

15_22 Sheet North Arrow Placement (SNAP)

The following is effective immediately with the next workspace update.

From the Roadway Staff Meeting held on September 18, 2007, the Sheet North Arrow Placement (SNAP) program has been expanded to include the additional four north arrow NAD 83 with epoch cells, per Location and Surveys request. These new NAD 83 with epoch cells include NAD 83/86, NAD 83/95, NAD 83/2001, and NAD 83/NSRS 2007.

As a reminder, SNAP is an existing Roadway VBA application which is used to automatically place plan sheet north arrow cells on plan sheet files and file models. Please refer to the Staff Meeting Minutes for further information on these new cells and their appropriate usage.
