

## 8\_4 INTERSECTION MODELING

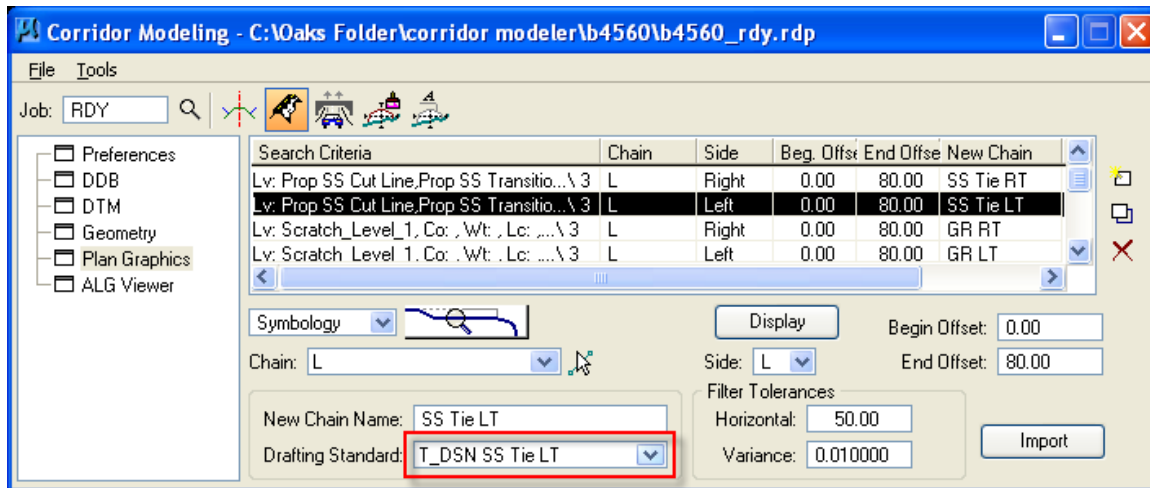

### Question:

Is there a procedure to model intersections?

### Answer:

Some training exercises (downloadable dataset) have been developed to model at-grade intersections. This intersection modeling procedure is applicable to SS2-Refresh and earlier Geopak versions. The link to the training exercises can be found below.

Training Exercises

The web reference help for using the new at-grade intersection templates and a broad overview of the procedure is found at link below
