

# Files that need re-mapping

DSN  
ROW  
SS  
DRN

Caution when remapping cells. The cells scale is not consistence. All D&C manager cells for automated quantities have to be reset after remapping.

# Files that don't need re-mapping

PSH  
PFL  
TSH  
DET  
TYP  
\*XSC

XPL (delete because geoplot no longer used)

L&S and Photogrammetric files (Roadways copy, not the originals) should be converted

Shape files should be re-created.

\*Depends on how far along the project you are. Whether or not you want to run V8 or V7 criteria.
