

I need the line items for Supplemental Surveying or Final Surface Testing added to my contract. What should I do?

Line Items such as Supplemental Surveying and Final Surface Testing are not on the Contract Line Item list but are part of the Contract.

These Contract Line Items and other specification line items are added through the **Contract Adjustments > Review Other Line Items** module. See the User Guides for additional information on how to enter these line items.

Other Line Items that are not on the Standard List, and Line items for Design Build Project incentives and penalties are added by the Construction Unit.

For assistance with this topic, please contact the Construction Unit at 919-707-2400.
