ground Communication	UNICOM	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	9 hangars	50% Based Aircraft = 8 hangars	Yes
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	Partial, 6' and 8'	8' Perimeter	No
Fuel Facilities	AvGas, Self-Serve	Based on Demand	Yes

2015 INDIVIDUAL AIRPORT SUMMARY:

Johnston Regional Airport

NORTH CAROLINA AIRPORTS SYSTEM PLAN

NCASP

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

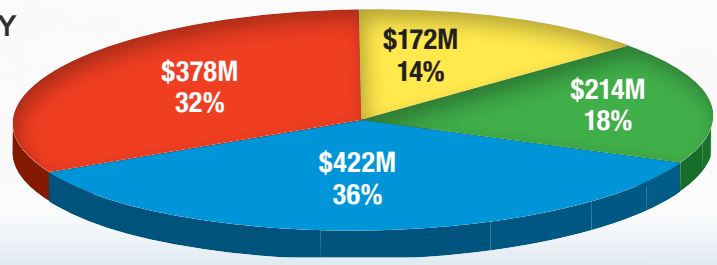
Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

As part of the NCASP, Johnston Regional Airport was classified as a Red Airport.

20-Year Costs for NCASP Recommended Projects

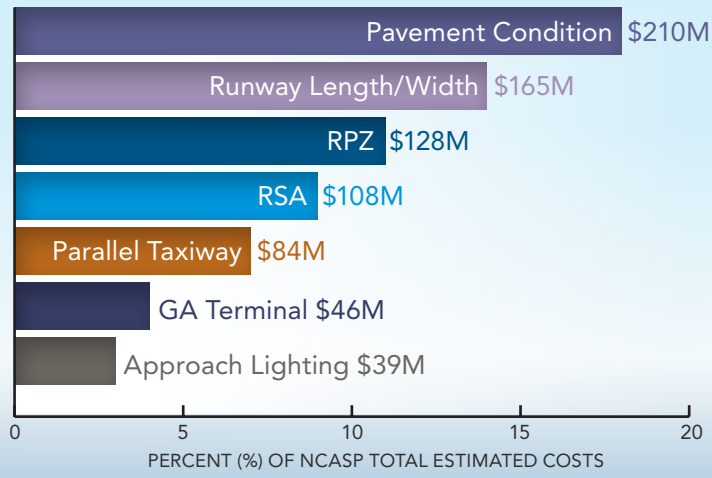
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

About ISO

Kinston Regional Jetport at Stallings Field (ISO) is located in the City of Kinston and the County of Lenoir in the eastern portion of the state. The airport is a division of the North Carolina DOT, under supervision of the secretary. The airport is located within the Global Trans Park*

Associated County / City	Lenoir / Kinston
Annual Operations (2013)	21,596
Number of Based Aircraft (2013)	39
Primary Runway	05/23
Dimensions	11,500 FT X 150 FT
Taxiway	Full Parallel
Approach/Approach Lighting	Precision / MALSR
Population Within 30-Min. Drive	117,833

**Additionally, about 1/2 of the airport's traffic is military-related from Seymour Johnson AFB and the airport provides military training on site.*

Economic Benefit of the Kinston Regional Jetport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	1,230 jobs
PAYROLL	$46,340,000
ECONOMIC OUTPUT	$219,370,000

Some specific economic benefits at ISO include its industrial park with direct access by rail and highway as well as the active Foreign Trade Zone (FTZ – 214) that serves the airport.

Visual Navigational Aids	RB, LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	No
Runway Edge Lighting	MIRL	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	AWOS IIIP	AWOS III	Yes
Standard Instrument Approach	Area Navigation (RNAV) LPV, 315', 1 1/4 mile	Instrument Approach with Vertical Guidance (APV), 250', 3/4m	No
Parallel Taxiway	Full Parallel	Full Parallel	Yes
Aircraft Apron	45 spaces	25% Based Aircraft + 20% Busy Day Transient = 29 spaces	Yes
General Aviation Terminal Building	7,000 SF	4,500 SF	Yes
Taxiway & Apron Edge Lighting	MITL	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	RHP, L, G	Runway Hold Position (RHP), Location (L), Guidance (G)	Yes
Ground Communication	GCO	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	49 hangars	75% Based Aircraft = 67 hangars	No
Airfield Maintenance Equipment/Storage Bldg.	Equipment in storage	Approved Tractor/Building	Yes
Perimeter Fencing	Partial, 6' with barbed wire	8' Perimeter	No
Fuel Facilities	AvGas, Jet A	Based on Demand	Yes

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

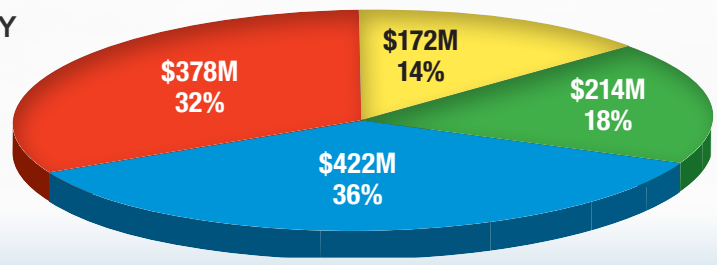
Yellow Airport: + 6,500' RUNWAY	**Blue Airport:** + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	**Green Airport:** + 4,200' RUNWAY

As part of the NCASP, Lumberton Regional Airport was classified as a Blue Airport.

20-Year Costs for NCASP Recommended Projects

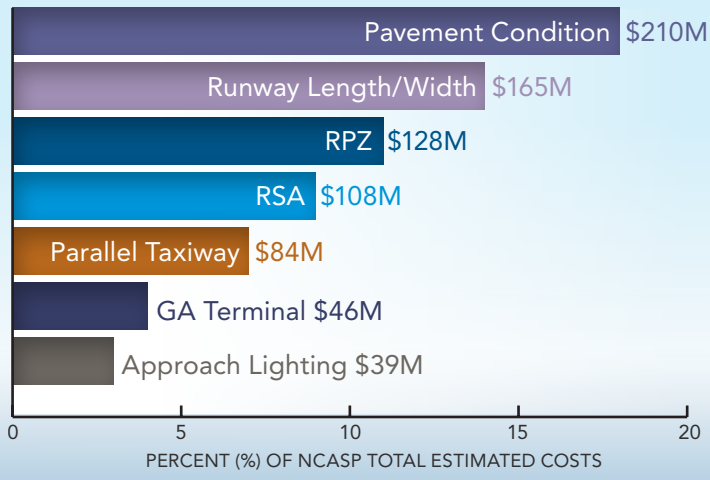
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About LBT

Lumberton Regional Airport (LBT) is located in the City of Lumberton and the County of Robeson in the southern portion of the state. The airport is owned by the city and provides general aviation services to its patrons.

