

14_14 Gore Criteria Example

Question:

I am having difficulties trying to run the L, loop, and gore criteria with one file. Can a sample Criteria file be created to help me?

Answer:

A sample Gore Criteria input file has been created.

In this example, a cross section is cut at the gore between -L- and -211LPB- (loop B) at station 168+00.

Processing the Gore Criteria will draw -L-, gore, and -211LPB- (loop B) in a single process.
