

## 2\_53 WIDENING WITH NO GRADE TEMPLATES

### Question:

What template is used for widening with no grade and has a min resurfacing/overlay and guardrail warrant? (not divided)

### Answer:

*UF\_Shld - V07* ties to the existing EOP.

*UF\_Shld - V10* allows for a specified overlay/resurfacing depth.

Both use the existing grade and cross slope/super (can override with point controls).
