

16_12 Exist Roads EOP Level

Question:

Why is the level "Exist Roads EOP" not available in the Roadway level DGN library to process criteria and NCWedge?

Answer:

"Exist Roads EOP" is a Basemapping level (NCDOT_Basemapping_Level.DGNLIB), not accessible to Roadway Designers. This level will begin to show up more with new topo files from Photogrammetry and Location and Survey. To process criteria and NCWedge for projects with older topo files, use "Old_Level_3" instead of "Exist Roads EOP". Sample and template input files have been modified to make aware of the adjustment.
