Presentation Outline

- Use of Big Data in the Fayetteville Regional Model Development
- Big Data in Lynchburg Regional Model Development and Virginia Statewide Transportation Model Development
- Recent Progress and Studies

Big Data in Fayetteville Regional Model Development

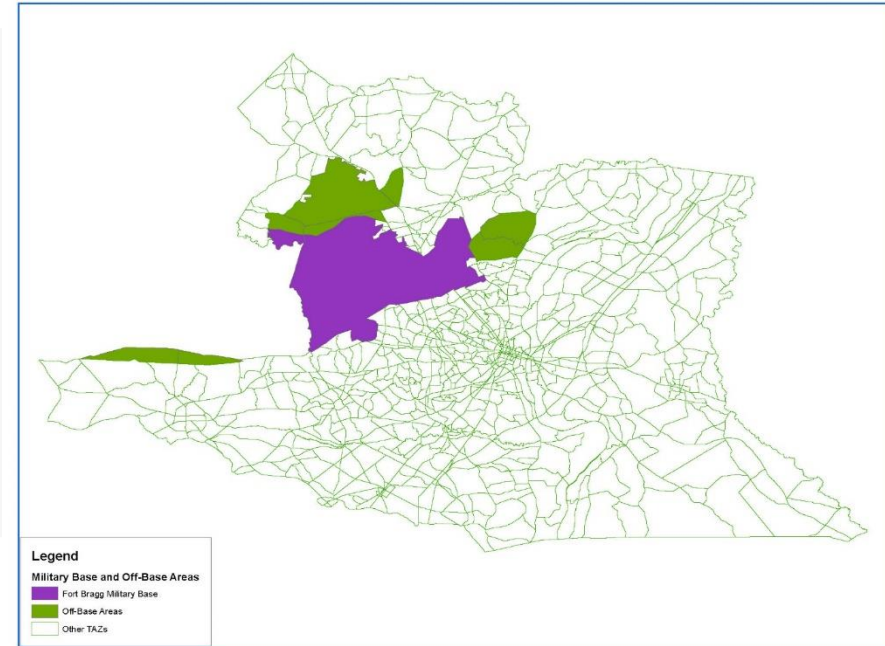

Fayetteville Regional Model Development

Use of Big Data for

- » External Travel;
- » Commercial Trucks; and
- » Special Generators (Fort Bragg Military Base)

Fayetteville Region

Category	Fort Bragg
Area Population (2015)	425,000
Area Total Employees (2015)	180,790
Active Duty Soldiers	52,280
Reservists	12,624
Civilian Employees	8,757
Army Retirees & Family Members in Area	98,507

Fort Bragg Modeling

- Capture the unique travel dynamics related to Fort Bragg Military Base
- Sensitive to changes in socio-economic data
- Sensitive to changes in transportation supply

Treat the military base as a special market with at least three person trip purposes including HBW, HBO, and NHB and at least one commercial vehicle trip purpose.

Observed Data

- Reviewed local observed data for the development of parameters including the Household Travel Survey
- Reviewed additional outside sources for information about the trip making characteristics of Military Bases
 - » ITE Trip Generation Rates
 - » El Paso MPO Travel Model – Fort Bliss model(s)
- Acquired Streetlight Data for MPO Region

Military Base Origins

(Streetlight data)

Personal Travel

Average Weekday (M-Th)

View as #

O-M-D Traffic (StL Index)

- 782.29 - <1,043
- 521.53 - <782.29
- 268.76 - <521.53
- 0 - <268.76

Heatmap of O-M-D Traffic (StL Index)

Colors indicate the StreetLight Trip Index to each destination Zone during the selected time period.

