Instructions

An answer must be provided for <u>all</u> questions. If the question is not relevant to the project, then check N/A. Where needed, reply to the requests for additional information with complete statements so that there is not the possibility of a misunderstanding or confusion.

General

Does this project contain any new or unique construction techniques, processes, and/or products that are unfamiliar to the Department, Division, or the assigned Resident Engineer? If "Yes", a draft project special provision, details along with a Technical Bulletin (if available) of this unique construction technique, process, and/or product should be supplied to you for review and comment during this field inspection.	□Yes □ No
Does this project have any constructability issues that should be addressed? If "Yes", briefly describe the issue(s) in the space below: Click here to provide additional information.	□Yes □ No
 Based on your answers above, do you recommend: An internal constructability review? An external constructability review with representation from contractors affiliated with the Association of General Contractors (AGC)? A Technical Bulletin to be prepared? 	□Yes □No □Yes □No
• Training to be provided for the Resident Engineer and staff? Click here to provide additional information.	□Yes □ No □Yes □ No
Are there any buildings on this project that would be candidates for deconstruction by the local Habitat for Humanity? If "Yes", list the locations in the space below: Click here to provide additional information.	□Yes □ No
Recommend completion date for project based on a tentative letting dateof Click here to enter the let date.Recommend the contract method felt most suitable for this project:conventional, A & B, or incentive/disincentive.	<u>Click here to select a</u> <u>completion date.</u> <u>Click here to choose</u> method.
Should a floating date of availability be used for this project? If "Yes", provide any recommendations in the space below: Click here to provide additional information.	□Yes □ No
Are there any issues with the beginning and end of project and construction? If "Yes", list the locations in the space below: Click here to provide additional information.	□Yes □ No

Are there any locations on this project that you believe may have potential	\Box Yes \Box No
for hydroplaning? If "Yes", list the locations in the space below:	
Click here to provide additional information.	
Are there any issues with the street returns for width and radii? If "Yes",	\Box Yes \Box No
list the locations in the space below:	
Click here to provide additional information.	
Are any roads along this project used for OVERSIZE VEHICLES?	\Box Yes \Box No \Box N/A
If "Yes", does the OVERSIZE VEHICLE ROUTE affect the proposed	□Yes □ No □N/A
design? If "Yes", provide specifics in the space below:	
Click here to provide additional information.	
Should cul-de-sacs or turnaround areas be constructed on existing roads which are terminated? If "Yes", list the locations in the space below:	\Box Yes \Box No \Box N/A
Click here to provide additional information.	
Are any new walls, steps and/or house walks required? If "Yes", provide	\Box Yes \Box No \Box N/A
the location, type of construction required and quantities in the space	
below:	
Click here to provide additional information.	
Will the construction surveying on this project be handled by the	<u>Click here to choose one.</u>
Department or the Contractor?	
Is the project survey line identified on the ground so it can be found and	\Box Yes \Box No
located by the prospective contractors? If "No", provide the location(s)	
where issues exist in the space below:	
where issues exist in the space below: Click here to provide additional information.

If "Yes", recommend the type of construction and locations in the space below:	□Yes □ No

Barriers

The Roadway Standard Drawing, Std. 846.03 (Sheet 1 of 2), shows guardrail spanning an object that requires a post to be omitted. Does this project require this standard? If "Yes", list each location and the required	□Yes □ No
standard in the space below:	
Click here to provide additional information.	

Will any additional, temporary guardrail or permanent guardrail be	□Yes	🗆 No	\Box N/A
required? If "Yes", list locations and estimate quantity in the space below:			
Click here to provide additional information.			
Will removed existing guardrail be stockpiled?	\Box Yes	\Box No	\Box N/A
Click here to provide additional information.			
Will any guardrail barricades be required on existing roads which are to be terminated or should earth berms be constructed? If "Yes", list the	□Yes	□ No	□N/A
locations in the space below:			
Click here to provide additional information.			
If guardrail, are terminal sections to be used? If additional information required, please provide it in the space below:	□Yes	🗆 No	□N/A
Click here to provide additional information.			
Do you have any suggestion(s) for reducing the future vegetative maintenance around existing and / or proposed guardrail on this project? If "Yes", provide more detail on the suggestion(s) in the space below: Click here to provide additional information.	□Yes	□ No	
Will the Division be able to furnish the temporary concrete barrier to the contractor for his use during construction of the project? If "Yes", designate the location from which the contractor must take delivery of the barrier and the location to which the contractor must return the barrier at the conclusion of the project in the space below: Click here to provide additional information.		□ No	□N/A
If the Contractor is to furnish the temporary concrete barrier, should barrier revert to the Contractor at the conclusion of the project? NOTE: If the Division wants to take possession of the barrier, it must reimburse the project for the salvage value of the barrier, this reimbursement must come from 100% State funds.	□Yes	□ No	□N/A

