INTEGRATED
PROJECT DELIVERY
JUNE 2019 NEWSLETTER

> **a CULTURE where we PROMISE what we are GOING TO DO and DELIVER what we PROMISE**
> – NCDOT's Project Delivery Vision

Hello all. This past month the IPD Teams developed roadmaps and are prioritizing project delivery process enhancement recommendations with the goal of having these enhancements fully developed and implemented, with training and tools included. You can expect to see products coming out on a continual basis throughout the year as we work with all of you to refine and implement these ideas that you helped to create. As always, if you have any questions, ideas or suggestions on areas of improvement please submit your thoughts by visiting the **Integrated Project Delivery Webpage** on Connect NCDOT.

Training Update

- **Project Development Roles and Responsibilities Training** – *initial training sessions have been held. Additional training classes are being scheduled for this June 24th and 25th.*
- **MS Project Schedule Training** – *initial training sessions are underway now. This training is intended for Preconstruction PMs, and consist of what is included in a schedule, why it is important, how to define the critical path, and how to utilize a schedule on a daily basis as a PM.*
- **NEPA/SEPA 101 Training** – *initial training sessions have been held. Additional training classes are scheduled for this summer. This general overview is intended for staff in Preconstruction roles, and consist of what elements are required for decision-making, including Scoping, Purpose and Need, Alternative Analysis, and Impact Avoidance. Click on this link to sign up:* NEPA/SEPA 101 Training
- **ATLAS** – *13 training dates in 7 locations statewide have been scheduled for June and July. This training will provide project managers hands-on instruction with the various tools within ATLAS which is designed to connect users with the best available data from a multitude of categories useful for everything from project scoping, to development and beyond. Bluebeam

Want to Reduce your Review Comment Time by 30%? The Department has acquired an enterprise license for Bluebeam Revu. Bluebeam Revu is a PDF creation, editing, markup and collaboration technology for design and construction workflows. Productivity may be increased by leveraging markup data across the entire project lifecycle and streamline processes to get more done in less time. NCDOT currently has a pool of 250 licenses that can be used at any given time. When Bluebeam is opened, a license is utilized. When Bluebeam is closed, that license is released back into the pool. Introduction training is being scheduled for end of June. For more information check out the NCDOT Bluebeam Team Site. Request access if prompted.

NCDOT Subject Matter Expert Contact List

Ever have a technical question about a topic you're not familiar with? A list of NCDOT Subject Matter Experts has been compiled to provide you with a contact person for major disciplines.   While this list is a good starting point, it can't possibly cover every topic, so please feel free to contact a Unit head if you are having trouble finding the appropriate information for your project. The list will be routinely updated based upon feedback and can be access at the following link: NCDOT Expert Contact List.

Support

If you have questions, need assistance or have suggestions, please submit your request through the **Integrated Project Delivery Webpage** using the Contact Form on Connect NCDOT.
