

# **Application Modifications and Enhancements – HiCAMS V8.0.2**

*HiCAMS and DOH Vendor Version 8.0.2 were released Friday, 12 February 2009*

## **HICAMS – GENERAL OVERVIEW OF THE RELEASE**

- The Concrete Mix Design look-up window performance problem has been resolved. The window will work with the filters properly now and will only retrieve records when the user clicks the Retrieve button.
- For critical Concrete and Aggregate material samples, Station and Location information are required.
- Corrected a problem with the Asphalt Mix Design numbering that caused periodic skipping in the sequence of numbers.
- Ongoing fixes and enhancements to the Quality Assurance Program (QAP) as identified by those users.

## **CONTRACT MAINTENANCE – AUTHORIZE CONTRACTS**

- “Letting Date” was added to the set of fields that can be modified in the authorization process.
- System edits were modified to allow “Execution Date” to equal the “Letting Date”.

## **CONTRACT TRACKING – REVIEW TICKETS**

- Restored the ability to enter the plant id number into the grid.

## **SAMPLING – ENTER SAMPLE DETAILS & REVIEW SAMPLE DETAILS**

- For critical Concrete and Aggregate material samples, Station and Location information are required.
- For Quality Assurance test category samples on Aggregate QAQC program materials, the Sample From field value must be Stockpile, and the associated Stockpile Number field must be between 1-99.
- For Quality Assurance test category samples on Aggregate QAQC program materials, a new “QA-“ number field will be required. The user will enter their numeric QA sample number and the system will prepend “QA-“ to that number and store/display it as the Field ID.
- A warning message will be provided if a user attempts to save a QA sample that is a duplicate (same material, producer facility, stockpile number, field id, and sampled date year) of one already in QAQC module.

## **SAMPLING – ENTER VIEW PENDING LAB SAMPLES**

- The window will now display samples from division-let contracts in addition to the centrally-let contracts.

## **QUERY TOOL – GENERAL**

- Restored the upper right-hand corner snapshot view of the query tool results display.

## **STANDARD REPORTS – GENERAL**

- All contract reports will now work for division-let contracts in addition to centrally-let contracts.

## **REFERENCES – REVIEW ASPHALT MIX DESIGN**

- Corrected a problem that caused periodic skipping in the sequence of Asphalt Mix Design numbers.
- Corrected a problem that prevented sieve data from being saved on new Asphalt Mix Design records.
- Removed the #80/0.180 mm sieve from the Results tab.
- Changed Superpave sieve labels to Metric values on the Results tab.

## **REFERENCES – CONCRETE MIX DESIGNS**

- The look-up window performance problem has been resolved. The window will work with the filters properly now and will only retrieve records when the user clicks the Retrieve button.

# **Application Modifications and Enhancements – Vendor V8.0.2**

## **DOH VENDOR – GENERAL OVERVIEW OF THE RELEASE**

- No changes were made to the DOH Vendor system in the 8.0.2 release.
