12_19 Criteria Will Only Draw Half of X-Sect.

Question:
When processiong the proposed cross section for nb1328, the program will draw all the cross sections, but will only draw the right side of the cross section at station 23+50. The error message states that there is a problem with the elevations. I was unsuccessful in finding any problem with the input file, or any of the related dgn files, that could cause this problem.

Answer:
Change your tolerance from 0.1 to 0.03 in the criteria input file.
