

# Application Modifications and Enhancements

*HiCAMS Version 4.3.1 were released Tuesday, 6/13/2000. There was no DOH Vendor release at this time.*

## **HiCAMS Version 4.3.1**

### **Security**

- Security Administration windows in HiCAMS now only display active staff with the option to view "Expired" or "All" staff. (This functionality is similar to staff selection windows.)

### **Documentation for Negotiated Prices**

- The information on Negotiated Prices Reports now appears correctly. The description/justification field is now left justified.

### **Test Results - Samples**

- The Test Result fields that default to N/A are now included in the conditional printing function.

### **Test Results - Parts**

- The Test Result fields that default to N/A are now included in the conditional printing function.

### **Test Formats**

- The Dialog Box for Sample/Part Authorization is no longer missing.
- Erroneous text is no longer displayed in the Select Test Results Formats window.

### **Second Tier Subcontracts**

- The Line Item Description is now listed the same on Maintain Second Tier Subcontracts and Second Tier Subcontract Line Item Report.

### **Review Sample Details**

- Expired Producer/Suppliers/Facilities no longer appear on selection windows where a user can associate it with contract tracking records.

### **Material Receipts**

- Expired Producer/Suppliers/Facilities no longer appear on selection windows where a user can associate it with contract tracking records.

### **Review Estimates**

- The material prepayment current quantity is now working correctly on the Review Estimate window and MPP Tab.
- The current retainage is now calculating properly when a user reduces a material prepayment on the payment tab on the review estimate window.

## **Generate Estimates**

- The current retainage is now calculating properly when a user reduces a material prepayment on the payment tab on the review estimate window.
- The correct month is now specified on the warning message when entering average terminal prices. (the warning message appears if current month's prices have not been entered yet, and the estimate includes not yet processed tickets from previous months.)

## **Contract Line Items**

- Line Items created on an SA now appear before their status is set to Contractor Concurrence. (These line items are on the Contract Line Item Quantity Report.)

## **Review Pay Records**

- Now Pay Records counts only one unit when the Alt ID is: "Tag", "Piece", or "Girder".

## **Review Tickets**

- Expired Producer/Suppliers/Facilities no longer appear on selection windows where a user can associate it with contract tracking records.
- A warning message is now provided when a user saves an asphalt ticket with an AC% less than 1 or greater than 10.

## **SA/FA Documentation**

- Problems printing the Supplemental Agreement Reports have been fixed.
- For Supplemental Agreements without line items, information appears correctly on the Supplemental Agreement Document Report and the Negotiated Process Report.