Associated County / City	Robeson / Lumberton
Annual Operations (2013)	25,000
Number of Based Aircraft (2013)	51
Primary Runway	05/23
Dimensions	5,502 FT X 150 FT
Taxiway	Partial Parallel
Approach/Approach Lighting	Precision / None
Population Within 30-Min. Drive	161,853

Economic Benefit of the Lumberton Regional Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	40 jobs
PAYROLL	$740,000
ECONOMIC OUTPUT	$6,100,000

LUMBERTON REGIONAL AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2003	ALP Completed/Updated Within Last 10 Years	No
Runway Safety Area (RSA)	1,000 FT	1,000 FT	Yes
Runway Protection Zone (RPZ) Ownership	Partial	Fee Simple	No
Pavement Condition Index (PCI) - Primary RWY	90 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	54 (as of 2012)	PCI ≥ 75	No
Pavement Condition Index (PCI) - Taxiways	58 (as of 2012)	PCI ≥ 75	No
Runway Length	5,502 FT	5,000 FT	Yes
Runway Width	150 FT	100 FT	Yes
Pavement Strength	80,000lbs SW	> 30,000lbs SW or DW and < 60,000lbs SW or DW or Per PCN Analysis if Part 139	Yes
Visual Navigational Aids	RB, LWS, PAPI-4	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	Yes
Runway Edge Lighting	MIRL	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	ASOS	AWOS III	Yes
Standard Instrument Approach	Precision Approach (PA), 236', 3/4 mile	Instrument Approach with Vertical Guidance (APV), 250', 3/4m	Yes
Parallel Taxiway	Partial Parallel	Full Parallel	No
Aircraft Apron	26 spaces	25% Based Aircraft + 20% Busy Day Transient = 16 spaces	Yes
General Aviation Terminal Building	3,744 SF	4,500 SF	No
Taxiway & Apron Edge Lighting	MITL	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	L, G	Runway Hold Position (RHP), Location (L), Guidance (G)	No
Ground Communication	UNICOM	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	36 hangars	75% Based Aircraft = 35 hangars	Yes
Airfield Maintenance Equipment/Storage Bldg.	Vehicle, Equipment in storage	Approved Tractor/Building	Yes
Perimeter Fencing	Partial, 6' and 4'	8' Perimeter	No
Fuel Facilities	AvGas, Jet A, Self-Serve	Based on Demand	Yes

Taxiway	Turnaround and Connector Ends
Approach/Approach Lighting	Visual / None
Population Within 30-Min. Drive	101,404

Economic Benefit of the Montgomery County Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	10 jobs
PAYROLL	$240,000
ECONOMIC OUTPUT	$1,410,000

MONTGOMERY COUNTY AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2005	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	240 FT	240 FT	Yes
Runway Protection Zone (RPZ) Ownership	Partial	Fee Simple	No
Pavement Condition Index (PCI) - Primary RWY	100 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	99 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Taxiways	97 (as of 2012)	PCI ≥ 75	Yes
Runway Length	4,002 FT	4,200 FT	No
Runway Width	75 FT	75 FT	Yes
Pavement Strength	20,000lbs SW	< 30,000lbs SW or DW and > 12,500lbs SW or DW	Yes
Visual Navigational Aids	RB, LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-2	Yes
Runway Edge Lighting	MIRL	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	None	AWOS III	No
Standard Instrument Approach	Visual	Instrument Approach with Vertical Guidance (APV), 400', 1m	No
Parallel Taxiway	Turnaround and Connector Ends	Full Parallel	No
Aircraft Apron	19 spaces	50% Based Aircraft + 20% Busy Day Transient = 9 spaces	Yes
General Aviation Terminal Building	Unknown Size	3,200 SF	No
Taxiway & Apron Edge Lighting	Medium Intensity Taxiway Lighting (MITL)	Reflective Markers	Yes
Airfield Signage	RHP	Runway Hold Position (RHP), Location (L), Guidance (G)	No
Ground Communication	Remote Transmitter/Receiver (RTR)	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	9 hangars	50% Based Aircraft = 8 hangars	Yes
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	None	8' Perimeter	No
Fuel Facilities	AvGas	Based on Demand	Yes

2015 INDIVIDUAL AIRPORT SUMMARY:

Moore County Airport

NORTH CAROLINA AIRPORTS SYSTEM PLAN

NCASP

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

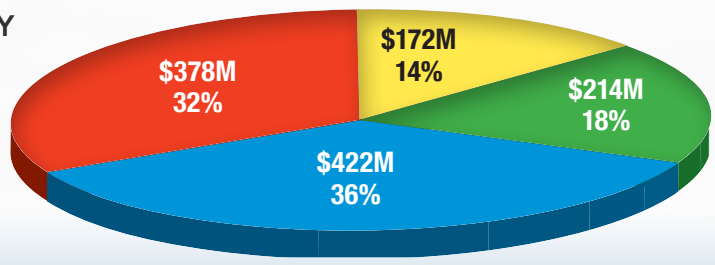
As part of the NCASP, Moore County Airport was classified as a Red Airport.

20-Year Costs for NCASP Recommended Projects

Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

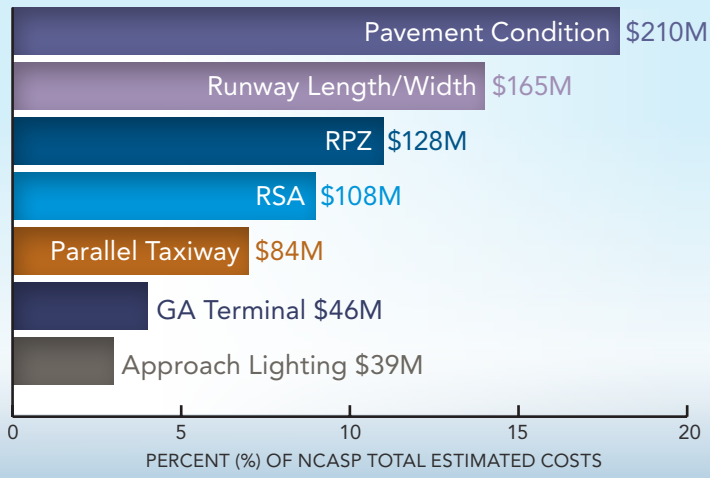
ESTIMATED COSTS BY AIRPORT GROUPING

- Yellow Airports
- Red Airports
- Blue Airports
- Green Airports



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About SOP

Moore County Airport (SOP) is located between the cities of Southern Pines and Pinehurst and the County of Moore in the central portion of the state. The airport is owned by the county and provides general aviation services to its patrons.