O-M-D Traffic (StL Index) Volume by Purpose

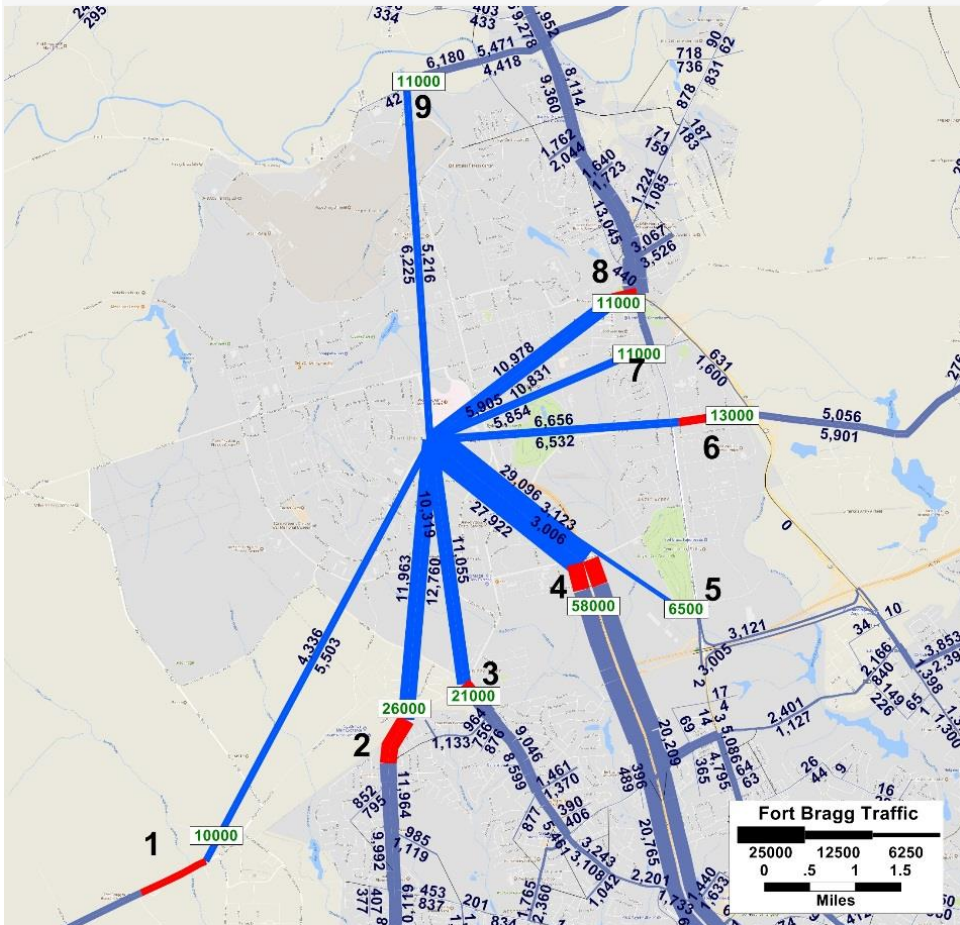

O-D Traffic (StL Index) values represent relative activity, not the number of trips or vehicles. The values are indexed to allow comparison across Projects. Personal and Commercial O-D Traffic (StL Index) values use different indices and therefore can

