

Application Modifications and Enhancements

HiCAMS and DOH Vendor Versions 7.0.1 were released Friday, May 23, 2008.

HICAMS - General

- Corrected a problem in many windows where tabbing out of the Contract Number field one or more times caused the Contract Number display to disappear.
- **NOTE:** *No changes were made to the DOH Vendor system in the 7.0.1 release. This release maintains synchronization of the Release Numbering.*

CONTRACT MAINTENANCE – Review Contract Details

- **Completion Tab:** Added a blank value to the dropdown selection fields for Workflow Status. This way, if a value is selected and saved erroneously, it can be nullified by selecting and saving the blank row.
- **Completion Tab:** Corrected a problem where navigation through various tabs sometimes caused the display of the Acceptance Date value to disappear, though the value was retained in the database.
- **M&T Status Tab:** Added a blank value to the dropdown selection fields for Workflow Status. This way, if a value is selected and saved erroneously, it can be nullified by selecting and saving the blank row.
- **Staff Tab:** Added the ability for authorized users to delete the Project Engineer assigned to a contract by putting the cursor on the field and pressing Shift-Click. Future releases will adjust this functionality to the more conventional Click to highlight the field followed by pressing the Delete key to remove the value.

CONTRACT MAINTENANCE – Review Contract Times

- Corrected the toolbar to display the **Insert** and **Delete** icons only when applicable.

CONTRACT ADJUSTMENTS – Review Claims

- Corrected the system to process/edit all data changes first before attempting to perform the edits associated with decision changes. Previously, it was possible to approve a time issue while simultaneously deleting all time extensions for the issue.
- Adjusted the system to handle scenarios where the Claim Type is changed. Previously, it was possible to get a Claim in a state where it couldn't be processed.
- Fixed a problem where the focus jumped to the first row on save actions where more than one issue or time extensions were created. Also corrected a similar focus problem that shifted the highlighted row when alternate sort orders were defined.
- Adjusted the system to ensure all data changes and processing were done correctly in instances where saves were initiated by changing the highlighted row to a different Claim.
- Modified the application to clear out compensation amounts entered that exceed the maximum field size of \$999,999, 999.00.
- Added text to the header portion of the error message that occurs when a user attempts to Process a Claim that still has pending Issues.

- Corrected a sort problem on Action Date on the History tab of the Issue Details window.

FIELD INSPECTION REPORTS (FIR) - Review Concrete Pavement

- Disabled the PAR button when the selected row is for a Work Item. PARs and Pay Factors can only be entered against Contract Line Items.

FIELD INSPECTION REPORTS (FIR) - Review Field Inspection Reports

- PRECAST CONCRETE: Expanded the **Concrete Class** dropdown selection choices in the Select Concrete Mixes pop-up window to include **Precast Self Consolidating**.
- PRESTRESSED CONCRETE: Expanded the **Concrete Class** dropdown selection choices in the Select Concrete Mixes pop-up window to include **Precast Self Consolidating**.

SAMPLING - Review Sample Details

- Corrected a problem that caused the system to crash when a sample was in certain statuses and the notebook icon for the Certification Override Comment was clicked.
- Adjusted the system to allow inquiry users to navigate to Pay Adjustment Recommendations that have been created on rejected samples.

SAMPLING - View Pending Contract Samples

- Corrected a problem that caused certain samples to still display on the window even after they had been disposed properly.

REFERENCES – Concrete Mix Designs

- ASSIGN CONTRACTS: Fixed a problem where certain values in the **Assignment Expiration Date** were not being evaluated correctly.
- MASS CHANGES: Corrected the spelling of the label Additives.