Berms, Gutters and Curbing

Berms, Gutters and Curbing		
Are there any recommended changes for curb type and cover for raised	□Yes	□ No
islands? If "Yes", provide more detail on the suggestion(s) in the space		
below:		
Click here to provide additional information.		
Are additional shoulder berms, expressway gutters, or gutters and curbing	□Yes	🗆 No
on the outside edge of fill shoulder required? If "Yes", provide the		
location(s) on the plans or in the space below:		
Click here to provide additional information.		
Truncated domes are required on all existing wheel chair ramps. Are there	\Box Yes	□ No □N/A
any existing wheel chair ramps which need to be retrofitted with truncated		
domes? If "Yes", provide how many in the space below:		
Click here to provide additional information.		
Are pedestrian mitigation measures incorporated into the Design Plans?	□Yes	🗆 No
If "Yes", Are mitigation measures Americans with Disabilities Act (ADA)		
compliant? Provide an explanation below:		
Click here to provide additional information.		

Drainage

Are there any pipe installations requiring trenchless construction? If	\Box Yes \Box No
"Yes", provide an estimated length and location of pipe requiring this type	
installation in soil in the space below:	
Click here to provide additional information.	
Note: A separate length of pipe is needed at each location, for installation,	
in materials other than soil.	
Are there any recommended changes for berm ditches? If "Yes", provide	\Box Yes \Box No \Box N/A
more detail on the suggestion(s) in the space below:	
Click here to provide additional information.	
Are there any recommended changes for type of paved ditches and ditch	\Box Yes \Box No \Box N/A
liner? If "Yes", provide more detail on the suggestion(s) in the space	
below:	
Click here to provide additional information.	
Are any additional drainage easements required? If "Yes", show location,	\Box Yes \Box No
limits and specify whether it is temporary or permanent in the space below:	
Click here to provide additional information.	
Are there any catch basins, drop inlets, manholes, meter boxes and valve	\Box Yes \Box No
boxes to be adjusted? (Article 858-1) If "Yes", Provide the location and	
number in the space below:	
Click here to provide additional information.	
	•
Constructability/Permitting/Commitments	
Constructaounty/1 ci mitting/Committinents	

Constructability/Permitting/Commitments

Has the method of construction for proposed bridges and / or culverts been	□Yes	\Box No	\Box N/A
addressed? (See CFI Checklist attached to field inspection letter.) If			
"Yes", provide more detail in the space below:			
Click here to provide additional information.			
Has the method of removal for bridge superstructure and substructure been	\Box Yes	🗆 No	\Box N/A
discussed? (See CFI Checklist attached to field inspection letter.) If "Yes",			
provide more detail in the space below:			
Click here to provide additional information.			
Are any additional right of way, permanent easements and/or temporary	□Yes	🗆 No	
construction easements required other than those shown on the plans for the			
issues discussed above? If "Yes", show location, limits and specify			
whether it is temporary or permanent in the space below:			
Click here to provide additional information.			
Does the proposed design take into consideration the constructability issues	□Yes	🗆 No	
associated with constructing the roadway, drainage, structures, utilities, and			
maintaining traffic so that the right of way limits and permit application can			
be developed accordingly? If "No", provide more detail in space below:			
Click here to provide additional information.			
Have all environmental commitments been reviewed and can they be	□Yes	🗆 No	\Box N/A
implemented? If "No", provide more detail below in the space below:			
Click here to provide additional information.			
Are any plan changes or modifications required that may jeopardize the	□Yes	🗆 No	□N/A
status of the permit? If "Yes", list the locations in the space below:			
Click here to provide additional information.			

Are historic properties and / or archeological sites clearly identified on the	\Box Yes \Box No \Box N/A
plans? If "No", provide the location(s) where issues exist in the space	
below:	
Click here to provide additional information.	
Do the commitments clearly explain how the impacts to these sites will be	
avoided or minimized? If "No", provide suggestions on how the comments	\Box Yes \Box No
could be clarified below:	
Click here to provide additional information.	
Are there any temporary pedestrian impacts listed on the list of	\Box Yes \Box No
environmental commitments (green sheets)?	
Click here to provide additional information.	
Driveways	
Are any changes needed for the location or width of driveways? If "Ves"	

Driveways

\Box Yes \Box No \Box N/A
\Box Yes \Box No \Box N/A
Click here to choose one.
\Box Yes \Box No \Box N/A
\Box Yes \Box No

Earthwork

Are there any ways which project generated debris (i.e. removed	□Yes	🗆 No
concrete/asphalt pavement: clearing and grubbing-mulch; native planting)		
can be safely and economically incorporated into the construction of the		
project? If "Yes", provide more information in the space below:		
Click here to provide additional information.		
Are there any approved alternative sources of fill material located in close	□Yes	🗆 No
proximity to the project (coal flyash generator, concrete pavement removal,		
recycle glass, steel slag, etc.)? If "Yes", provide more information in the		
space below:		
Click here to provide additional information.		
Can earthwork be utilized (as shown on the Earthwork Summary) during	□Yes	\Box No \Box N/A
construction phasing of this project? For widening projects, this includes		
the ability of the contractor to haul earth material across traffic. If "No",		
provide more information in the space below:		
Click here to provide additional information.		

