

# Application Modifications and Enhancements

***HiCAMS & DOH Vendor Version 8.6.9 were released Friday, August 26/2022.***

## OVERVIEW OF THE RELEASE

- Application enhancements in various modules related to Average Terminal Price, Contract Details, Claims, Estimates, Plastic Pipe FIR, Notifications, Standard Reports, Test Formats
- Data fixes for production issues in various modules

## HiCAMS -

### CONTRACT MAINTENANCE - Review Contract Details

- Fixed security access on Anticipated Work Start Date. Allow update for Resident Engineer staff who can also set Work Start Date on contract. – [SQA 22873](#)

### CONTRACT ADJUSTMENTS - Review Claims

- Changed code on the Claim Review Issues window to allow each new required comment entry, to enter up to 255 characters. A comment is required when saving an Issue and the Decision is Approve as Noted, Recommend Approval As Noted, Deny, or Void. – [SQA 22878](#)

### CONTRACT ESTIMATES - Review Estimates

- Expanded the Recvd To Date – Paid to Date column on (Estimate Report Snapshot) report. – [SQA 22795](#)

### FIELD INSPECTION REPORTS (FIR) - Review Field Inspection Reports

- PLASTIC PIPE – Added multiple checks and messages to ensure correct data saved on FIR. The Test Result and Alt ID data can come from the Producer electronically and save on the FIR OR data that is not sent from the Producer can be saved on the FIR.
  - Changed the Sample From to default to 'Plant'; require Contract # if Sample From is 'Project'.
  - Inspection Date must be saved before Test Results are added to FIR.
  - Test Results and Alt IDs must both come from the Producer electronically (Test Result imported/Alt IDs scanned) OR neither come from the Producer electronically.
  - FIR, Test Result and Alt ID must have the same Plant ID.
  - Alt IDs scanned before Test Result is imported, will be added to the FIR when the Test Result is imported. User doesn't need to re-scan the Alt IDs.
  - Producer's Material Description is displayed in the Test Result 'grid' and also in the bottom portion of Results window (where the detailed result data is displayed).
  - Added ability to use word wrap feature in the Results grid and Import window.

- Expanded the Lot ID data from 15 to 25 characters. – [SQA 22869](#)

## **SAMPLING - Review Test Results**

- Corrected bug on Review Test Results window, the fields were protected, and users could not enter test values. Window is now open to users with access to enter results. – [SQA 22866](#)

## **STANDARD REPORTS**

- CONTRACT OVERRUN/UNDERRUN COMPUTATION REPORT: Added code that allows when the SA (Supplemental Agreement) is underrunning, and the complete indicator has been checked - update the projected over/under amount to display the Paid amount once all work has been completed. – [SQA 22881](#)

## **QUERY TOOLS**

- FIELD INSPECTION – PS Plastic Pipe Test – Producer Supplier Test Result data. – [SQA 22895](#)
- FIELD INSPECTION – PS Alt ID – Producer Supplier Alt ID data. – [SQA 22895](#)

## **REFERENCES - Average Terminal Prices**

- Changed code to keep all 7 Steel Base Prices open for edit/update until system logic is added to use the prices, at which time application will protect the fields when they are used on an estimate. – [SQA 22874](#)

## **ADMIN - Notification Setup**

- Increased the size of the Comment field on the Notification display window, the print Notification Report and the Notification Forward window from 255 to 1,000 characters. – [SQA 22871](#)
