

## **15\_02 Bridge Project with a Jurisdictional Stream**

### **Question:**

I have a bridge project with a Jurisdictional stream. [After I have gone through the proper channel], it was decided that the JS needed to be included on the plan sheet for permit purposes. Because of this the JS line style needs to be included on the 1-B sheet.[Can the change be made to reflect this on the Symbology sheet?]

### **Answer:**

Jurisdictional Streams symbology has been added to both the english and metric Symbology sheets.