Is any pavement removal, breaking of existing pavements or obliteration required beyond what is shown in the plans? If "Yes", provide the	□Yes □ No
locations in the space below:	
Click here to provide additional information.	
If this project fits within the guidelines, would you rather it go to contract	\Box Yes \Box No
under "Lump sum grading" or an individual item basis?	
Click here to provide additional information.	
Is this project a good candidate for earthwork quantity determination using	\Box Yes \Box No
photogrammetric methods?	
Click here to provide additional information.	

Fencing

Fencing	
If access is to be controlled on the project, recommend the height and type	\Box Yes \Box No \Box N/A
of fence (woven wire or chain link) and if any gates are required in the	
space below:	
Click here to provide additional information.	
Is temporary fence required on the project? If "Yes", provide the height,	\Box Yes \Box No
type and recommended locations below:	
Click here to provide additional information.	
Is any security fence required (reset or replacement) on this project? If	□Yes □ No
"Yes, furnish sketch showing size, post spacing, gates, etc. or provide this	
information in the space below:	
Click here to provide additional information.	

Geotechnical (Must answer if sub-surface information is not available.)

Are any underdrains anticipated? If "Yes", estimate total length below: Click here to provide additional information.	□Yes □ No
Is additional undercut excavation needed beyond what is shown in the geotech recommendations. If so, provide an estimate of that quantity. (Article 225-4) Click here to enter quantity.	□Yes □ No
Grading	

Grading

Should grading be done in order to allow for vegetation removal and erosion on the future paving contract? If "Yes", provide the height above final subgrade below:	□Yes	□ No
Click here to provide additional information.		
Has any grading occurred since field surveys and contour mapping were made? If "Yes", have these areas been identified and taken into account?	⊔Yes	□ No
Provide additional information in the space below:		
Click here to provide additional information.		
Is a grading detail needed for the interchanges on this project?	□Yes	□ No
Click here to provide additional information.		

Lighting

Will the project require lighting and/or future lighting? If "Yes", provide	\Box Yes \Box No
locations in the space below:	
Click here to provide additional information.	

Noise Walls

Should NCDOT approved, alternative noise wall materials be considered for use in lieu of the standard pile and panel wall materials? Click here to provide additional information.	□Yes □ No □N/A
Load Restrictions	V-A
Are there load limit restrictions on roads and/or bridges in the project vicinity which will limit the contractor in the hauling equipment and materials?	Yes No
If "Yes", will this be covered by Section 105-15 of the Standard	□Yes □ No
Specifications?	
Click here to provide additional information.	

Material Usage and Measurement

Specify how borrow material will be measured. In place measurement, or	Click here to choose one.
truck measurement. (Article 230-5)	
On Federal Aid projects, are materials furnished by the contractor or	\Box Yes \Box No \Box N/A
salvaged from the project to become the property of the department? If yes,	
the salvage value must be reimbursed from State funds for the material as	
part of the Federal Aid Agreement if the salvage value exceeds \$5,000.00	
except where the salvaged item will be reused in future projects eligible	
under Title 23 USC until its useful life is expended.	

Pavement

Will incidental stone base be required? (Article 545-1) If "Yes", estimate quantity in the space below:	□Yes □ No
Click here to provide additional information.	
Will asphalt plant mix pavement repair be required for repairing existing	\Box Yes \Box No
pavement? (Exclude pipe installations) If "Yes", estimate quantity in the	
space below:	
Click here to provide additional information.	
Do you have any recommendations for mobile string line or fixed string	\Box Yes \Box No
line for the asphalt plant mix paver? (Article 610-8) If "Yes", provide	
further details in the space below:	
Click here to provide additional information.	
Is milling of asphalt pavement feasible on this project?	\Box Yes \Box No
(A) If "No", explain in the space below.	