Streetlight - Total Trips

Calibrated Daily Traffic to/from Military Base

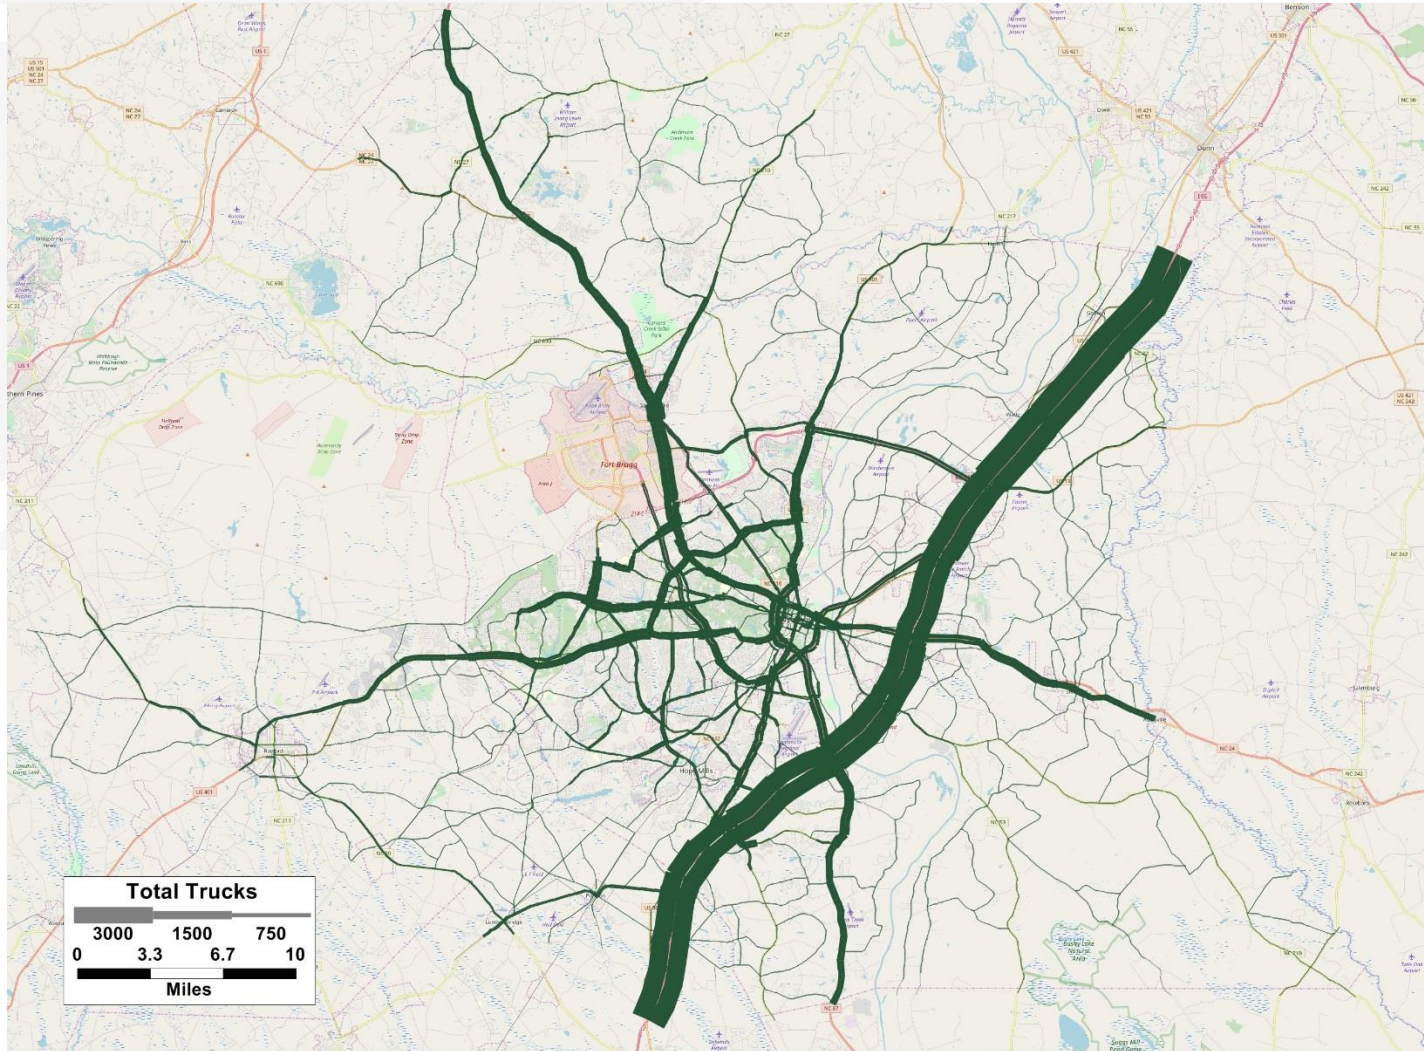

Location	2015 ADT	Model	Diff	% Diff
Chicken Rd	10,000	9,840	(160)	-2%
N Reilly Rd	26,000	24,723	(1,277)	-5%
Yadkin Rd	21,000	21,374	374	2%
All American Fwy	58,000	57,018	(982)	-2%
Knox St	6,500	6,129	(371)	-6%
Honeycutt Rd	13,000	13,188	188	1%
Randolph St	11,000	11,759	759	7%
