

Application Modifications and Enhancements

HiCAMS & DOH Vendor Version 6.2.1 were released Friday, 4/2/2007.

OVERVIEW OF THE RELEASE

- The primary changes in the 6.2.1 release are:
 - A new standard report called DBE Payment Report has been created. This report is used to estimate Subcontractor payments on DBE line items
 - Enhancements to the Subcontract Report by Vendor/Contract standard report
 - Improvements to the Batch Printing Sample Test Results functionality
 - A new toolbar icon has been added next to the M&T Homepage icon to provide a convenient link to the Traveler Information Management System (TIMS) web page. Remember to access the TIMS website using Internet Explorer.

HiCAMS Version 8.4.1

CONTRACT MAINTENANCE – Review Contract Times

- Improved the warning message text when an Intermediate Contract Time Availability Date is set that causes its Completion Date to exceed the overall Contract Completion Date.
- Corrected the system edits to require “Per Day” Contract Times to have an Availability Date, Calendar Days, and Completion Date before the Contract Time can be marked as Complete.
- Added logic to create a History record when a Contract Time record is Voided, and modified the window to allow users to click on Voided Contract Times.
- Corrected a problem that periodically caused blank rows on the History tab.
- Modified the window to prevent Time Restriction Contract Time Events from being logged until after the Contract Time record itself has been saved.

CONTRACT ESTIMATES - Generate Estimates

- Corrected the application to not produce a warning message if there are outstanding claims when a Partial Estimate is Approved. It will continue to provide a warning on approval of a Final Estimate when Claims are pending.
- Enhanced the logic to exclude any Contract Times that have been Voided since the previous generation of an estimate.

CONTRACT ESTIMATES - Review Estimates

- Corrected conditional problems where the Apparent Damages field displayed the wrong value.
- Corrected the edit logic to provide a warning message when an Estimate is approved and a Claim is outstanding only if the Estimate Type is Final or Supplemental.

- Adjusted the application to default the Currently Assessed value to zero for partial estimates and to re-set it to zero if the estimate is subsequently re-generated.
- Modified the system to only require a comment when the Construction Unit overrides the Currently Assessed field on a Final or Supplemental Estimate.
- Modified the Contractor version of the Estimate report to only display the Assessment of Liquidated Damages section on Final and Supplemental Estimates.
- Corrected the Estimate Report window (launched by clicking the Print icon from within the Review Estimates window) to make the Estimate Report for Contractors the initial default version listed in dropdown and to display the content of that version of the report in the window. The report had been displaying the Estimate Report with WBSs.

CONTRACT ESTIMATES – Print CCU Estimates

- Corrected a problem in the Print CCU functionality that occasionally caused an Estimate to print a blank page. The problem also was corrected when printing Estimates via the Review Estimates window.

FIELD INSPECTION REPORTS – Prestressed Concrete

- Corrected the application to use the proper Prestressed Concrete Rating Limits.

STANDARD REPORTS – DBE Payment Report

- This is a new report that shows the amounts that should have been paid to each subcontractor on a contract to date. This information is based on the estimate payments paid to the Prime Contractor on those line items and the Subcontractor percentage for those line items. It can be used to verify pending Disadvantaged Business Enterprise (DBE) payments on the DBE Payment Tracking web site.

STANDARD REPORTS – Subcontract Report by Vendor/Contract

- The report has been enhanced to provide all instances where a selected Vendor is either a Prime Contractor, Subcontractor or 2nd Tier Subcontractor.

REFERENCES – Batch Printing

- Removed the restriction of only being able to select 15 samples to print at a time.
- Enhanced the functionality to control the default lab(s) for printing via entries in the hicams.ini file.

DOH Vendor V6.2.1

OVERVIEW OF THE RELEASE

- The primary changes in the 6.2.1 release are:
 - A new standard report called DBE Payment Report has been created. This report is used to estimate Subcontractor payments on DBE line items
 - Enhancements to the Subcontract Report by Vendor/Contract standard report
 - Improvements to the Batch Printing Sample Test Results functionality

TECHNICIAN – Review Technician Certifications

- Corrected the Welder pop-up window to display the appropriate information for welder certifications.

ADMIN - Codes Table

- HIGHWAY WORK Codes: Corrected the tabbing sequence for data entry on the window.
