ACTION	YES	NO	N/A	COMMENTS
Study the plans, Standard Specifications and Roadway Standard Drawings.				
Ensure that at least one member of the pavement marking crew is certified through the NCDOT Pavement Marking Technician Certification process.				
Ensure that the pavement marking materials are on the Department's Approved Products List or are qualified by the Signing and Delineation Unit.				
Test all pavement marking materials and placement in accordance with the pavement marking inspection procedure listed herein.				
Clean the pavement surface and check for moisture prior to pavement marker installation.				
Ensure that the marker color corresponds to the pavement marking that the marker supplements.				
Remove all debris resulting from the saw cutting operation prior to installation of snowplowable pavement markers.				
Ensure the snowplowable marker keel is completely embedded in the pavement surface.
