

TECHNICIAN'S CHECKLIST
SECTION 816
SHOULDER DRAINS

PROJECT: _____

TECHNICIAN: _____

REVIEW DATE: _____

REVIEWER: _____

ACTION	YES	NO	N/A	COMMENTS
Check the limits and location of excavation against Standard Drawings. Advise the Contractor of any substantial deviation. Document any such notice given to the Contractor in the Daily Diary.				
Ensure that certification for the fabric has been received.				
Check fabric joints for Specification compliance.				
Check jointing of subdrain pipe.				
Measure pipe and excavation lengths. Make appropriate entries in the pay record book.				
The Specifications limit exposure of the fabric to sunlight to seven days. This also includes the top layer, which must be covered by drainage course. If the Contractor cannot cover fabric with drainage course or other specified materials, the Contractor should cover the fabric with temporary material.				
Install steel and pavement markings at outlets as required.
