Base Year Roadway Network

Review of Base Year (BY) Roadway Maps/List

Existing BY Network Criteria:

- 1) All facilities with federal functional classification of collector or higher should be included. This should capture all “NC”, “US”, and Interstates.
- 2) All facilities identified as North Carolina Strategic Highway Corridors should be included.
- 3) All facilities that carry a significant level of traffic should be included. Non-rural counties generally AADT of 2,000vpd and rural counties could be less than 2,000vpd.
- 4) Facilities that go through multiple municipalities or counties, serving external/internal and through trips, should be included.
- 5) Include all TIP projects that are on new location, add capacity, or are justifiably identified as important facilities by the CTP Committee or Division Office.
- 6) All facilities included as part of the Federally designated in STC.
- 7) Roads not already captured by previous steps that provide access to intermodal connectors
- 8) Any road that is part of a CTP in an adjoining area/county that crosses into the study area should be included.
- 9) Locally classified, unclassified, or low volume roadways that are needed to provide a reasonable representation of travel patterns and to allow for connectivity.
- 10) Any other road that the CTP committee would like to be added due to transportation issues that need addressing (e.g. congestion, truck traffic, popular cyclist route, and safety issues).
- 11) Local streets are not ordinarily included in a CTP unless they are needed to provide a reasonable representation of travel patterns in the area.
- 12) Unpaved roads **are not** generally part of a CTP study.