Associated County / City	Moore / Pinehurst / Southern Pines
Annual Operations (2013)	12,250
Number of Based Aircraft (2014)	100
Primary Runway	05/23
Dimensions	6,502 FT X 150 FT
Taxiway	Full Parallel
Approach/Approach Lighting	Precision / MALSR
Population Within 30-Min. Drive	117,330

Perimeter Fencing	Partial, 4' and 5'	8' Perimeter	No
Fuel Facilities	AvGas, Jet A, Self-Serve	Based on Demand	Yes

*Reflects the effects of recent apron improvements at the airport

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

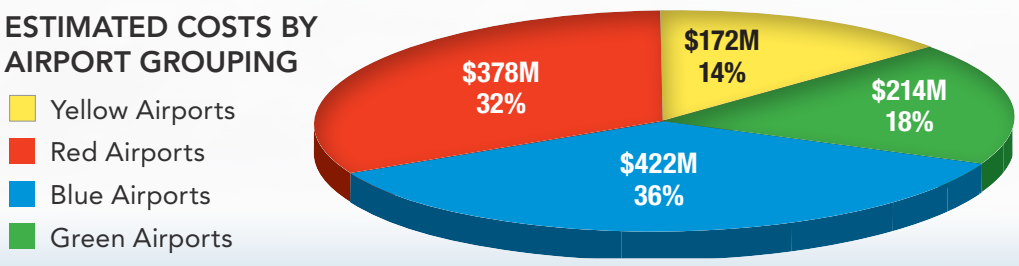
Yellow Airport: + 6,500' RUNWAY	**Blue Airport:** + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	**Green Airport:** + 4,200' RUNWAY

As part of the NCASP, Ocracoke Island Airport was classified as a Green Airport.

20-Year Costs for NCASP Recommended Projects

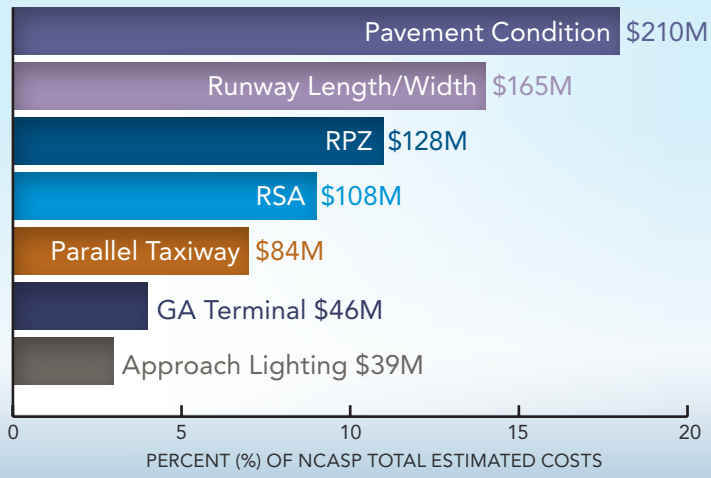
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About W95

Ocracoke Island Airport (W95) is located in the City of Ocracoke and the County of Hyde in the eastern portion of the state. The airport is owned by the National Park Service and provides general aviation services to its patrons.

Associated County / City	Hyde / Ocracoke
Annual Operations (2013)	6,110
Number of Based Aircraft (2013)	0
Primary Runway	06/24
Dimensions	2,999 FT X 60 FT
Taxiway	Turnarounds on Both Ends
Approach/Approach Lighting	LNAV / None
Population Within 30-Min. Drive	948

Economic Benefit of the Ocracoke Island Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	20 jobs
PAYROLL	$290,000
ECONOMIC OUTPUT	$1,930,000

OCRACOKE ISLAND AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2013	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	240 FT	240 FT	Yes
Runway Protection Zone (RPZ) Ownership	Partial	Fee Simple	No
Pavement Condition Index (PCI) - Primary RWY	66 (as of 2012)	PCI ≥ 75	No
Pavement Condition Index (PCI) - Apron	64 (as of 2012)	PCI ≥ 75	No
Pavement Condition Index (PCI) - Taxiways	64 (as of 2012)	PCI ≥ 75	No
Runway Length	2,999 FT	4,200 FT	No
Runway Width	60 FT	75 FT	No
Pavement Strength	30,000lbs SW	< 30,000lbs SW or DW and > 12,500lbs SW or DW	Yes
Visual Navigational Aids	RB, LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-2	Yes
Runway Edge Lighting	None	Medium Intensity Runway Lighting (MIRL)	No
Weather Reporting Capability	None	AWOS III	No
Standard Instrument Approach	Laternal Navigation (LNAV), 495', 1 mile	Instrument Approach with Vertical Guidance (APV), 400', 1m	No
Parallel Taxiway	Turnarounds on Both Ends	Full Parallel	No
Aircraft Apron	23 spaces	50% Based Aircraft + 20% Busy Day Transient = 1 space	Yes
General Aviation Terminal Building	10,000 SF	3,200 SF	Yes
Taxiway & Apron Edge Lighting	None	Reflective Markers	No
Airfield Signage	None	Runway Hold Position (RHP), Location (L), Guidance (G)	No
Ground Communication	UNICOM	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	0 hangars	50% Based Aircraft = 0 hangars	No
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	Partial, 4'	8' Perimeter	No
Fuel Facilities	None	Based on Demand	N/A

