

# Application Modifications and Enhancements

*HiCAMS Version 4.2 & DOH Vendor Version 2.3 were released Saturday, 3/18/2000.*

## **Application Modifications and Enhancements – All Users HiCAMS Version 4.2**

### **SAMPLE DETAILS**

- The list of Alternate IDs appears in ascending order.
- The application no longer creates duplicate Alternate IDs.
- The producer name and location are retained when navigating from Review Ticket Details to Review Sample Details.

### **TEST RESULTS**

- Sample Status now appears on the Review Test Results window.
- 'Tested By' and 'Completed Date' are saved in the History tab.
- Sample ID has been changed to HiCAMS No. on the Review Test Results window.
- The Edit Specs window has a new button entitled 'View Defaults' that displays the default specifications for a test format when clicked.

### **QUERY TOOL**

- The correct Approved Producer/Supplier data is displayed in the Samples Query tool.
- The print preview function has been modified to display heading information in landscape orientation when it is selected.
- Additional Sample-related fields are now available in the Tickets Query tool.
- Various improvements and corrections have been made to the Contracts, Contract Adjustments, and Contract Line Item query tools.

### **DOH Vendor V2.4**

- Authorized users can change a contractor's status to "expired," thus archiving the contractor in the Contractor Directory application.
- You can type the first character in a name and all names that begin with that letter appear in the Firm and Short Name fields.
- Civil rights certifications require ethnicity and ownership percentage information.
- Ownership changes are immediately reflected for civil rights certifications.
- Only users with update access may view social security numbers belonging to the owner of a firm and the federal tax ID for a firm.
- The ability to filter out expired technicians has been added.
- Technician address information is now defaulted when a Producer/Supplier is selected.
- Technicians may be added without entering certification information.

- Test scores may not be entered until a student attended the class, indicated by checking the "Attended" checkbox.
- The tests for a course tracked in the DOH Vendor System appear by default when a student is enrolled in a class.
- The total number of seats, the number of remaining seats, and the number of enrolled students are displayed on the Enrollment window.
- The word 'Query' has been removed from the Query Tool menu names.

## ***Application Modifications and Enhancements – Pilot Divisions HiCAMS Version 4.2***

### **HiCAMS - General**

- Performance Improvements:
  - When you click the Details button on the Review Force Accounts window, the Review Force Account Details window opens faster.
  - When you click the Details button on the Review Eliminated Contract Items window, the Review Eliminated Contract Items Details window opens faster.
  - When you click the Details button on the Review Left Over Materials window, the Review Left Over Materials Details window opens faster.
- Other modifications have been made to the References, Standard Reports, Security, Notifications, and Contracts modules.

### **CONTRACT TRACKING**

- Improvements have been made to adjustment ticket and adjustment pay record processing, voiding tickets and pay records, and ticket, pay record, and material receipt history display.
- User can now sort by participating and non-participating on the Review Ticket Details window, Line Items tab.
- The AC% no longer displays .000 as a valid value on the Review Ticket Details window.
- Improvements have been made to linking Tickets and Pay Records with Samples and updating data such as represented quantity.
- The Accepted Quantity is now updated correctly when a material receipt is voided.
- Invoice Number on Material Prepayments can now be changed before a quantity is entered. Unit price now displays up to four decimal places.

### **CONTRACT ESTIMATES**

- TIP Numbers are now displayed in front of the Contract Description and Contract Location is displayed after the Contract Description on the Estimates report.
- Estimate report now displays 4 decimal places on all unit prices.
- Voided pay factors are no longer included in Estimates.

## **CONTRACT ADJUSTMENTS - Review Supplemental Agreements**

- When a supplemental agreement is voided, unsaved new line items are removed.
- When work order line item quantities do not match line item quantities, a more descriptive error message will be displayed.

## **CONTRACT MAINTENANCE - Review Subcontracts**

- Subcontract Amount now matches on the Review Subcontracts and Maintain Subcontracts windows.
- If you void a subcontract, the Goals Amount is updated.
- If a subcontractor was civil rights certified when the original subcontract was entered, but is no longer certified, a subcontract revision can now be created with the original certification intact.
