

## **Bicycle – Pedestrian – Multiuse Paths Assumptions/ Notes:**

- ❖ **Local ID:** Local ID: If a TIP (Transportation Improvement Program) project number exists it is listed as the ID. Otherwise, the following system is used to create a code for each recommended improvement: the first 4 letters of the county name is combined with a 4 digit unique numerical code followed by ‘-B’ for bicycle, ‘-P’ for pedestrian, ‘-M’ for multiuse path, and ‘-GS’ for non-highway grade separations. Note: The Local ID will be designated later in the CTP development process when the study segments are combined to form logical projects.
- ❖ **Facility/Route:** This is the name of the facility, which is often the name of the roadway on which the facility is located. Sometimes, there are multiple projects on the same roadway, in which case the Section information can be used to distinguish among those projects.
- ❖ **Section:** This identifies the termini of the study segment.
- ❖ **Status:** This indicates the long-range planning status of the facility:
  - Existing – This is an existing bicycle or pedestrian facility on an existing roadway, or an existing off road or multiuse path.
  - Needs Imp. (Needs Improvement) – This is a proposed bicycle facility on an existing roadway, an additional pedestrian facility (e.g., there is currently a sidewalk on only one side of the roadway) on an existing roadway, or improvements to an existing off road or multiuse path.
  - Recomm (Recommended) = this is a proposed bicycle facility on a proposed roadway, a proposed pedestrian facility on an existing or proposed roadway (i.e., no pedestrian facilities yet exist there), or a proposed off road or multiuse path.
- ❖ **Description:** Provides a more detailed description of the facility when needed.
- ❖ **Distance (mi):** This is the length of the facility in miles.
- ❖ **Jurisdiction:** This is the municipality or county in which the facility is located, and commonly the facility is designated in an adopted plan for that jurisdiction. Some projects are in multiple jurisdictions.

### **Tables**

The remainder of this section presents the tables for the bicycle, multiuse path and non-highway grade separation study segments, in that order. The pedestrian study segments are not presented in a table but instead in a separate section that discusses the MPO sidewalk policy and lists all of the local plans for bicycle, pedestrian and multiuse path facilities.

## Bicycle-Pedestrian-Multiuse <sup>(1)</sup>

1) Locally-adopted plans have designated most of these proposed facilities. See those plans for more detailed descriptions.
