Project History/Linkage to Other Plans

Planning and development are underway to widen approximately 15 miles of I-95 to eight lanes south of Fayetteville between exit 40 and exit 56.

CTP Goal Analysis

Vision, Goals, & Objectives

An important part of the local, regional, state and national transportation systems, I-95 serves commerce, residential populations, the tourism sector, the military, school systems and medical centers, among other institutions. The interstate is also part of North Carolina's hurricane evacuation route system.

The N.C. Department of Transportation will split the work into two design-build contracts, which is an alternative way to complete a project. After a contract is awarded the design will be finalized and the right of way acquisition completed before construction begins.
