

Application Modifications and Enhancements

HiCAMS Version 5.3.1 & DOH Vendor Version 3.0.1 were released Thursday, 5/2/2002.

HiCAMS Version 5.3.1

CONTRACT TRACKING – General

- Due to a defect in Version 5.3, unnecessary Certification requirements were added to Material Types that also require Field Inspection Reports. These unnecessary Certification requirements have been removed. All other Certifications that were necessary prior to Version 5.3 are still required.

SAMPLING - review Sample Details

- System no longer requires a new entry for Sampled By when the Material is changed on a Sample which has been Received.

DOH Vendor Version 3.0.1

TECHNICIAN CERTIFICATION – Technicians

- The Staff button is now available on the Technician Selection window after the first retrieve (when opened from Vendor). This enables the entry of a New Staff like 'Smith XYZ' even if other Smiths are already present as technicians and/or staff. Also, the 'New Staff' button on the Vendor staff search window is always available if the user has the appropriate security.
- If a new Staff is entered from the Technician Search - Staff or Technician Maintenance - Staff icon, the Security Organization is defaulted to "Non-DOT Technicians" with a sub-category "Non-DOT Tech (A.....Z)" based on the first letter of the staff's last name. The sub category becomes effective with this version.