Runway Length	6,505 FT	6,500 FT	Yes
Runway Width	150 FT	150 FT	Yes
Pavement Strength	59,000lbs SW 95,000lbs DW	Per Part 139 Pavement Requirements	Yes
Visual Navigational Aids	RB, LWS, PAPI-4	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	Yes
Runway Edge Lighting	HIRL	High Intensity Runway Lighting (HIRL)	Yes
Weather Reporting Capability	AWOS IIIPT	AWOS IIIP	Yes
Standard Instrument Approach	PA, 294', 3/4 mile	Precision Approach (PA), <250', < 3/4m	No
Parallel Taxiway	Full Parallel	Full Parallel	Yes
Aircraft Apron	43 spaces	20% Based Aircraft + 20% Busy Day Transient (GA) = 16 spaces	Yes
General Aviation Terminal Building	20,000 SF	Passenger Terminal-Not Eligible, GA Terminal Bldg/Parking per ALP	Yes
Taxiway & Apron Edge Lighting	MITL	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	RHP, L, G, DR	Runway Hold Position (RHP), Location (L), Guidance (G), Distance Remaining (DR)	Yes
Ground Communication	RCO	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	MALSR	Approach Lighting System (ALS)	Yes
Aircraft Rescue and Firefighting (ARFF) Equipment	Yes	As required by Part 139	Yes

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

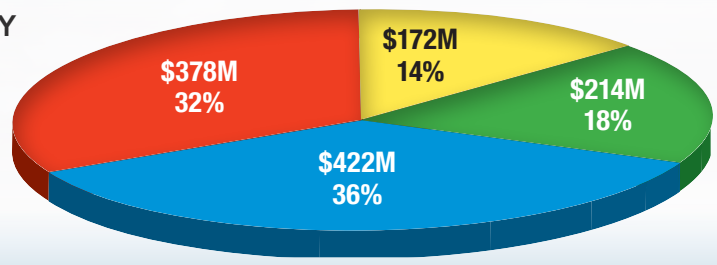
Yellow Airport: + 6,500' RUNWAY	**Blue Airport:** + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	**Green Airport:** + 4,200' RUNWAY

As part of the NCASP, Plymouth Municipal Airport was classified as a Green Airport.

20-Year Costs for NCASP Recommended Projects

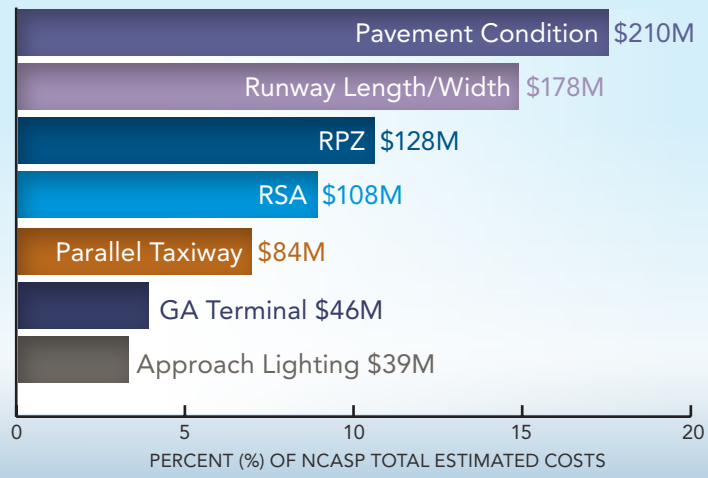
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About PMZ

Plymouth Municipal Airport (PMZ) is located in the City of Plymouth and the County of Washington in the eastern portion of the state. The airport is owned by the county and provides general aviation services to its patrons.

Associated County / City	Washington / Plymouth
Annual Operations (2013)	13,275
Number of Based Aircraft (2013)	13
Primary Runway	03/21
Dimensions	5,500 FT X 75 FT
Taxiway	Turnaround Ends
Approach/Approach Lighting	LP / None
Population Within 30-Min. Drive	29,675

Economic Benefit of the Plymouth Municipal Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	20 jobs
PAYROLL	$270,000
ECONOMIC OUTPUT	$1,930,000

PLYMOUTH MUNICIPAL AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2010	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	1,000 FT	1,000 FT	Yes
Runway Protection Zone (RPZ) Ownership	Partial	Fee Simple	No
Pavement Condition Index (PCI) - Primary RWY	95 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	98 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Taxiways	90 (as of 2012)	PCI ≥ 75	Yes
Runway Length	5,500 FT	4,200 FT	Yes
Runway Width	75 FT	75 FT	Yes
Pavement Strength	60,000lbs SW	< 30,000lbs SW or DW and > 12,500lbs SW or DW	Yes
Visual Navigational Aids	RB, LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-2	Yes
Runway Edge Lighting	Medium Intensity Runway Lighting (MIRL)	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	None	AWOS III	No
Standard Instrument Approach	Localizer Performance (LP), 404', 1 mile	Instrument Approach with Vertical Guidance (APV), 400', 1m	No
Parallel Taxiway	Turnaround Ends	Full Parallel	No
Aircraft Apron	14 spaces	50% Based Aircraft + 20% Busy Day Transient = 7 spaces	Yes
General Aviation Terminal Building	2,500 SF	3,200 SF	No
Taxiway & Apron Edge Lighting	High Intensity Taxiway Lighting (HITL)	Reflective Markers	Yes
Airfield Signage	L, G	Runway Hold Position (RHP), Location (L), Guidance (G)	No
Ground Communication	UNICOM	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	10 hangars	50% Based Aircraft = 6 hangars	Yes
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	None	8' Perimeter	No
Fuel Facilities	AvGas, Jet A, Self-Serve	Based on Demand	Yes

About SIF

Rockingham County NC Shiloh Airport (SIF) is located in the City of Reidsville and the County of Rockingham in the northern portion of the state. The airport is owned by the county and provides general aviation services to its patrons.

