

15_17 Recompiled Automated Pavement Quantity Program

Question:

Has there been any plans to recompiled the automated pavement quantity program (3opq.ma) for Microstation V8?

Answer:

The author of the automated pavement quantity program is not planning to recompile 3opq.ma for Microstation V8. There will be a "total" pavement quantity program which will combine the functionality of 3opq.ma and NCwedge. No completion date has been indicated.

As always, pavement quantities can be computed "by hand" and with NCwedge.
