

13_09 Limited CA Symbol Added to Hearing Maps

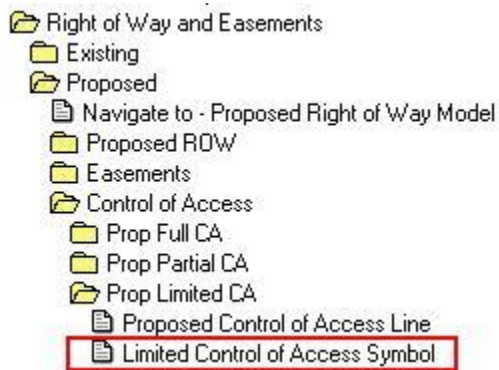

Question:

Running into a snag trying to prepare this hearing map. It turns out we have Partial, Limited, and Full control of access on this project. The hearing map D&C Manager only has placement items for partial and full. Can you make an item for limited?

Answer:

After corresponding with Jim Speer, PE, he has concurred that there are no anticipated design conflicts with the creation of a limited control of access cell for public hearing map creation. His recommendation is to use the same full control of access cell, but change the fill color from red to pink.

An item has been added for the placement of Limited Control of Access symbols in the hearing map D&C Manager.

In addition, an option to add Limited Control of Access key to the legend has been provided on the hearing map legend cell. Below is a typical placement and symbology for Limited Control of Access.