Associated County / City	Rockingham / Reidsville
Annual Operations (2014)	24,100
Number of Based Aircraft (2014)	61
Primary Runway	13/31
Dimensions	5,199 FT X 100 FT
Taxiway	Full Parallel
Approach/Approach Lighting	LNAV / None
Population Within 30-Min. Drive	109,479

Economic Benefit of the Rockingham County NC Shiloh Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	10 jobs
PAYROLL	$310,000
ECONOMIC OUTPUT	$3,860,000

ROCKINGHAM COUNTY NC SHILOH AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	1999	ALP Completed/Updated Within Last 10 Years	No
Runway Safety Area (RSA)	300 FT	300 FT	Yes
Runway Protection Zone (RPZ) Ownership	Complete	Fee Simple	Yes
Pavement Condition Index (PCI) - Primary RWY	80 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	83 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Taxiways	79 (as of 2012)	PCI ≥ 75	Yes
Runway Length	5,199 FT	5,000 FT	Yes
Runway Width	100 FT	100 FT	Yes
Pavement Strength	12,500lbs SW 24,000lbs DW	> 30,000lbs SW or DW and < 60,000lbs SW or DW or Per PCN Analysis if Part 139	No
Visual Navigational Aids	RB, LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	No
Runway Edge Lighting	High Intensity Runway Lighting (HIRL)	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	AWOS IIIP	AWOS III	Yes
Standard Instrument Approach	Lateral Navigation (LNAV), 392', 1 mile	Instrument Approach with Vertical Guidance (APV), 250', 3/4m	No
Parallel Taxiway	Full Parallel	Full Parallel	Yes
Aircraft Apron	18 spaces	50% Based Aircraft + 20% Busy Day Transient = 16 spaces	Yes
General Aviation Terminal Building	3,600 SF	4,500 SF	No
Taxiway & Apron Edge Lighting	MITL (LED)	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	RHP, L, G	Runway Hold Position (RHP), Location (L), Guidance (G)	Yes
Ground Communication	Remote Transmitter/Receiver (RTR)	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	Yes	Case by Case	Yes
Hangars	53 hangars	50% Based Aircraft = 38 hangars	Yes
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	Partial, 6'	8' Perimeter	No
Fuel Facilities	AvGas, Jet A, Self-Serve	Based on Demand	Yes

2015 INDIVIDUAL AIRPORT SUMMARY:

Rocky Mount - Wilson Regional Airport

NORTH CAROLINA AIRPORTS SYSTEM PLAN

NCASP

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

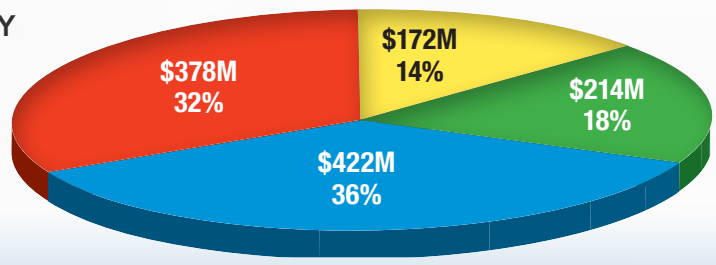
Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

As part of the NCASP, Rocky Mount-Wilson Regional Airport was classified as a Red Airport.

20-Year Costs for NCASP Recommended Projects

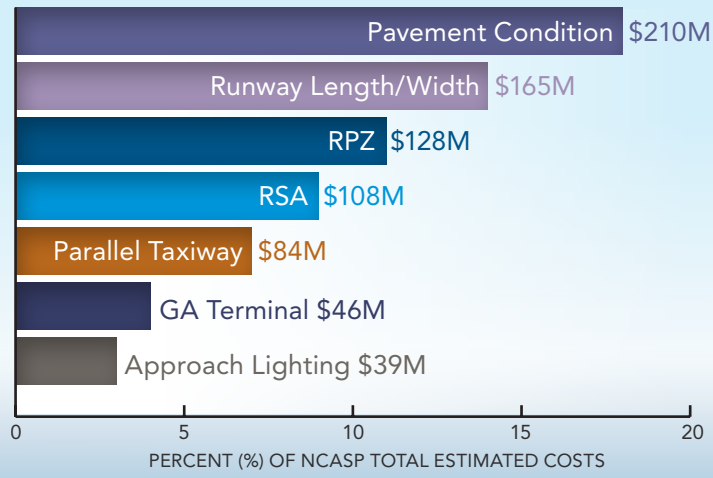
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About RWI

Rocky Mount - Wilson Regional Airport (RWI) is located near the Town of Elm City and serves Nash, Edgecombe, and Wilson counties. The airport is owned by the cities of Rocky Mount and Wilson and the counties of Nash, Edgecombe and Wilson. The airport provides general aviation and business aviation services to its communities.

Associated County / City	Nash, Edgecombe, and Wilson / Rocky Mount and Wilson
Annual Operations (2014)	29,844
Number of Based Aircraft (2014)	14
Primary Runway	04/22
Dimensions	7,099 FT X 150 FT
Taxiway	Full Parallel
Approach/Approach Lighting	Precision / MALSR
Population Within 30-Min. Drive	247,109

Economic Benefit of the Rocky Mount-Wilson Regional Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	140 jobs
PAYROLL	$4,850,000
ECONOMIC OUTPUT	$19,100,000

ROCKY MOUNT-WILSON REGIONAL AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2003	ALP Completed/Updated Within Last 10 Years	No
Runway Safety Area (RSA)	Non-Standard	1,000 FT	No
Runway Protection Zone (RPZ) Ownership	Complete	Fee Simple	Yes
Pavement Condition Index (PCI) - Primary RWY	69 (as of 2012)	PCI ≥ 75	No
Pavement Condition Index (PCI) - Apron	80 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Taxiways	76 (as of 2012)	PCI ≥ 75	Yes
Runway Length	7,099 FT	6,000 FT	Yes
Runway Width	150 FT	100 FT	Yes
Pavement Strength	62,000lbs SW 75,000lbs DW 140,000lbs DT	> 60,000lbs SW or DW or Per PCN Analysis if Part 139	Yes
Visual Navigational Aids	RB, LWS, PAPI-4	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	Yes
Runway Edge Lighting	High Intensity Runway Lighting (HIRL)	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	ASOS	AWOS III	Yes
Standard Instrument Approach	Precision Approach (PA), 250', 3/4 mile	Instrument Approach with Vertical Guidance (APV), 250', 3/4m	Yes
Parallel Taxiway	Full Parallel	Full Parallel	Yes
Aircraft Apron	50 spaces	25% Based Aircraft + 20% Busy Day Transient = 10 spaces	Yes
General Aviation Terminal Building	8,000 SF	5,500 SF	Yes
Taxiway & Apron Edge Lighting	MITL	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	RHP, L, G, DR	Runway Hold Position (RHP), Location (L), Guidance (G), Distance Remaining (DR)	Yes
Ground Communication	RCO	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	MALSR	Approach Lighting System (ALS)	Yes
Aircraft Rescue and Firefighting (ARFF) Equipment	Yes	Case by Case	Yes
Hangars	10 hangars	75% Based Aircraft = 9 hangars	Yes
Airfield Maintenance Equipment/Storage Bldg.	Vehicle, Equipment in storage	Approved Tractor/Building	Yes
Perimeter Fencing	Complete, 6' and 8' with 3 strand barbed wire	8' Perimeter	No
Fuel Facilities	AvGas, Jet A	Based on Demand	Yes

