REVIEW/DISCUSS WITH

MEMORANDUM TO:

Mr. John Alford, P.E., State Roadway Design Engineer
Mr. J. Victor Barbour, P.E., State Design Services Engineer
Mr. D. R. Henderson, P.E., Sate Hydraulics Engineer
Division Engineers

FROM:

R. A. Garris, P.E., State Contract Officer

SUBJECT:

Hazardous Waste Retention Basin

Recently there has been confusion about pay item usage related to "Hazardous Waste Retention Basin" construction. A drawing and special provision is attached for your convenience.

Use the "Hazardous Waste Retention Basin" lump sum pay item if one or more of the basins are on a project. Never have more than one "Hazardous Waste Retention Basin" pay item on a project.

A pay item is required for each size of sluice gate needed on a project. The sluice gate quantities are on a per each basis. The size sluice gate shown in the pay item is to reflect the gate diameter required by the plans (not pipe size).

Endwalls as shown on attached drawing shall be paid for by the cubic yard or cubic meter. They are to be covered by the same pay item as any other "Endwalls" within this pipe size range.
