

Microstation Color Tables

NCDOT maintains a standard color table: ncdot.ctb. This file can be found under the NCDOT workspace folder \DATA.

Older project files that were created before ncdot.ctb became the standard may still have default microstation color tables attached, and should be changed.

How to check your color table attachment

Open your standard colorpicker and compare it to the illustration here: This is the correct color table (NCDOT.CTB).

How to attach the proper color table.

Goto
Settings
> Color
Table to
open the
Color
Table
dialog.
The
select
File >
Open.
Path it to
the
NCDOT
workspac
e \DATA
folder to
find the
ncdot.ctb
color
table file.