Hangars	10 hangars	75% Based Aircraft = 26 hangars	No
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	Partial, 6' and 7'	8' Perimeter	No
Fuel Facilities	AvGas, Jet A, Self-Serve	Based on Demand	Yes

2015 INDIVIDUAL AIRPORT SUMMARY:

Siler City Municipal Airport

NORTH CAROLINA AIRPORTS SYSTEM PLAN

NCASP

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

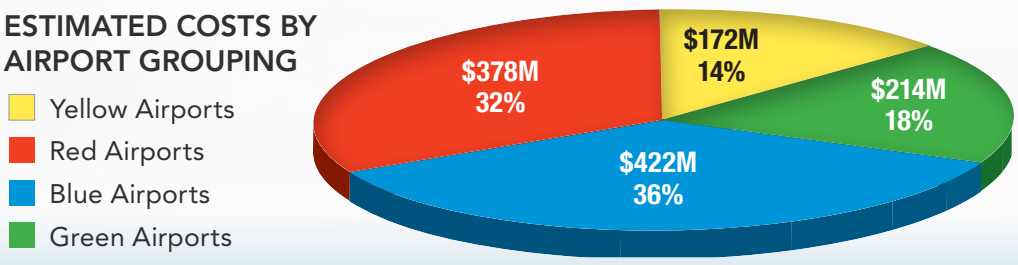
Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

As part of the NCASP, Siler City Municipal Airport was classified as a Blue Airport.

20-Year Costs for NCASP Recommended Projects

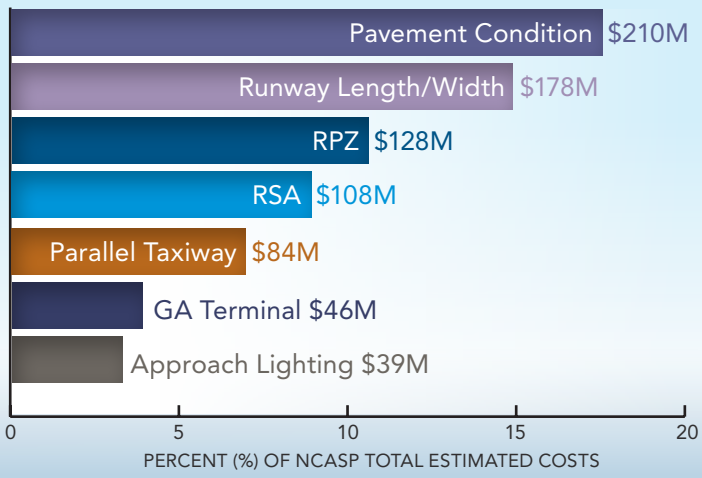
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About SCR

Siler City Municipal Airport (SCR, formerly 5W8) is located in the Town of Siler City and the County of Chatham in the central portion of the state. The airport is owned by the town and provides general aviation services to its patrons.

Associated County / City	Chatham / Siler City
Annual Operations (2014)	20,500
Number of Based Aircraft (2014)	30
Primary Runway	04/22
Dimensions	5,000 FT X 75 FT
Taxiway	Turnarounds on Both Ends
Approach/Approach Lighting	RNAV (GPS) / None
Population Within 30-Min. Drive	90,238

Economic Benefit of the Siler City Municipal Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	20 jobs
PAYROLL	$680,000
ECONOMIC OUTPUT	$8,730,000

SILER CITY MUNICIPAL AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	1999	ALP Completed/Updated Within Last 10 Years	No
Runway Safety Area (RSA)	300 FT	300 FT	Yes
Runway Protection Zone (RPZ) Ownership	Complete	Fee Simple	Yes
Pavement Condition Index (PCI) - Primary RWY	60 (as of 2012)	PCI ≥ 75	No
Pavement Condition Index (PCI) - Apron	71 (as of 2012)	PCI ≥ 75	No
Pavement Condition Index (PCI) - Taxiways	60 (as of 2012)	PCI ≥ 75	No
Runway Length	5,000 FT	5,000 FT	Yes
Runway Width	75 FT	100 FT	No
Pavement Strength	25,000lbs SW	> 30,000lbs SW or DW and < 60,000lbs SW or DW or Per PCN Analysis if Part 139	No
Visual Navigational Aids	RB, LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	No
Runway Edge Lighting	MIRL	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	AWOS IIIP	AWOS III	Yes
Standard Instrument Approach	RNAV (GPS), 339', 1m	Instrument Approach with Vertical Guidance (APV), 250', 3/4m	No
Parallel Taxiway	Turnarounds on Both Ends	Full Parallel	No
Aircraft Apron	33 spaces	25% Based Aircraft + 20% Busy Day Transient = 13 spaces	Yes
General Aviation Terminal Building	2,500 SF	4,500 SF	No
Taxiway & Apron Edge Lighting	MITL	Medium Intensity Taxiway Lighting (MITL)	Yes
Airfield Signage	None	Runway Hold Position (RHP), Location (L), Guidance (G)	No
Ground Communication	UNICOM	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	11 hangars	75% Based Aircraft = 21 hangars	No
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	Complete, 4'	8' Perimeter	No
Fuel Facilities	AvGas, Jet A, Self-Serve	Based on Demand	Yes

TARBORO-EDGECOMBE AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2006	ALP Completed/Updated Within Last 10 Years	Yes
Runway Safety Area (RSA)	240 FT	240 FT	Yes
Runway Protection Zone (RPZ) Ownership	Partial	Fee Simple	No
Pavement Condition Index (PCI) - Primary RWY	81 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	86 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Taxiways	94 (as of 2012)	PCI ≥ 75	Yes
Runway Length	3,999 FT	4,200 FT	No
Runway Width	60 FT	75 FT	No
Pavement Strength	12,500lbs SW	< 30,000lbs SW or DW and > 12,500lbs SW or DW	Yes
Visual Navigational Aids	RB, LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-2	Yes
Runway Edge Lighting	MIRL	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	AWOS IIIP	AWOS III	Yes
Standard Instrument Approach	Non-Precision, 710', 1 mile	Instrument Approach with Vertical Guidance (APV), 400', 1m	No
Parallel Taxiway	Turnaround and Connector Ends	Full Parallel	No
Aircraft Apron	9 spaces	50% Based Aircraft + 20% Busy Day Transient = 2 spaces	Yes
General Aviation Terminal Building	300 SF	3,200 SF	No
Taxiway & Apron Edge Lighting	None	Reflective Markers	No
Airfield Signage	L, G	Runway Hold Position (RHP), Location (L), Guidance (G)	No
Ground Communication	Common Traffic Advisory Frequency (CTAF)	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	No
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	3 hangars	50% Based Aircraft = 1 hangar	Yes
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	Partial, 8'	8' Perimeter	No
Fuel Facilities	None	Based on Demand	N/A