(B) If "Yes", provide recommended depths, widths, and locations in	
the space below.	
Click here to provide additional information.	
Highway Design Guidelines specify that trench sections be used on	\Box Yes \Box No
pavement designs that are 10" or less in depth. Is there any justification for	
deviating from these guidelines? If "Yes", provide more information in the	
space below:	
Click here to provide additional information.	
Has the method of rumble strip construction for concrete shoulders been	\Box Yes \Box No \Box N/A
clearly show in the plans?	
Click here to provide additional information.	
Do you agree with the method as shown?	□Yes □ No
Click here to provide additional information.	
Is there another approved method more suitable for this project? If "Yes",	\Box Yes \Box No
provide more information in the space below:	
Click here to provide additional information.	
Are there any resurfacing areas where incidental milling will be required to	\Box Yes \Box No
make a suitable tie back to the existing pavement? If "Yes", estimate	
quantity in the space below:	
Click here to provide additional information.	
Do you want Final Surface Testing performed on this project?	□Yes □ No
Click here to provide additional information.	
	•

Right of Way

Right of Way	
Which method of clearing is to be used? If "Other", please specify in the space below: Click here to provide additional information.	Click here to choose one.
Are there trees which are to be preserved on field inspection prints. (Article 200-3) If "Yes", show on field inspection prints or provide locations in the space below: Click here to provide additional information.	□Yes □ No
Are there areas in the Right-of-Way that are not to be cleared? If "Yes", show on field inspection prints or provide locations below: Click here to provide additional information.	□Yes □ No
What type of Right of Way marker installation is recommended for this project? NOTE: State forces place iron pin and caps as right of way markers. Placement of concrete/granite right of way markers shall be placed	Click here to choose one.
by contract. Click here to provide additional information.	

Traffic Operations

Is the Division aware of any traffic generating events that would require special design considerations and traffic control planning? If "Yes",	□Yes □ No
provide the events below:	
Click here to provide additional information.	
Are there any locations where a non-gating impact attenuator should be specified (temporary detours, temporary traffic pattern, etc.) that the	□Yes □ No □N/A

completed project would only require a gating device? If "Yes", provide	
the locations in the space below:	
Click here to provide additional information.	
Have traffic maintenance and constructability issues been reviewed to	\Box Yes \Box No
ensure they will have no bearings on the permit status? If there are any	
potential conflicts with the permit status, list them in the space below:	
Click here to provide additional information.	
Are any street signs and markers to be removed and stockpiled by the	\Box Yes \Box No
Contractor? If "Yes", provide the locations in the space below:	
Click here to provide additional information.	
Are there any signing and/or pavement marking to be performed by force	\Box Yes \Box No
account? If "Yes", notify the Division Traffic Engineer who will furnish a	
cost estimate to the Roadway Design Unit.	
Click here to provide additional information.	
Is the existing pavement adequate on proposed detours? If "No," provide	\Box Yes \Box No
any areas of concerns in the space below:	
Click here to provide additional information.	
Are any contract signs needed on the project? If "Yes", provide the	\Box Yes \Box No
locations in the space below:	
Click here to provide additional information.	
Is a \$250 penalty ordinance and/or speed reduction ordinance	\Box Yes \Box No
recommended?	
Click here to provide additional information.	
Are any route/name changes necessary on the project? If "Yes", provide	\Box Yes \Box No
the locations in the space below:	
Click here to provide additional information.	
Is a towing ordinance recommended? If "Yes", provide areas of concern in	\Box Yes \Box No
the space below:	
Click here to provide additional information.	
Is Right-of-Way adequate for sign/signal installation? If "No", provide the	\Box Yes \Box No
area(s) of concern below in the space:	
Click here to provide additional information.	
Has any development occurred recently to influence the project traffic	\Box Yes \Box No
volumes? If "Yes", advise what the impact is so that geometrics and	
pavement design can reflect the change in the space below:	
Click here to provide additional information.	
What will be the probable posted speed limit for this project?	Click here to enter speed.
Click here to provide additional information.	
In addition to portable changeable message signs (per each), is there a need	\Box Yes \Box No \Box N/A
for short term portable changeable message signs (for road closures, girder	
delivery, etc.)? If "Yes", estimate the number of days in the space below:	
Click here to provide additional information.	

Typical Sections

Will full width usable paved shoulders be required at the interchange	\Box Yes \Box No \Box N/A
ramps?	
Click here to provide additional information.	

Temporary Shoring

Is Temporary Shoring for the maintenance of traffic required on this	\Box Yes \Box No
project? (Shoring required to maintain traffic is defined as shoring	
necessary to provide lateral support to the side of an excavation or	
embankment parallel to an open travelway when a theoretical 2:1 or steeper	
slope from the bottom of the excavation or embankment intersects the	
existing ground line closer than 5 feet (1.5m) from the edge of pavement of	
the open travelway.)	
List probable locations of this temporary shoring:	
Click here to provide additional information.	

Miscellaneous Comments

Click here to provide additional information.
