
The preparation of this map was financed in part through a grant provided by the North Carolina Coastal Management Program, through funds provided by the Coastal Zone Management Act of 1972, as amended, which is administered by the Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration.

Brunswick County Land Use Plan

Notes:

1. All waters under the jurisdiction of Brunswick County are either estuarine waters or public trust areas as defined in 15A NCAC 7H.0206 Estuarine Waters and .207 Public Trust Areas
2. All areas lying 0-75' landward of the mean high water level of estuarine waters are classified as estuarine shorelines. Because of the map scale these areas cannot be accurately mapped. Precise locations must be determined in the field through CAMA review and permit approval
3. Coastal wetland areas exist in Brunswick County. Because of the map scale, coastal wetland areas must be determines though on-site analysis.
4. Conservation locations are approximate and are not precise. Conservation areas include some 404 Wetland Areas. Those areas must be determined by the US Corps of Engineers personnel through individual on-site analysis.