2015 INDIVIDUAL AIRPORT SUMMARY:

Triangle North Executive Airport

NORTH CAROLINA AIRPORTS SYSTEM PLAN

NCASP

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

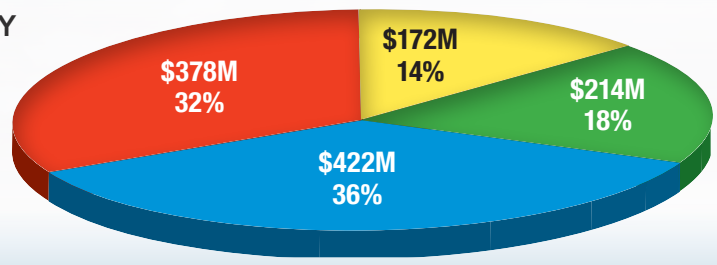
Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

As part of the NCASP, Triangle North Executive Airport was classified as a Blue Airport.

20-Year Costs for NCASP Recommended Projects

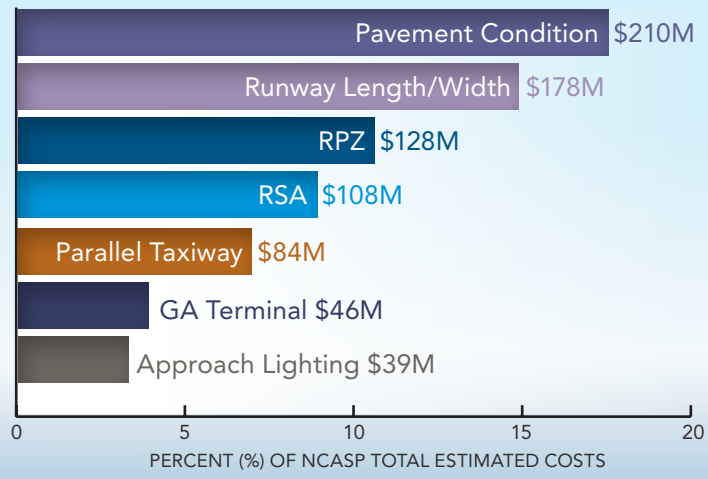
Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

ESTIMATED COSTS BY AIRPORT GROUPING



NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About LHZ

Triangle North Executive Airport (LHZ) is located in the City of Louisburg and the County of Franklin in the northern portion of the state. The airport is owned by the county and provides general aviation services to its patrons.

Associated County / City	Franklin / Louisburg
Annual Operations (2013)	62,800
Number of Based Aircraft (2013)	117
Primary Runway	05/23
Dimensions	5,500 FT X 100 FT
Taxiway	Full Parallel
Approach/Approach Lighting	Precision / MALSR
Population Within 30-Min. Drive	226,981

Economic Benefit of the Triangle North Executive Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	160 jobs
PAYROLL	$5,640,000
ECONOMIC OUTPUT	$23,840,000

TRIANGLE NORTH EXECUTIVE AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?

NCASP
NORTH CAROLINA AIRPORTS SYSTEM PLAN

DIVISION OF AVIATION
NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

The North Carolina Airport System

The North Carolina Airport System consists of 72 public-use airports that serve the aviation needs of North Carolina residents and visitors. Ten of these airports provide commercial airline service and the remainder are general aviation airports. The existing system is well-rounded and accessible. Currently, 94% of the state's population resides within 30 minutes of a system airport and 89% of the population lives within 60 minutes of an airport that provides commercial airline service. Similarly, 98% of North Carolina businesses or employment centers are within a 30-minute drive to a system airport.

As future development and economic opportunities arise, expansion and updates to the system's services and coverage are needed to meet increasing demand. Further, key improvements in infrastructure and facilities, some of which are highlighted in this brochure, will be necessary to keep the system positioned for future aviation and economic development opportunities. All of these considerations are discussed in the North Carolina Airports System Plan (NCASP).

About RHP

Western Carolina Regional Airport (RHP) is located in the City of Andrews and the County of Cherokee in the western portion of the state. The airport is owned by the county and provides general aviation services to its patrons.

Associated County / City	Cherokee / Andrews
Annual Operations (2013)	20,500
Number of Based Aircraft (2013)	58
Primary Runway	08/26
Dimensions	5,500 FT X 100 FT
Taxiway	Partial Parallel
Approach/Approach Lighting	RNAV LPV / None
Population Within 30-Min. Drive	33,213

Economic Benefit of the Western Carolina Regional Airport

(Source: Economic Contribution of North Carolina Airports, 2012)

Aviation contributes significantly to North Carolina's economy by providing employment, serving the business community, and attracting tourism to the state. In addition, the airport provides many vital services to communities that contribute to the health, safety, and general quality of life of North Carolina residents. These services include medical transport, local or regional emergency response and management, and law enforcement. The 2012 economic benefits for the airport are described in the table below.

EMPLOYMENT	180 jobs
PAYROLL	$4,110,000
ECONOMIC OUTPUT	$17,280,000

WESTERN CAROLINA REGIONAL AIRPORT

Airport Development Plan Facility Objectives/Recommendations

For each airport grouping/role, a series of facility objectives were established to make sure that every airport is meeting the standards and serving the needs of the surrounding communities and the statewide aviation system. The NCASP identifies recommended projects the airport should consider in order to meet Airport Development Plan objectives. The following table summarizes the categories, the airport's existing condition, the objective, and identifies whether the airport meets the objective.

