

# **Application Modifications and Enhancements**

***HiCAMS & DOH Vendor Version 6.4.3 were released Wednesday, 3/18/2008.***

## ***HiCAMS Version 6.4.3***

### **CONTRACT TRACKING – MATERIAL RECEIPTS**

- Corrected the window focus when using Save As functionality and then clicking on different tabs for the selected row.
- Protected system columns from click sort functionality.

### **QUERY TOOL - CONTRACTS**

- Added Final Estimate Document fields, Archive and Contract Record fields and any other fields previously missing from the Completion Tab.

### **QUERY TOOL - FIELD INSPECTION REPORTS - PRESTRESSED CONCRETE**

- Restored double-click navigation to the Prestressed Concrete window from query result rows.

### **REFERENCES - MASTER BILL OF MATERIALS**

- Corrected a problem where the substitution group field was protected even if all other records from that group were deleted. Users can now remove the substitution groups and delete substitutable materials from the Master Bill of Materials as needed.

### **REFERENCES - MATERIALS**

- Modified the window to prevent expired Concrete Classes from being assigned to a material.
- Restored the previously saved Concrete Class value if an attempted change fails for any reason.
- Expanded the width of the Concrete Class dropdown selection list to allow full display of the values.
- Provided the ability to remove Concrete Class designations on non-concrete materials.

### **ADMIN - NOTIFICATION SETUP**

- Corrected a problem with the mouse pointer that occurred after inserting a new job title.

## ***DOH Vendor Version 6.4.3***

### **DOH Vendor PRODUCTS**

- Expanded the dropdown selection list size for Groups to display the appropriate choices.
