REVIEW DISCUSS WITH	___
PREPARE REPORT	___

The Technical Support Group of the Support Services Section of the Geotechnical Engineering Unit (GEU) has completed the new standard geotechnical summary tables for the 3-series sheets in the Roadway plans. Use these summary tables beginning with the February 19, 2013 letting.

For future projects or current projects without completed Geotechnical Roadway Foundation Recommendations, the GEU will include completed geotechnical summary tables with the roadway recommendations. The completed summary tables will be available from the electronic geotechnical roadway recommendation files at the following location:

Drive:\TIP\Projects-B,R,U,etc.\TIP#\Geotech\InvestigationDesign\TIP#\_GEO\_RDWY\NON\_CADD\

For current projects with completed Geotechnical Roadway Foundation Recommendations, Roadway Design should create summary tables from previously received geotechnical reports. For all current and future projects, Roadway Design should also include any subsurface drainage from the Geotechnical Pavement Design Recommendations and any bridge waiting periods from the Geotechnical Structure Foundation Recommendations in the summary tables.

For projects with Pre-Let Field Inspections and geotechnical summary tables, Roadway Design should include the summary tables in the field inspection plans. Based on the plans received through the normal field inspection distribution, the GEU will confirm by e-mail that the summary tables are correct or request corrections by the due date for field inspection comments. For projects without Pre-Let Field Inspections and with geotechnical summary tables (bridge projects), Roadway Design should notify the GEU Regional Design Engineer and Geotechnical

Manager by e-mail of the location of the electronic summary table files when initiating the Final Plans Checklist. The GEU will then confirm by e-mail that the summary tables are correct or request corrections within 5 working days of receiving notification. Roadway Design should also incorporate a question into the Final Plans Checklist to remind Roadway Design Engineers of this new coordination step.

The new standard geotechnical summary tables are attached to this memorandum for your reference. If there are any questions, please contact Scott Hidden, P.E. at (919) 707-6856.

Attachment: Standard Geotechnical Summary Tables
