

## **16\_30 Problem with Excel and Microstation**

### **Question:**

When I tried to link or embed my Excel (XLS) spreadsheet into a Microstation DGN file, only part of the Excel worksheet is shown. What can be the cause of the problem?

### **Answer:**

The problem resides mainly in our Microsoft Office 97 software. Excel 97 can only link or embed a limited area of the Excel worksheet. According to the Microstation, the problem can be resolved by upgrading Excel 97 to Excel 2002 or later and having it on the same workstation Microstation is installed on.

If you are experiencing this problem, contact Roadway CADD Support to link or embed Excel file into a Microstation file.