Butner Rd	20,000	21,809	1,809	9%
W. Manchester Rd	11,000	11,442	442	4%
Total	176,500	177,282	782	0%

Military Base Daily Passenger Vehicle Trips

Streetlight Trucks

Model Components Based on Streetlight Data

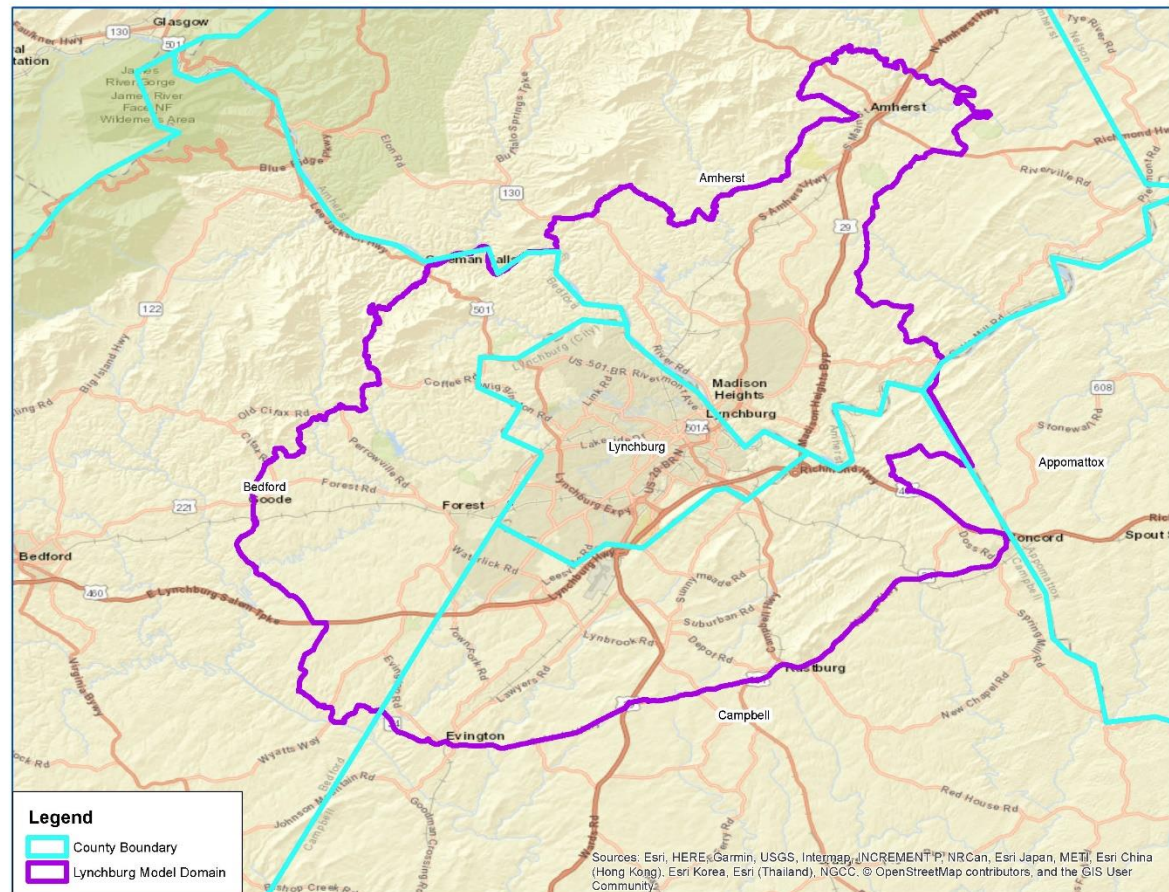

- Base Year External Vehicle Trips
 - » Trucks and Passenger Vehicles
- Base Year Internal Truck Trips
- Base Year Military Base Trips

