

Application Modifications and Enhancements

HICAMS Version 1 was deployed in September 1996. The following functionality was included in this first release:

- Sample Details: adds, modifies, deletes, reviews and forwards samples
- Sample Receiving: for receiving Labs: records receipt of a specific sample
- Sample Authorization: for receiving Labs: records the authorization of samples received by the Lab
- Pending Project Samples: Views project samples which have not yet been received or authorized
- Pending Lab Samples: views specific Lab samples which have not yet been received or authorized
- Project Maintenance: views and maintains basic information about a specific project
- Standard Reports: generates standard reports through the Inquiry menu function, including Master Pay Item (MPI), Minimum Sampling Guide (MSG), and Stockpile reports
- Master Pay Item Query: defines criteria to generate, view, and print a listing of specific information about one or more Master Pay Items
- Sampling Query provides basic selection of criteria to generate, view and print specific information about one or more samples
- Master Bill of Materials (MBOM) displays and maintains the Master Bill of Materials list based on specific Pay Item criteria
- Master Pay Item displays and maintain the Master Pay Item list, based on Specification Year, Status and Unit of Measure
- Minimum Sampling Guide clients can view it and authorized M&T staff can maintain the Minimum Sampling Guide on-line
- Producer/Supplier displays and maintains information about producers and suppliers associated with samples
- Security displays and maintains HICAMS clients security access
- Table Maintenance displays and maintains client-defined codes tables
- M&T Organization Information displays, maintains, and assigns staff lists and office locations
- MPI Mainframe Set-up creates mainframe files for uploading HiCAMS data to the mainframe systems
- Tools calculator, notifications and an on-line list of current clients

Post-implementation modifications were made to the following modules of Version 1 at various dates.

- Calendar Date/Time Control