AIRPORT DEVELOPMENT PLAN CATEGORY	ACTUAL (2015)	OBJECTIVE	MEETS OBJECTIVE?
Airport Layout Plan (ALP)	2000	ALP Completed/Updated Within Last 10 Years	No
Runway Safety Area (RSA)	300 FT	300 FT	Yes
Runway Protection Zone (RPZ) Ownership	Partial	Fee Simple	No
Pavement Condition Index (PCI) - Primary RWY	85 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Apron	91 (as of 2012)	PCI ≥ 75	Yes
Pavement Condition Index (PCI) - Taxiways	93 (as of 2012)	PCI ≥ 75	Yes
Runway Length	5,500 FT	5,000 FT	Yes
Runway Width	100 FT	100 FT	Yes
Pavement Strength	25,000lbs SW, 45,000lbs DW	> 30,000lbs SW or DW and < 60,000lbs SW or DW or Per PCN Analysis if Part 139	Yes
Visual Navigational Aids	RB, LWS, PAPI-2	Rotating Beacon (RB), Lighted Wind Stock (LWS), PAPI-4	No
Runway Edge Lighting	MIRL	Medium Intensity Runway Lighting (MIRL)	Yes
Weather Reporting Capability	AWOS IIIP	AWOS III	Yes
Standard Instrument Approach	Area Navigation (RNAV) LPV, 2,329', 1 1/4 mile	Instrument Approach with Vertical Guidance (APV), 250', 3/4m	No
Parallel Taxiway	Partial Parallel	Full Parallel	No
Aircraft Apron	25 spaces	25% Based Aircraft + 20% Busy Day Transient = 16 spaces	Yes
General Aviation Terminal Building	2,000 SF	4,500 SF	No
Taxiway & Apron Edge Lighting	Reflectors	Medium Intensity Taxiway Lighting (MITL)	No
Airfield Signage	RHP, L, G	Runway Hold Position (RHP), Location (L), Guidance (G)	Yes
Ground Communication	Remote Transmitter/Receiver (RTR)	UNICOM, Remote Communications Outlet (RCO) or Ground Communications Outlet (GCO)	Yes
Approach Lighting	None	Approach Lighting System (ALS)	No
Aircraft Rescue and Firefighting (ARFF) Equipment	No	Case by Case	N/A
Hangars	51 hangars	75% Based Aircraft = 44 hangars	Yes
Airfield Maintenance Equipment/Storage Bldg.	None	Approved Tractor/Building	No
Perimeter Fencing	None	8' Perimeter	No
Fuel Facilities	AvGas, Jet A	Based on Demand	Yes

2015 INDIVIDUAL AIRPORT SUMMARY:

Wilkes County Airport

NORTH CAROLINA AIRPORTS SYSTEM PLAN

NCASP

NORTH CAROLINA AIRPORTS SYSTEM PLAN

Airport Grouping/Role

In 2004, DOA developed and adopted the Airport Groupings Model that used demographic and economic data to identify key community parameters that could be used to determine what type of airport an area could support. Data for the model was updated and groupings were revised as a part of this NCASP. More detail on the model and the methodology are available in the NCASP technical report. The following represent general runway length objectives by Airport Grouping:

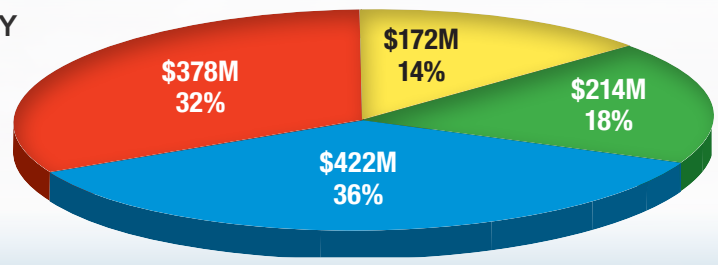
Yellow Airport: + 6,500' RUNWAY	Blue Airport: + 5,000' RUNWAY
Red Airport: + 6,000' RUNWAY	Green Airport: + 4,200' RUNWAY

As part of the NCASP, Wilkes County Airport was classified as a Blue Airport.

20-Year Costs for NCASP Recommended Projects

Based on the recommendations in the NCASP, it is estimated that at least $1.2 billion is needed in order to meet the target goals for the plan's performance measures and ADP objectives. These costs represent planning-level estimates to increase the performance and respond to future needs.

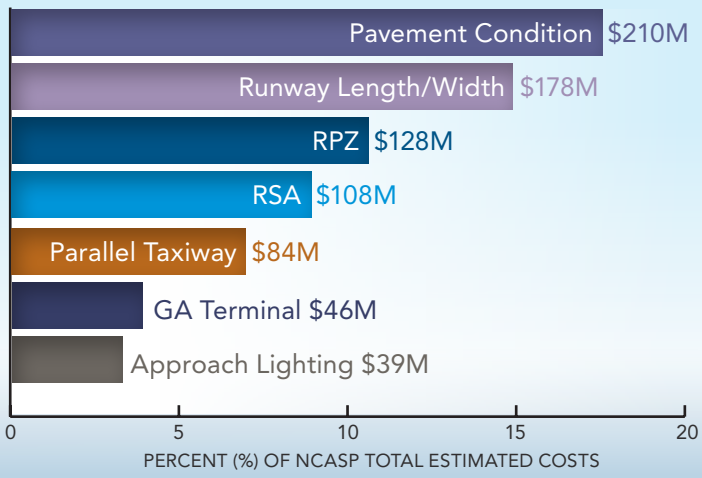
ESTIMATED COSTS BY AIRPORT GROUPING



- Yellow Airports
- Red Airports
- Blue Airports
- Green Airports

NCASP ESTIMATED COSTS = $1.2 BILLION

SELECT PROJECT TYPES/TOTALS



There are additional reports and analyses that were undertaken as part of the NCASP. Some of the publications prepared and available on the Division of Aviation's website include:

- Airport Pavement Management System (APMS) and Pavement Condition Assessment
- Automated Weather Observation System (AWOS) Condition Assessments
- General Aviation Airport Return on Investment Case Studies
- Aeronautical Surveys for Airports GIS
- North Carolina Airport Development Programs and Policies Guide (NCADPP)

About UKF

Wilkes County Airport (UKF) is located in the City of North Wilkesboro and the County of Wilkes in the northwestern portion of the state. The airport is owned by the county and provides general aviation services to its patrons.

Associated County / City	Wilkes / North Wilkesboro
Annual Operations (2013)	5,000
Number of Based Aircraft (2013)	27
Primary Runway	01/19
Dimensions	6,200 FT X 100 FT
Taxiway	Full Parallel
Approach/Approach Lighting	Precision / MALSR
Population Within 30-Min. Drive	68,962
