

16_26 Parcel Index Sheet App

Question:

I am currently in the process of doing a parcel index sheet but can't find the application.

Answer:

The new RoW parcel index sheet is still under development for MicroStation V8. The work around for now is to use an old parcel index sheet and manually fill in the parcel number, property owner name, and sheet number. Remember as a rule of thumb, row parcel index sheets are needed only if the project has more than two sheets. You should not do one for bridge projects with 2 plan sheets or less.