Big Data in Model Developments in Virginia

Lynchburg Regional Model Development

➤ Use of Big Data for External Travel and Commercial Trucks

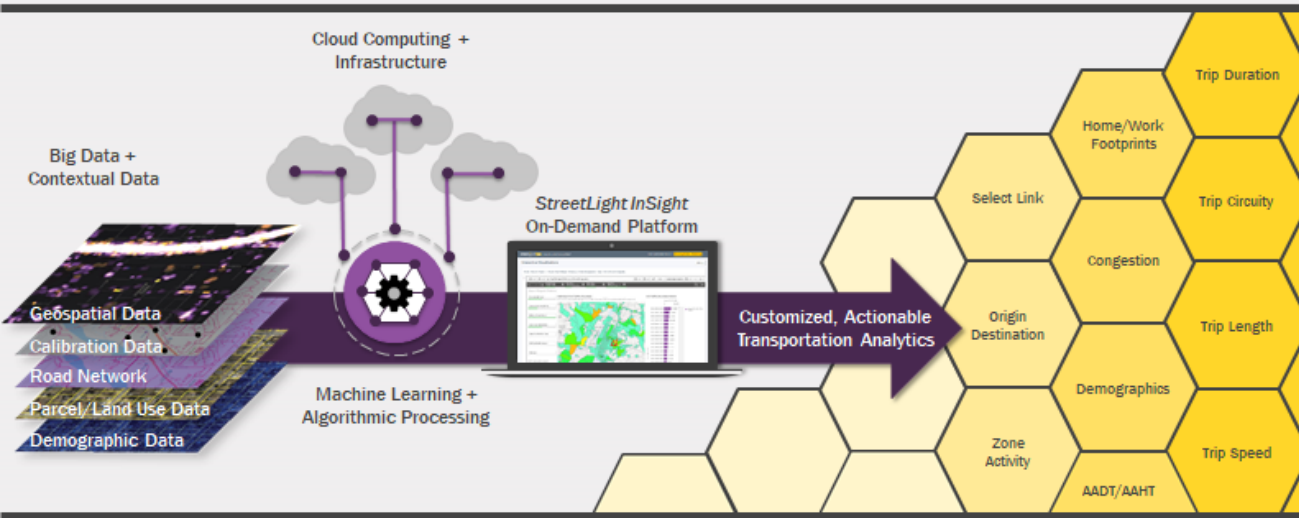

Lynchburg Regional Model Development

- External Travel
 - » StreetLight LBS
- Commercial Trucks
 - » StreetLight GPS
- Develop trip tables using Origin Destination Matrix Estimation (ODME)

Location-Based Services and GPS-Based

StreetLight InSight Turns Big Data into Actionable Transportation Analytics On Demand

