

## 16\_25 Obtaining Existing Roads EOP Level

### Question:

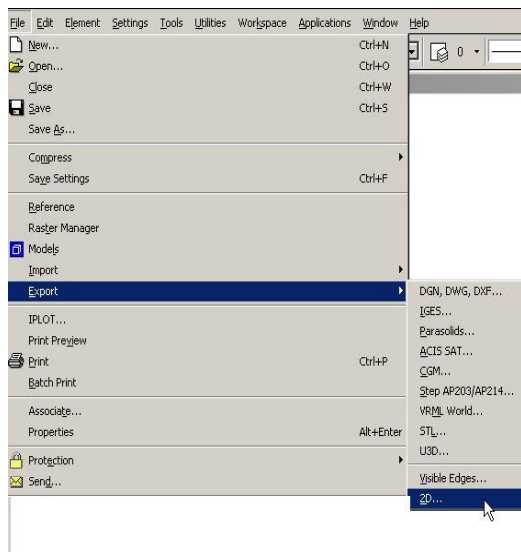

When I copy existing road eop line from Photogrammetry file it changes to default level. I noticed that in the levels list I can't find anything with "Exist Road\*". Why can't I get the existing EOP lines on the correct level?

### Answer:

For an explanation as to why Roadway can not create or copy other NCDOT Unit's levels, click on the below link.

[Exist Roads EOP Level Question](#)

In addition, if you want to create a Roadway existing EOP file on a correct level (for NCWedge or Criteria), then from a 3D DTM file, Export to 2D from the File menu.

If a DTM file does not exist, then simply copy the original Photogrammetry file and rename it to Roadway's. Delete all levels except the Exist Roads EOP level in the Roadway EOP file.