Shares of Trips by Trip Purpose

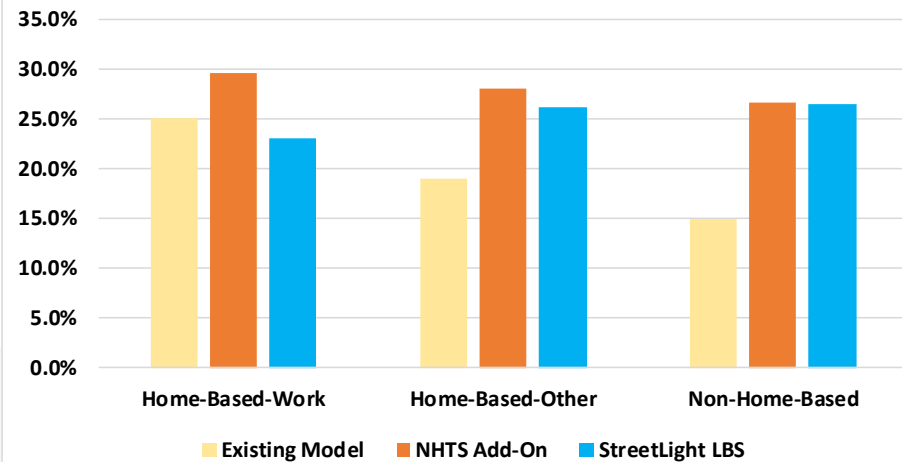

Time of Day Factors

AM Peak Period

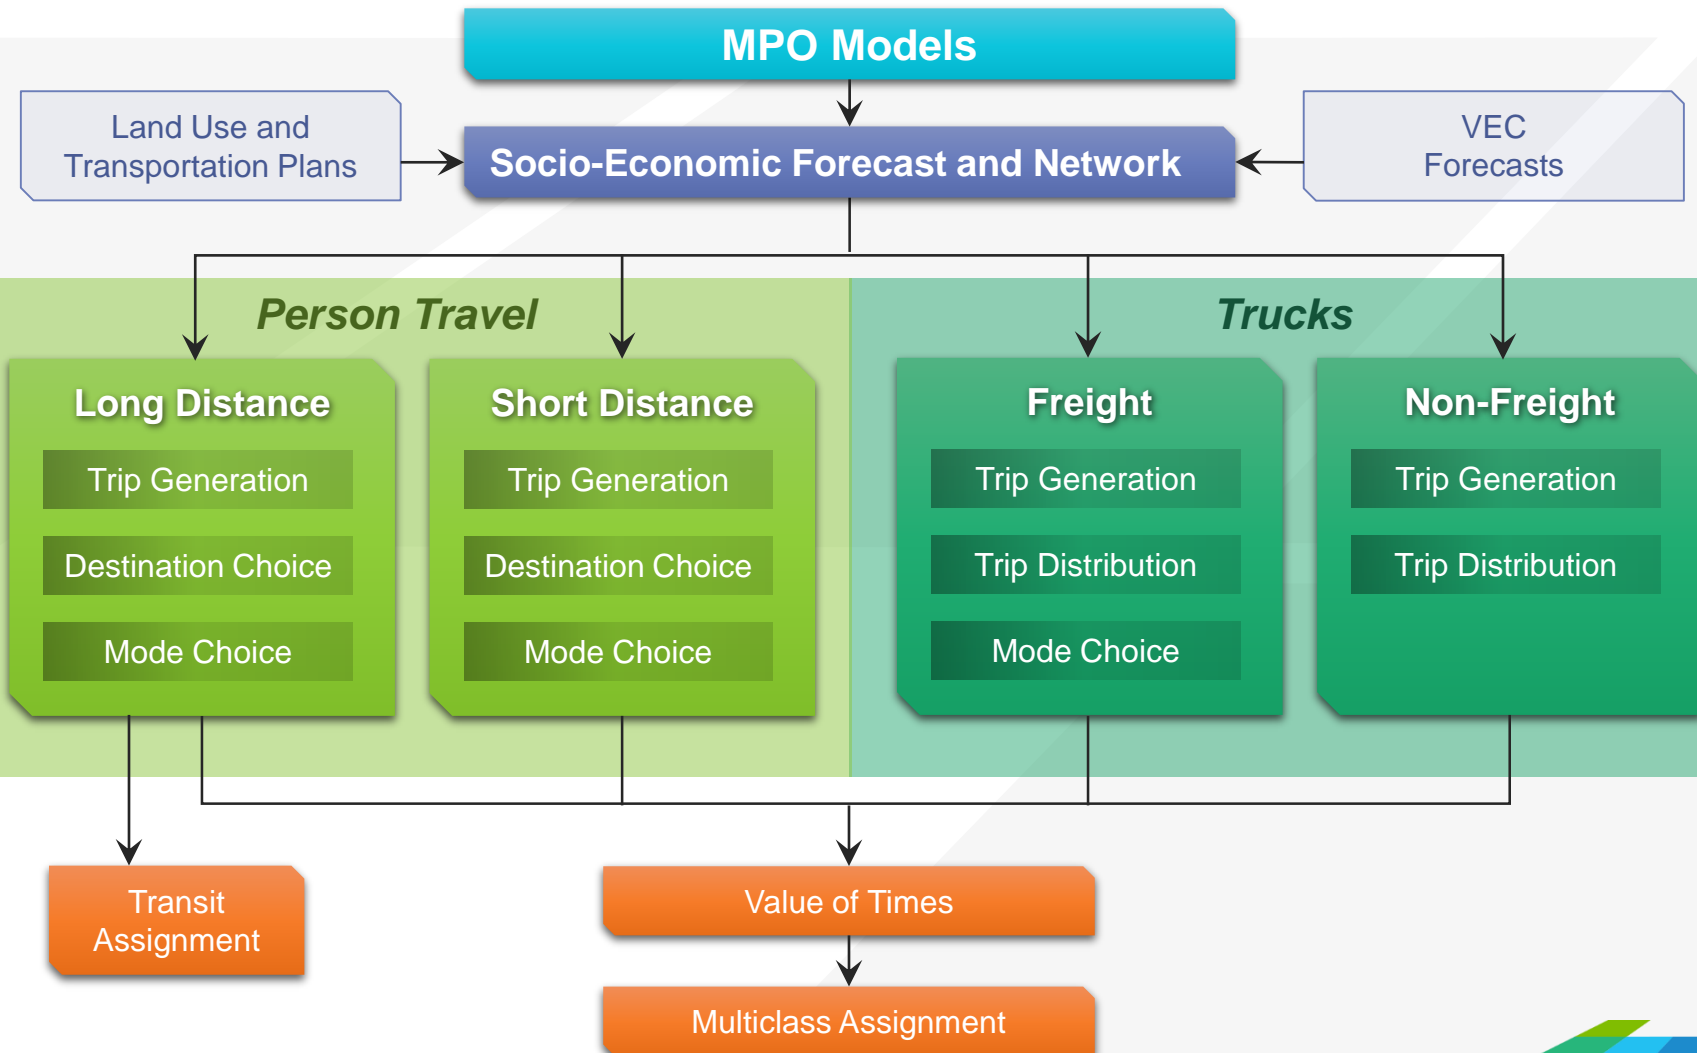

PM Peak Period

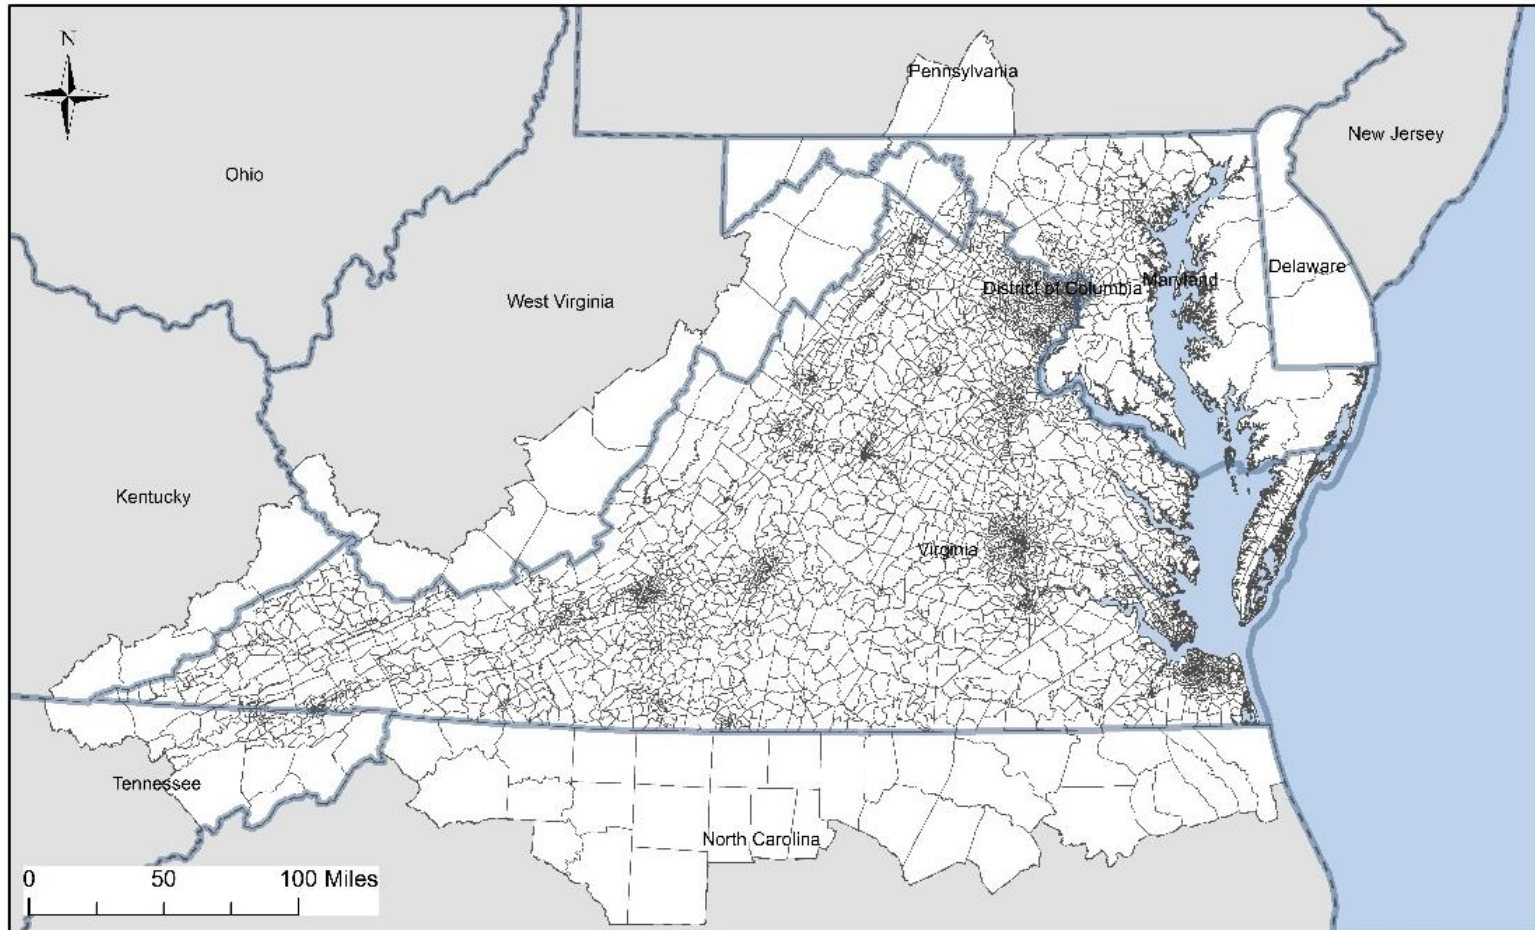

Virginia Statewide Transportation Model

- Big data in model development and validation:
 - » special generators
 - » external travel
 - » intra-state truck trips

Structure and Functionalities

Model Domain (Passenger Travel)

Features

-  States
-  Traffic Analysis Zones in VA and Adjacent Areas

External Travel

➤ Internal-External Share Model

Special Generators

➤ Airports

- » ITE Airport Trip Generation Rates
- » StreetLight OD tables

➤ Recreational Travel

- » Visitation
- » StreetLight OD tables

Intra-State Truck Trips

- Non-Freight Truck Travel
 - » ATRI Data
 - » Developed truck trip tables using Origin Destination Matrix Estimation (ODME)
